Structural Materials in Animals C. H. Brown, Clifton Harry Brown, 1975-01-01 Mechanical Design of Structural Materials in Animals John M. Gosline, 2018-05-15 Mechanical Design of Structural Materials in Animals explores the principles underlying how molecules interact to produce the functional attributes of biological materials their strength and stiffness ability to absorb and store energy and ability to resist the fatigue that accrues through a lifetime of physical insults These attributes play a central role in determining the size and shape of animals the ways in which they can move and how they interact with their environment By showing how structural materials have been designed by evolution John Gosline sheds important light on how animals work Gosline elucidates the pertinent theories for how molecules are arranged into macromolecular structures and how those structures are then built up into whole organisms In particular Gosline develops the theory of discontinuous fiber reinforced composites which he employs in a grand synthesis to explain the properties of everything from the body wall of sea anemones to spiders silks and insect cuticles tendons ligaments and bones Although the theories are examined in depth Gosline s elegant discussion makes them accessible to anyone with an interest in the mechanics of life Focusing on the materials from which animals are constructed this book answers fundamental questions about mechanical properties in nature **Mechanical Design of Structural Materials in Animals** John M. Housing of Animals A. Maton,J. Daelemans,J. Lambrecht,2012-12-02 Animal husbandry plays an increasingly important role throughout the world in the fulfillment of the primary need of mankind food The growing demand for food leads to an intensification of the production of livestock and because of the varying climatic conditions in many parts of the world livestock has to be housed in suitable accommodation during certain times of the year This book brings together a descriptive as well as a scientific study of all aspects of the housing of all animals construction of and building materials to be used for the houses and facilities work organisation and labour requirements in different types of animal houses the influence of the animal housing types on animal behaviour animal health and the environment and the cost of building the accommodation This English language edition is a new text of the last edition of the book which was written in Dutch in 1983 A great deal of recent information of international dimension concerning animal husbandry construction and equipment of animal houses has been included in this edition The book has also been updated with the latest scientific and technological findings on this subject published in 1983 and 1984 Agricultural engineers veterinary surgeons architects students progressive farmers and anyone interested in the housing of animals should find much to interest them in this book

Conservation of Marine Archaeological Objects Colin Pearson,2014-05-20 Over the past twenty years there has been a significant increase in underwater activities such as scuba diving which coupled with the adventure andromance always associated with shipwrecks has led to rapid developments in the discovery and excavation of shipwrecked material These shipwrecks are invaluable archaeological time capsules which in themajoriety of cases have come to an equilibrium with their environment As soon as artefacts on the wreck site are moved this equilibrium is disturbed and the artefacts may commence to deteriorate sometimes in a rapid and devastating fashion In fact excavation without having conservation facilities available is vandalism the artefacts are much safer being left on the sea bed Such famous shipwrecks as the Mary Rose 1545 the Wasa 1628 and the Batabia 1629 have not only brought the world s attention to these

unique finds but have also produced tremendous conservation problems The treatment of a 30 metre waterlogged wooden hull or large cast iron cannon is still causing headaches to conservators *Agriculture of Maine* Maine. Board of
