project in which scientists of the classical disciplines have been invited to collaborate Their inputs have been intensively discussed in a workshop The book is the output of the workshop The first goal of the book is to give the reader an insight into basic principles about the evolution of information processing systems This however leads directly to a very old and essential question who is controlling the world matter or an immaterial intelligence Several authors of the papers are arguing that there is a basic concept of information processing in nature This is the crucial process which however needs a material basis The reader has a chance to understand this paradigm as an approach which is valid for all levels of inorganic organic and societal structures This provocative concept is open to debate      **Mind, Language, Machine** Michael L
