The Past Realities Of The Precision Of Reality:

The Past Realities of the Precision of Reality Rivollo L' Relic Notable, 2005-04-29 This book seeks the reader's willingness and courage to journey into an unknown past which introduces him or her to a memorable yet simple man who encountered many unexpected tragedies in his life which he had no control over. He repeatedly prayed to God in the hope that God would break the silence and provide him with answers to the intriguing question of why death eventually visits everyone. Eventually a charming and unforgettable little girl enters his life and brings him a gift which helps him remove his frustration towards God. This gift teaches him to let go of his anger of the past and replace it with a clear understanding of an amazingly simple purpose of life and straightforward purpose of existence.

The Realities of Reality - Part IV: The Reality Behind Achieving World Peace Fritz Dufour, MBA, DÉSS, 2020-04-05 This book is organized in seven chapters. Chapter one looks at the origins and the causes of war. The chapter argues that war is a consequence of how we as a species have evolved. War has both endogenous and exogenous causes. While the former depends on our biology and psychology, the latter has to do primarily with international relations. Chapter two makes the case for the paradoxical nature of war. While war takes lives, it is legitimate under certain circumstances. For example, armed humanitarian interventions are allowed to save lives among local populations at the expense of the oppressors by employing all necessary means, ethical or not. Chapter three asks if peace among nations is achievable, which is the main theme of this book. However, it does not elaborate on the question entirely. Instead, it gives sort of a prelude of what will be discussed in the remaining of the book by talking about the concepts of world order and American hegemony, arms race and peacebuilding. Chapter four builds on three by looking at realism, idealism and pacifism in international relations. As to pacifism, the chapter attempts to answer the question: what was the most peaceful time in history? Chapter five presents the elements of hope for world peace by considering the role played by the following: 1 the United Nations, 2 the North Atlantic Treaty Organization (NATO), 3 the Organization for Security and Cooperation in Europe (OSCE), 4 the non-governmental organizations (NGOs), 5 the role of nuclear deterrence, 6 globalization, 7 transnationalism, 8 diplomacy, 9 sports, 10 international cooperation in space exploration, 11 the Nobel Prize, and 12 the declining of war and violence in modern times. On the other hand, chapter six presents the opposite argument or the barriers to world peace using the following points: 1 the proliferation of nuclear weapons, 2 geoeconomics, 3 terrorism, 4 the global refugee crisis, 5 the profitability of arms sales, and 6 the profitability of wars. It makes an interesting argument, especially as to the profitability of wars, by showing how the United States first emerged as an imperial and a world power in the 1890s, then as the only world's superpower after World War II. Finally, chapter seven takes a proactive approach by peering into the future of armed conflict, which is likely to take place in new environments: Cyberspace, the littoral choke points near space, and increasingly in expanding cities or slums. War. The chapter concludes with a discussion on the Doomsday Clock, a concept stemmed from the uncertainty as to the future of mankind because of armed conflicts, and which is a symbol that represents

the likelihood of a man made global catastrophe

Fuzzy Sets in the Management of Uncertainty Jaime

Narrative and History Alun Munslow, 2018-09-19 Based on the assumption that reality reference and representation work together this introductory textbook explains and illustrates the various ways in which historians write the past as history For the first time the full range of leading narrative theorists such as Paul Ricoeur Hayden White Frank Ankersmit Seymour Chatman and Gerard Genette have been brought together to explain the narrative making choices all author historians make when creating historical explanations Combining theory with practice Alun Munslow expands the boundaries of the discipline and charts a new role for unconventional historical forms and modes of expression Clear but comprehensive this is an ideal resource for undergraduate and postgraduate students taking courses on history and theory history and method and historiography

Reality And/or Realities Mauricio Abadi, Susan Rogers, 1995-09 We all take reality for granted as a measuring stick for subjective experience Philosophers have swung between realism and idealism for many centuries Psychoanalysis denies such an opposition and supports the idea that external and internal reality are different ways of describing the same thing It is a tentative and precarious bridge to close the gap between these multiple experiences This book explores the radical idea that reality is deconstructed codified and reconstructed in an absolutely singular fashion by each of us at all times

The Realities of Reality - Part I: It All Starts from Within Fritz Dufour, MBA, DESS, 2018-03-16 This book is the first of a series that considers the many aspects of reality I call it It all starts from within because reality starts with each of us individually and independently It starts from our inner self before evolving into what I would call the collective reality meaning a generally agreed upon state in which groups of people entire nations or the whole world believe That reality includes beliefs cultures ideologies etc As we change and adapt to our environment our reality changes as well New realities emerge Chapter one is about perception and our senses It demonstrates how perception is impossible without our senses Whatever angle of reality that s being analyzed one or more of our senses plays a momentous role in its understanding Chapter two considers the role of the brain in the making of reality It delves into how the brain can make the mind behave a certain way under certain circumstances Chapter three looks at the mind which I call the ultimate maker of reality This chapter describes the mind as that intangible component of the brain and where reality or all realities stem from after of course being picked up by the senses and the brain Chapter four attempts to define reality itself after it s perceived by our senses analyzed by our brain

and processed by our mind I consider five questions in my attempt to answer the question what is reality They are what are things and why do they look different from one another What is life and its origins What is death What is superstition What is space and are we alone in the universe *PEAK EVOLUTION: Beyond Peak Performance and Peak Experience* Lauren Holmes,2010-05-31 This is the second edition of the powerful peak evolution paradigm shift It is the means to leave a lifetime legacy more profound more meaningful more impactful and more valuable to world progress than you thought yourself capable of contributing Peak Evolution offers a breakthrough new approach to achieving the most evolved states known to mankind It is a means to have right now the advanced functionality of the future human which will not be prevalent for generations Peak Evolution serves as an explanation and beacon for people who have spontaneously begun to evolve ahead of the general population and a road map for those who wish to proactively speed evolution Peak Evolution is a how to book for achieving beyond your innate potential by harnessing natural evolutionary forces attempting to ensure the survival and peak performance of all living systems The multitude of systems inside of our bodies or outside of us in a biological ecosystem for example are both kept in balance by these natural evolutionary forces It is therefore only logical to deduce that those same evolutionary forces are also acting upon us directly Our cultures have simply interfered with our ability to comply with and capitalize on these forces Peak Evolution identifies ten signals of those powerful evolutionary forces operating in your life so you can harness that flow to function and achieve goals beyond your potential Your capabilities are extended by the knowledge intelligence mechanisms processes and creativity of nature When you align your internal drives with nature s drives you cannot help but shift into overdrive You are perpetually pulled beyond your previous potential into a state of accelerating evolution or peak evolution This is how ordinary people have been capable of extraordinary achievements

Astral Planes and Your Other Realities Valentin Matcas,2016-04-20 Can you visit other planes and realities But can you live other lives there in your other planes and realities People can always tell beautiful paranormal stories or who knows you might have already been there yourself saw them felt them and now this is why you search through all higher knowledge to learn more about your experience But was it real Are your other worlds real as real as this world All realities are real in a rather trivial manner And even more all realities are objectively real but only as long as you are there Since existence defines them similarly determining closely your continuous firsthand experience Furthermore many realities are part of life part of this life that we have here in this world And now if you have found your way into these other planes of existence in a conscious manner it might have been a natural process altogether and not exactly a random experience It had a purpose while you might have missed fulfilling it and now it is certainly meaningful to know everything that you can ever discover Yet if you have never had a paranormal experience yourself and now you simply wonder what is going there are very powerful drugs that you take regularly with your food drinks drugs and medicine meant to hold you forcefully in this world And now this is exactly what you do you remain here nicely for life And it happens with everybody or almost depending on where you

live or depending on your development and genetic background There is a difference between astral planes the natural human environment and your other realities Because existence comes in three distinct levels used to distinguish between your higher and lower realities While you can understand all your realities through your mind reasoning awareness and imagination since even this world makes sense to you only as part of your reasoning awareness mind and imagination and not exactly directly as anyone may expect And this is the case because there is no other way to experience anything in life and in the wider world but through your perception reasoning and understanding and through the multitude of your selves intelligences and identities present throughout all your realities And this is why you cannot understand astral planes along with your other realities if you do not understand your cognitive system first along with your intelligences selves memories and expectations since everything is interconnected This interesting entanglement of meanings and constraints causes the ultimate truth of your wider existence to remain hidden beneath strong consensual conditions and within tedious loops of reasoning remaining inaccessible in this manner to the ignorant and to the unconditional follower of common ideologies while allowing the truth only to those living life freely consciously and in full awareness and understanding of the wider world through the fulfillment of all natural higher level needs and meanings Because these are your developmental opportunities that you experience in each one of your worlds and realities while following the fulfillment of your natural intelligent human needs for higher experience and higher development This book studies you and your life and existence throughout all your realities that you employ encounter inhabit create and co create throughout your wider existence helping you understand who you are through all your selves and intelligences as you live your life throughout all your worlds and realities If you seek to gain wider understanding of who you truly are this book is for you

The Reality of Infinity and the Existence Yilmaz Gökdeniz, 2008-08-12 This book consists of theoretical articles in cosmology and theology The main focus of these articles is the reality of infinity Infinity whose cognizable definition based on scientific facts has not been made so far has been regarded as a virtual numeric concept and as the last stage of greatness and diminutiveness used as a scale by scientists and men of religion This book asserts that neither numbers nor numerical entities will ever be infinite Numbers are not natural they are not real and they are virtual concepts they stem from the way of thought and willpower of human being The reality of infinity is a concept of cosmology Due to the endlessness of infinity it is possible to define and to understand it with the reality of infinity considering the principles of infinity The book explains that the beliefs and notions of scientists and men of religion are outcome of their own comprehension of the nature of the universe and of religion and focuses on how their theories depending generally on metaphysics or meta science are far from reflecting the realities In the book The Nature of the Universe The Natural Basic Forces and the Universal Balances Blackholes Gamma Ray Bursts Cosmic Background Radiation and other subjects like Predestination destiny Divine Justice and The Existence and Doomsday have been rationally explained Briefly in this book further to the known new ideas and notions introduced in the realms of

cosmology and theology are revolutionary **Narration, Identity, and Historical Consciousness** Jürgen

Straub, 2006-01-01 A generally acknowledged characteristic of modern life namely the temporalization of experience inextricable from our intensified experience of contingency and difference has until now remained largely outside psychology's purview. Wherever questions about the development, structure and function of the concept of time have been posed for example by Piaget and other founders of genetic structuralism they have been concerned predominantly with concepts of physical chronometrical time and related concepts e.g. velocity. All the contributions to the present volume attempt to close this gap. A larger number are especially interested in the narration of stories. Overviews of the relevant literature as well as empirical case studies appear alongside theoretical and methodological reflections. Most contributions refer to specifically historical phenomena and meaning constructions. Some touch on the subjects of biographical memory and biographical constructions of reality. Of all the various affinities between the contributions collected here the most important is their consistent attention to issues of the constitution and representation of temporal experience **Extended Reality for**

Healthcare Systems Samiya Khan, Mansaf Alam, Shoaib Amin Banday, Mohammed Shaukat Usta, 2022-10-18 Extended Reality for Healthcare Systems. Beginning with v 12 a list of the papers contained in preceding volumes is issued regularly with each volume.

Journal of the Transactions of the Victoria Institute, Or Philosophical Society of Great Britain, 1925 **American Historical Explanations** Gene Wise, 1980 American Historical Explanations was first published in 1980. Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions. In this new edition of American Historical Explanations Gene Wise expands his examination of historical thinking to include the latest work in American Studies: the new social history, ethnography and

psychohistory Wise asserts that historians address their subjects through an intervening set of assumptions or what he calls explanation forms similar to the philosophical paradigms that Thomas Kuhn has found in scientific inquiry Through analysis of historical cultural texts including the work of V L Parrington Lionel Trilling and Perry Miller he defines the forms used by several groups of American historians and traces the process by which an old form breaks down and is replaced by a new set of assumptions Throughout he aims to study the process of change in the history of ideas His conclusions extend beyond historiography and will be useful for those interested in literature social sciences and the arts **Reply of the New York**
