**Nature and Science on the Pacific Coast** American Association for the Advancement of Science. Pacific Coast Committee, 1915 The Pacific Coast region of the United States contains many distinctive natural features and much unique material for scientific research Many of the problems presented here are peculiar to the West but in their larger aspects they have a significant bearing upon fundamental questions of world wide concern both in the field of natural science and in the relation of these problems to the affairs of men However interesting western materials may be the traveler wishing to know of them has little time for study and sources of information which might be used are frequently scattered and inaccessible Recognizing the need for ready information on nature and science in the West the Pacific Coast Committee of the American Association for the Advancement of Science has considered it desirable in this year of the two expositions celebrating the opening of the Panama Canal to bring together in hand book form concise data upon matters of general interest for the use of travelers in this region A special committee was appointed to assemble the material and to enlist the assistance of men well informed upon the subjects to be discussed The descriptions contained in this book have been prepared with care by

specialists and the volume is addressed to all travelers in the West who wish to know the significant features of the land through which they pass c taken from Introductory Note page v **California One** Stephen Wilkes,1987-01-01

Finck,2015-07-20 Excerpt from The Pacific Coast Scenic Tour From Southern California to Alaska the Canadian Pacific Railway Yellowstone Park and the Grand Ca on Books on California and Alaska exist in abundance if not superabundance but the intervening States of Oregon and Washington have been comparatively neglected in a way which seems surprising when we consider the remarkable scenic and climatic attractions of those States their industrial resources and the great future which doubtless lies before them The present volume is an attempt to give a general and impartial view of the whole Pacific Coast from San Diego to Sitka Covering such a vast territory it cannot of course make any pretensions to exhaustiveness but is simply an endeavor to reproduce the local color of each State by describing a few typical and important localities in each I have naturally chosen the most favorable specimens as every author or other mortal does in showing samples of a thing with which he is in love I am in love with the Pacific Coast because after living on it eleven years at various times and twelve years on the Atlantic Coast I have found the scenery so much grander and the climate so much more delightful and exhilarating on the western side of our continent than on the eastern and climate and scenery in my opinion make up fully one half of human happiness About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged
