Between the Black Box and the White Cube Andrew V. Uroskie, 2014-02-27 Today the moving image is ubiquitous in global contemporary art The first book to tell the story of the postwar expanded cinema that inspired this omnipresence *Between the Black Box and the White Cube* travels back to the 1950s and 1960s when the rise of television caused movie theaters to lose their monopoly over the moving image leading cinema to be installed directly alongside other forms of modern art Explaining that the postwar expanded cinema was a response to both developments Andrew V Uroskie argues that rather than a formal or technological innovation the key change for artists involved a displacement of the moving image from the familiarity of the cinematic theater to original spaces and contexts He shows how newly available inexpensive film and video technology enabled artists such as Nam June Paik Robert Whitman Stan VanDerBeek Robert Breer and especially Andy Warhol to become filmmakers Through their efforts to explore a fresh way of experiencing the moving image these artists sought to reimagine the nature and possibilities of art in a post cinematic age and helped to develop a novel space between the black box of the movie theater and the white cube of the art gallery Packed with over one hundred illustrations *Between the Black Box and the White Cube* is a compelling look at a seminal moment in the cultural life of the moving image and its emergence in contemporary art **The Moving**

Eye Edward Dimendberg, 2019-05-09 Once the province of film and media scholars today the moving image is of broad concern to historians of art and architecture and designers of everything from websites to cities As museums and galleries devote increasing space to video installations which no longer presuppose a fixed viewer urban space becomes envisioned and planned through fly throughs and technologies such as GPS add data to the experience of travel moving images have captured the attention of geographers and scholars across the humanities and social sciences Their practice of mobility studies is remaking how we understand a contemporary world in relentless motion Media theorist and historian Anne Friedberg 1952 2009 was among the first practitioners of visual studies to theorize the experience of vision in motion Her books have become key points of reference in the discussion of the windows that frame images and the viewers in motion who perceive them Although widely influential beyond her own discipline Friedberg's work has never been the subject of an extended study *The Moving Eye* Film Television Architecture Visual Art and the Modern gathers together essays by renowned thinkers in media studies art history architecture and museum studies to consider the rich implications of her work for understanding film and video new media visual art architecture exhibition design urban space and virtual reality Ranging from early cinema to works by Le Corbusier Sergei Eisenstein Gordon Matta Clark and Pierre Huyghe to theories of the image in motion informed by psychoanalysis theories of the public sphere and animal studies each of the nine essays in the book advances the lines of inquiry commenced by Friedberg Surface Giuliana Bruno, 2014-06-09 What is the place of materiality the expression or condition of physical substance in our visual age of rapidly changing materials and media How

is it fashioned in the arts or manifested in virtual forms In *Surface* cultural critic and theorist Giuliana Bruno deftly explores these questions seeking to understand materiality in the contemporary world Arguing that materiality is not a question of the materials themselves but rather the substance of material relations Bruno investigates the space of those relations examining how they appear on the surface of different media on film and video screens in gallery installations or on the skins of buildings and people The object of visual studies she contends goes well beyond the image and engages the surface as a place of contact between people and art objects As Bruno threads through these surface encounters she unveils the fabrics of the visual the textural qualities of works of art whether manifested on canvas wall or screen Illuminating the modern surface condition she notes how facades are becoming virtual screens and the art of projection is reinvented on gallery walls She traverses the light spaces of artists Robert Rauschenberg James Turrell Tacita Dean and Anthony McCall touches on the textured surfaces of Isaacs and Wong Kar wai s filmic screens and travels across the surface materiality in the architectural practices of Diller Scofidio Renfro and Herzog de Meuron to the art of Doris Salcedo and Rachel Whiteread where the surface tension of media becomes concrete In performing these critical operations on the surface she articulates it as a site in which different forms of mediation memory and transformation can take place Surveying object relations across art architecture fashion design film and new media *Surface* is a magisterial account of contemporary visual culture *Extended*

Temporalities Aa. Vv., 2016-06-27T00:00:00+02:00 This book contains a series of reflections on the theme of temporalities in cinema in the world of art They do so interweaving various paths and various structures in order to arrive at different destination points Which temporalities one may wonder On the boundary between cinema and contemporary art where boundaries actually no longer exist the idea of temporality is affected by paths opened up in historical moments which are actually so recent as to be simply in front of our eyes Video for example derived from television has since been overtaken by the digital evolution yet does not relinquish its domestic function it re creates itself in new forms The same also applies to cinema Art is certainly not limited to this but since it is determined by its technical form in this it continually finds essence and continuity thus a temporality emerges which is determined by technology and by technological change Just as with the temporality determined by the spectator s viewing experience it reveals itself as being in part the personal essence of the subject Therefore they are extended temporalities since they are determined by the unique and unrepeatable combination of the length as predicted by the creator of the work and the unpredictable time management of the observer of the work sometimes bored thoughtful concentrated patient An extendable temporality **Ventriloquism, Performance, and**

Contemporary Art Jennie Hirsh, Isabelle Loring Wallace, 2023-05-31 *Ventriloquism Performance and Contemporary Art* volume calls attention to the unexpected prevalence of ventriloquial motifs and strategies within contemporary art Engaging with issues of voice embodiment power and projection the case studies assembled in this volume span a range of media from painting sculpture and photography to installation performance architecture and video Importantly they both examine and

enact ventriloquial practices and do so as a means of interrogating and performatively bearing out contemporary conceptions of authorship subjectivity and performance Put otherwise the chapters in this book oscillate seamlessly between art history theory and criticism through both analytical and performative means Across twelve essays on ventriloquism in contemporary art the authors who are curators historians and artists shine light on this outdated practice repositioning it as a conspicuous and meaningful trend within a range of artistic practices today This book will be of interest to scholars working in art history contemporary art media studies performance museum curatorial studies and theater Unpacking My Library Marcel

Proust, 2017-01-01 A captivating tour of the bookshelves of ten leading artists exploring the intricate connections between reading artistic practice and identity Taking its inspiration from Walter Benjamin's seminal 1931 essay the Unpacking My Library series charts a spirited exploration of the reading and book collecting practices of today's leading thinkers Artists and Their Books showcases the personal libraries of ten important contemporary artists based in the United States Mark Dion Theaster Gates Wangechi Mutu Ed Ruscha and Carrie Mae Weems Canada Janet Cardiff and George Bures Miller and the United Kingdom Billy Childish Tracey Emin and Martin Parr Through engaging interviews the artists discuss the necessity of reading and the meaning of books in their lives and careers This is a book about books but it even more importantly highlights the role of literature in shaping an artist's self presentation and persona Photographs of each artist's bookshelves present an evocative glimpse of personal taste of well loved and rare volumes and of the individual touches that make a bookshelf one's own The interviews are accompanied by top ten reading lists assembled by each artist an introduction by Jo Steffens and Marcel Proust's seminal essay On Reading **Art in the Age of Machine Learning** Sofian

Audry, 2021-11-23 An examination of machine learning art and its practice in new media art and music Over the past decade an artistic movement has emerged that draws on machine learning as both inspiration and medium In this book transdisciplinary artist researcher Sofian Audry examines artistic practices at the intersection of machine learning and new media art providing conceptual tools and historical perspectives for new media artists musicians composers writers curators and theorists Audry looks at works from a broad range of practices including new media installation robotic art visual art electronic music and sound and electronic literature connecting machine learning art to such earlier artistic practices as cybernetics art artificial life art and evolutionary art Machine learning underlies computational systems that are biologically inspired statistically driven agent based networked entities that program themselves Audry explains the fundamental design of machine learning algorithmic structures in terms accessible to the nonspecialist while framing these technologies within larger historical and conceptual spaces Audry debunks myths about machine learning art including the ideas that machine learning can create art without artists and that machine learning will soon bring about superhuman intelligence and creativity Audry considers learning procedures describing how artists hijack the training process by playing with evaluative functions discusses trainable machines and models explaining how different types of machine learning systems enable

different kinds of artistic practices and reviews the role of data in machine learning art showing how artists use data as a raw material to steer learning systems and arguing that machine learning allows for novel forms of algorithmic remixes
