Flinders, 2012-04-25 If the twentieth century witnessed the triumph of democracy then something appears to have gone seriously wrong Citizens around the world have become distrustful of politicians sceptical about democratic institutions and disillusioned about the capacity of democratic politics to resolve pressing social concerns This shift in global attitudes has been explored in a vast body of writing that examines the existence of disaffected democrats and democratic deficits *Defending Politics* meets this contemporary pessimism about the political process head on In doing so it aims to cultivate a shift from the bland and fatalistic politics of pessimism that appears to dominate public life towards a more buoyant and engaged politics of optimism Matthew Flinders makes a highly unfashionable but incredibly important argument of almost primitive simplicity democratic politics delivers far more than most members of the public appear to acknowledge and understand If more and more people are disappointed with what modern democratic politics delivers then is it possible that the fault lies with those who demand too much fail to acknowledge the essence of democratic engagement and ignore the complexities of governing in the twentieth century rather than with democratic politics itself Is it possible that the public in many advanced liberal democracies have become democratically decadent in the sense that they take what democratic politics delivers for granted Would politics be interpreted as failing a little less if we all spent a little less time emphasising our individual rights and a little more time reflecting on our responsibilities to society and future generations Democratic politics remains a great and civilizing human activity something to be valued almost as a pearl beyond price in the history of the human condition as Bernard Crick stressed in his classic *In Defence of Politics* fifty years ago But it is also a far more fragile system of governing than many people appear to realize By returning to and updating Crick's arguments this book provides an honest account of why democratic politics matters and why we need to reject the arguments of those who would turn their backs on mere politics in favour of more authoritarian populist or technocratic forms of governing In rejecting fashionable fears about the end of politics and daring to suggest that the public the media pressure groups academics and politicians are all part of the problem as well as part of the cure this book provides a fresh provocative and above all optimistic view of the achievements and future potential of democratic politics *International Perspectives on Business Innovation and Disruption in Design* Robert DeFillippi, Alison Rieple, Patrik Wikström, 2016-09-30 The third volume of the *International Perspectives on Business Innovation and Disruption* book series focuses on the role of design innovation in

transforming industry practice An international cast of scholars and practitioners examine how design innovation is impacting the creation of new business models innovative forms of service delivery multinational innovation practices the role of aesthetics and psycho spatial dynamics in fostering innovation and the types of design capabilities found in the most innovative businesses worldwide Theoretically many of the chapters focus upon design thinking and conceptualize design as a user centered empathic and participative practice that allows diverse stakeholders to creatively contribute to business innovation
