of narrative materials in the romance genre and that act to restrict innovation and control the narrative form The reasons for this strict control are to be found in the functional relationship of the genre to the culture that produced it The deep structure of the romance is viewed as a problem solving pattern that enables the community to mediate important contradictions within its social economic and mythic structures Wittig speculates that these contradictions may lie in the social structures of kinship and marriage and that they have been restructured in the narratives in a practical myth the concept of power gained through the marriage alliance and the reconciliation of the contradictory notions of marriage for power s sake and marriage for love s sake This advanced thorough and completely original study will be valuable to medieval specialists classicists linguists folklorists and Biblical scholars working in oral formulaic narrative structure *Learning about Linguistics* F.C. Structuralism J.M. Broekman, 2012-12-06 The use of the word structuralism not only as a title for the present book but also as a valuable indication for outstanding philosophical and cultural developments of our century may embarrass the English reader The same might be the case regarding some of the philosophical thoughts developed in connexion with this structuralism Emphasis is namely not on a set of technical operations using ideas and conceptions closely linked up with structural or systematical analyses system and in formation theories biology psychology and even literary criticism On the contrary the concept of structuralism here definitely refers to a holistic approach not unlike existentialism or phenomenology Many philosophical implications of this structuralism are however quite different from those contained in existential philosophies The first difference applies to philosophy itself no existential thinker will doubt or deny that the thoughts developed are genuine philosophical thoughts Structuralism however does not take that decision before hand and thus no longer restricts itself to the traditional laws and habits of philosophical reasoning It presents itself on the one hand as a holistic attempt to interpret reality among lines of philosophical argumentation but tries to do so without the decision that this argumentation leads to philosophy Structuralism therefore presents itself as a specific activity a *modus operandi* in reality itself
