[Occupational Therapy for Stroke Rehabilitation](#) Simon B. N. Thompson, Maryanne Morgan, 2013-12-20 This book is both an introductory text to the rehabilitation of stroke for student therapists and a reference text for qualified therapists The layout of the book reflects these needs with Chapters 1-4 assuming a minimal level of understanding of the material These chapters provide an introduction to the condition of stroke itself the problem therapists face in assessing and treating stroke patients and therapeutic approaches in occupational therapy Prognosis of stroke is also discussed which is an issue taken up in later chapters concerned with expert systems The use of microcomputers in occupational therapy is discussed throughout the book

with particular reference to their direct role during therapy Chapters 5 7 assume a higher level of understanding from the reader although students will find the material useful as an insight into the work of the modern day therapist Chapter 5 addresses the work carried out in the area of biofeedback Chapter 6 introduces the concept and uses of databases and Chapter 7 discusses the versatility of microcomputers especially in the provision of expert systems for the prognosis of stroke

Stroke Rehabilitation Leeanne M. Carey, 2012-06-28 *Stroke Rehabilitation* Insights from Neuroscience and Imaging informs and challenges neurologists rehabilitation therapists imagers and stroke specialists to adopt more restorative and scientific approaches to stroke rehabilitation based on new evidence from neuroscience and neuroimaging literatures The fields of cognitive neuroscience and neuroimaging are advancing rapidly and providing new insights into human behavior and learning Similarly improved knowledge of how the brain processes information after injury and recovers over time is providing new perspectives on what can be achieved through rehabilitation *Stroke Rehabilitation* explores the potential to shape and maximize neural plastic changes in the brain after stroke from a multimodal perspective Active skill based learning is identified as a central element of a restorative approach to rehabilitation The evidence behind core learning principles as well as specific learning strategies that have been applied to retrain lost functions of movement sensation cognition and language are also discussed Current interventions are evaluated relative to this knowledge base and examples are given of how active learning principles have been successfully applied in specific interventions The benefits and evidence behind enriched environments is reviewed with examples of potential application in stroke rehabilitation The capacity of adjunctive therapies such as transcranial magnetic stimulation to modulate receptivity of the damaged brain to benefit from behavioral interventions is also discussed in the context of this multimodal approach Focusing on new insights from neuroscience and imaging the book explores the potential to tailor interventions to the individual based on viable brain networks

Stronger After Stroke Peter Levine, 2008-10-01 Billions of dollars are spent on stroke related rehabilitation research and treatment techniques but most are not well communicated to the patient or caregiver As a result many stroke survivors are treated with outdated or ineffective therapies *Stronger After Stroke* puts the power of recovery in the reader's hands by providing simple to follow instructions for reaching the highest possible level of healing Written for stroke survivors their caregivers and loved ones *Stronger After Stroke* presents a new and more effective treatment philosophy that is startling in its simplicity stroke survivors recover by using the same learning techniques that anyone uses to master anything Basic concepts are covered including Repetition of task specific movements Proper scheduling of practice Challenges at each stage of recovery Setting goals and recognizing when they have been achieved The book covers the basic techniques that can catapult stroke survivors toward maximum recovery *Stronger After Stroke* bridges the gap between stroke survivors and what they desperately need easily understandable and scientifically accurate information on how to achieve optimal rehabilitation
