

# Stigma and the Burden of Infection

Dr. David A. Asch, University of Wisconsin-Madison

Stigma is a social process that occurs when a group of people holds negative attitudes and beliefs about a particular group of people. Stigma is often associated with infectious diseases, and it can have a significant impact on the lives of those who are affected.

Stigma can lead to social isolation, discrimination, and even violence. It can also lead to a lack of access to healthcare and other resources. Stigma is a complex phenomenon that is influenced by many factors, including culture, religion, and social norms.
