ABHB Annual Bibliography of the History of the Printed Book and Libraries Hendrik D.L. Vervliet, 2013-11-11 The history of printing books and libraries is confined only to a limited extent within the boundaries of individual countries There are indeed few historical developments which have played a more universal role in reaction against all kinds of particularism than type design printing book production publishing illustration binding librarianship journal ism and related subjects Their history should be assessed and studied primarily in an international not in a local context The bibliographical resources

however which the historian of these subjects has at his disposal correspond hardly at all to the essentially international character of the object of his studies Since the appearance of the retrospective bibliography of BIG MORE and WYMAN covering the subject comprehensively up to 1880 the only current bibliography has been the Internationale Bibliographie des Buchs und Bibliothekswesens Covering a representative part of newly published literature it appeared from 1928 but did not survive the Second World War More recently several useful but limited bibliographies have appeared

The Evolution of the Book Frederick G. Kilgour, 1998-04-23 Distinguished scholar and library systems innovator Frederick Kilgour tells a five thousand year story in this exciting work a tale beginning with the invention of writing and concluding with the emerging electronic book Calling on a lifetime of interest in the growth of information technology Kilgour brings a fresh approach to the history of the book emphasizing in rich authoritative detail the successive technological advances that allowed the book to keep pace with ever increasing needs for information Borrowing a concept from evolutionary theory the notion of punctuated equilibria to structure his account Kilgour investigates the book's three discrete historical forms the clay tablet papyrus roll and codex before turning to a fourth still evolving form the cyber book a version promising swift electronic delivery of information in text sound and motion to anyone at any time The clay tablet initially employed as a content descriptor for sacks of grain proved inadequate to the growing need for commercial and administrative records Its successor the papyrus roll was itself succeeded by the codex a format whose superior utility and information capacity led to sweeping changes in the management of accumulated knowledge the pursuit of learning and the promulgation of religion Kilgour throughout considers closely both technological change and the role this change played in cultural transformation His fascinating account of the modern book from Gutenberg's invention of cast type printing five hundred years ago to the arrival of books displayed on a computer screen spotlights the inventors engineers and entrepreneurs who in creating the machinery of production and dissemination enabled the book to maintain its unique cultural power over time Deft provocative and accessibly written The Evolution of the Book will captivate book lovers as well as those interested in bibliographic history the history of writing and the history of technology
