Peakall, 2012-12-06 Gradually a faint brightness appeared in the east and the air which had been very warm through the night felt cool and chilly Though there was no daylight yet the darkness was diminished and the stars looked pale The prison which had been a mere black mass with little shape or form put on its usual aspect and ever and anon a solitary watchman could be seen upon its roof stopping to look down upon the preparations in the street By and by the feeble light grew stronger and the houses with their sign boards and inscriptions stood plainly out in the dull grey morning And now the sun s first beams came glancing into the street and the night s work which in its various stages and in the varied fancies of the lookers on had taken a hundred shapes wore its own proper form a scaffold and a gibbet The Complete Works of Charles Dickens Harper Brothers New York and London Barnaby Rudge Vol II Chapter XIX page 164 Dickens describes an activity which takes place in the early morning hours just before sunrise As the day begins and people start to go about their business and get ready to watch the hanging the hangman is ready with the gallows

Women in War Industries Series ,1918 *The Biology of Us* Gary C Howard, 2024-11 In our modern world it is easy to overlook the natural world all around us Only major life events such as birth injury disease and death remind us that we are still biological organisms We interact with nature in controlled and safe environments such as zoos theme parks or through different forms of media Television shows films and books are nearly always in exotic locations e g the Kalahari Desert the deep ocean or Antarctica but they inadvertently reinforce our separation from nature Biology happens somewhere else

Author Gary Howard seeks to change that perception The Biology of Us describes the common but fascinating examples of biology and nature that are hidden in plain sight in our daily lives It focuses on human biology but describes animals and plants all around on and in us to put human features into an evolutionary context Many aspects of ourselves and our normal activities are examples of evolution breathing eating standing up communicating telling time and more This book illustrates evolutionary strategies used successfully by common organisms for hundreds of millions of years Howard shows that the organisms in our daily lives are not trivial neighbors or even pests but are just as amazing as those in the Serengeti or the Gal pagos Islands
