**Striper** John N. Cole,1978-11-01      **Striper Wars** Dick Russell,2013-02-22 When populations of striped bass began plummeting in the early 1980s author and fisherman Dick Russell was there to lead an Atlantic coast conservation campaign that resulted in one of the most remarkable wildlife comebacks in the history of fisheries As any avid fisherman will tell you the striped bass has long been a favorite at the American dinner table in fact we've been feasting on the fish from the time of the Pilgrims By 1980 that feasting had turned to overfishing by commercial fishing interests Striper Wars is Dick Russell's inspiring account of the people and events responsible for the successful preservation of one of America's favorite fish and of what has happened since Striper Wars is a tale replete with heroes and some villains as the struggle to save the striper migrated down the coast from Massachusetts to Maryland Russell introduces us to a postman at arms against a burly trap net fisherman a renowned state governor caving to special interests and a fishing tackle maker fighting alongside marine biologists And he describes how champions of this singular fish blocked power plants and New York's Westway Project that would otherwise compromise its habitat Unfortunately those who cheered the triumphant ending to the campaign as the coastal states enacted measures that enabled the striped bass to make its comeback have found the peace transitory there is now a new enemy emerging on the front In recent years a chronic bacterial disease has struck more than seventy percent of the striped bass population in the primary spawning waters of the Chesapeake Bay Malnutrition seems to be a significant factor brought on by the same overfishing that plagued the bass in the first battle only this time the overfishing is devastating menhaden the silvery little fish upon which the bass feed Lessons learned during the first conservation battle are being applied here highlighting a need for a whole new ecosystem based approach to conserving species Only with constant vigilance by concerned citizens Dick Russell reminds us can environmental victories be sustained This particular fish story is a personal one for him and he follows the striper's saga today all the way to California where the fish was introduced in 1879 and where agribusiness now threatens its future For his conservation work during the 1980s Russell received a citizen's Chevron Conservation Award      **Striped Bass Romance** Tony Checko,2022-05-06 A novel that is not like a novel It's about one old and one novice fishermen and a young woman They are talking about the details of surf fishing for striped bass a striped bass tagging program government data on the catch and the recent story of a world record striper The woman goes and comes back to unite her striped bass story with the two fishermen While the two fishermen slouch in the surf she is trying to save the species in California Who gets the water is critical      *Men are Like Fish* Steve Nakamoto,2002      **Striper Wars** Dick Russell,2006-02-10 When commercial overfishing sent striped bass populations into free fall in the 1980s Dick Russell emerged as a key spokesman in a long shot crusade by dedicated fishermen to save them Striper Wars is Russell's vibrant account of their thrilling yet tenuous victory complete with heroes and villains In one of nature's great comebacks groundbreaking moratoriums allowed the striper population to rebound more than tenfold Yet today the striper faces new

threats including a deadly bacterial disease While perils persist Dick Russell s inspiring account offers fundamental lessons about the power of civic action and the necessity of a holistic approach to conservation *Larke, El Capitan and the Theory of Everything* Hugh Macmullan,2010-10-07

**On the East End** Clarence Hickey, 2015-07-11 In 1970 as a young marine biologist Clarence Hickey won a position on the staff of the New York State Ocean Sciences Laboratory Montauk NY For the next five years he was involved in landmark studies of Long Island s then thriving fisheries He developed deep bonds with the Baymen and ocean fishers who called the East End of Long Island home and worked closely with them as he and the Ocean Sciences Lab studied the habits and prospects of more than one hundred species of fish and shellfish that call Long Island home or visit our waters on a regular basis This is his loving anguished memoir of those years replete with vivid portraits of the traditional fishers and scientists he worked with their habits and discoveries and their history suffused community Like their brethren to the north and south on the East Coast Long Island s Bonacker fishing community represents a long and colorful tradition celebrated most famously in Peter Mattheissen s classic Men s Lives Hickey s memoir is an elegiac complement to that book Perhaps more important Hickey calls for our deep attention to the

destruction in less than a generation of a crucial natural resource The contrast between Clarence's years on the East End and today is stark and disturbing Over the last forty years he has revisited his beloved East End regularly and watched with alarm as our ecosystem and its community has declined On the East End is Clarence Hickey's clarion call for us to preserve and revive the natural community he fell in love with when he was young A publication of the Long Island Nature Organization     **Library Journal** ,1978 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately     **The Cumulative Book Index** ,1979 A world list of books in the English language     Running Silver John Waldman,2013-10-15 That one could walk drishod on the backs of schools of salmon shad and other fishes moving up Atlantic coast rivers was a not uncommon kind of description of their migratory runs during early Colonial times Accounts tell of awe inspiring numbers of spawners pushing their way upriver the waters running silver to complete life cycles that once replenished critical marine fisheries along the Eastern Seaboard This is a hugely important fascinating and unique look at the fish of North America whose history and life cycles and conservation challenges are poorly understood Despite these primordial abundances over the centuries these stocks were so stressed that virtually all are now severely depressed with many biologically or commercially extinct and some simply forgotten Running Silver will tell the story of the past present and future of these sea river fish This important book will elevate public consciousness of the contrasts between the historical and the present to show the enormous legacy that has already been lost and to help inspire efforts to save what remains Drawing on the author's thirty year career as a scientist and educator with a passion for the native river fish of the North East Running Silver tells the story of these endangered fish with a mix of research historical accounts anecdotes personal experience interviews and images     **Field and Stream** ,1927     The Reader's Digest ,1979     **Wildlife in North Carolina** ,2003     **NICEM Update of Nonbook Media** National Information Center for Educational Media,1981     Field & Stream ,1979-09 FIELD STREAM America's largest outdoor sports magazine celebrates the outdoor experience with great stories compelling photography and sound advice while honoring the traditions hunters and fishermen have passed down for generations     **A Terrible Mistake** H.
