Structural Safety And Its Quality Assurance:

Structural Safety and Its Quality Assurance Bruce Ellingwood, Jun Kanda, 2005-01-01 Sponsored by Committee 9A 10 of the Council on Tall Buildings and Urban Habitat of the Structural Engineering Institute of ASCE This report uses an international perspective to look at structural safety problems from basic concept to design and construction The report examines the overall concept of safety including how to ensure safety and can assist engineers in explaining safety concepts to a client or the public Topics include safety concepts role of regulation and standards load modeling reliability analysis reliability based design durability in structural safety assessment soils and foundations assessment of existing structures quality management of structural design quality management in construction and human error Practicing structural engineers and students in the field of structural engineering will find this report useful

Environmental Load Factors and System Strength Evaluation of Offshore Jacket Platforms Zafarullah Nizamani, 2015-01-27 This book presents a study for the determination of environmental load factors for Jacket Platforms in Malaysia and a methodology to determine the life extension of aging platforms The simplified methods described here could be used for determining not only structural reliability but also safety factors Its content is particularly interesting to design and maintenance engineers who are working in offshore or onshore industry

Life Cycle Analysis and Assessment in Civil Engineering: Towards an Integrated Vision Robby Caspeele, Luc Taerwe, Dan M. Frangopol, 2018-10-15 This volume contains the papers presented at IALCCE2018 the Sixth International Symposium on Life Cycle Civil Engineering IALCCE2018 held in Ghent Belgium October 28 31 2018 It consists of a book of extended abstracts and a USB device with full papers including the Fazlur R Khan lecture 8 keynote lectures and 390 technical papers from all over the world Contributions relate to design inspection assessment maintenance or optimization in the framework of life cycle analysis of civil engineering structures and infrastructure systems Life cycle aspects that are developed and discussed range from structural safety and durability to sustainability serviceability robustness and resilience Applications relate to buildings bridges and viaducts highways and runways tunnels and underground structures off shore and marine structures dams and hydraulic structures prefabricated design infrastructure systems etc During the IALCCE2018 conference a particular focus is put on the cross fertilization between different sub areas of expertise and the development of an overall vision for life cycle analysis in civil engineering The aim of the editors is to provide a valuable source of cutting edge information for anyone interested in life cycle analysis and assessment in civil engineering including researchers practising engineers consultants contractors decision makers and representatives from local authorities
