Contagion Narratives R. Sreejith Varma,Ajanta Sircar,2022-12-30 This volume is a collection of ten essays that direct their gaze to the unfolding of contagions in the non classical contexts of Asia and Africa Or to borrow from the title of one of Partha Chatterjee's books they are reflections on the pandemic in most of the world Featuring many scholars of the humanities and social sciences in the Global South these chapters take as their

intellectual focus the political social as well as the ethical challenges posed by the contagions in the East Through analyses of literary narratives films video games this Contagion Narratives traces the manufactured narratives of victimization by majority communities and the lethal divides consequently being drawn between a reconstituted authentic majority and the more vulnerable minority other in these societies The essays in this collection are animated by imaginations of liveable alternatives on a planet on the brink This volume traces lineages to Buchi Emecheta and Rabindranath Tagore rather than Albert Camus to Satyajit Ray and the indie traditions rather than Hollywood and to Buddhism rather than Christianity to track the historic journeys of modernity Using an eclectic set of analytical tools and strategies of textual criticism this volume argues that ideas of democracy even while they carry echoes of other societies are markedly different as they travel from Gaddafi s Libya to Wuhan under lockdown to colonial Bengal

**Animals and Nature** Rod Preece, 2011-11-01 No one tradition alone offers a sufficient respect for other species Taken together they may offer a prospect for saner human animal relations From the book Western conceptions of objectivity and individuality have resulted in a readier appreciation of the worth of the animals and nature than has been recognized This provocative book takes issue with the popular view that the Western cultural tradition in contrast to Eastern and Aboriginal traditions has encouraged attitudes of domination and exploitation towards nature particularly animals Preece argues that the Western tradition has much to commend it and that descriptions of Aboriginal and Oriental orientations have often been misleadingly rosy simplified and codified according to current fashionable concepts Animals and Nature is the result of six years intensive study into comparative religion literature philosophy anthropology mythology and animal welfare science

book focuses on social change and animals it is concerned with how humans relate to animals and how this has changed and why Moreover it highlights through chapters on companion animals hunting and fishing animal leisure such as birdwatching and wildlife parks and the meat and livestock industries how attitudes and practices towards animals vary widely according to social class ethnicity gender region and nation *The Evolution of Life, Or, Causes of Change in Animal Forms* Hubbard Winslow Mitchell, 1891
