A Comparison of the Egyptian Revolutions of 1952 and 2011

Muhammet Musa Budak,2021-12-15 The 2011 uprisings across the Arab world directed the attention of the international community to the Middle East once again Millions of people took to the streets to demonstrate against their autocratic regimes This was an important indication of the Arab people s desire for change along with an opportunity to restore their dignity Although over time these movements weakened they gave rise to discussions of politics economy social organisms and civil militia relations To understand this phenomenon various theories including revolutionary ones were discussed The revolutionary experiences of these countries are important to examine as these very countries had similar waves of change over 50 years ago The Arab countries of Egypt Tunis Libya Syria and Yemen had gone through coup d tats and leader changes during the 1950s and 60s Comparing these two periods may provide very useful insights to understand the demands of people and how they act to reach these goals This book will particularly analyze the revolutionary periods of Egypt in the 1950s and 2010s As such it will be useful not only to scholars and students of Middle Eastern studies but also to people who want to understand the nature of the demands for change in this region

Handbook of Revolutions in the 21st Century

Jack A. Goldstone,Leonid Grinin,Andrey Korotayev,2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical

and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra

Russia's Revolution from Above 1985-2000 Gordon M. Hahn, Relying on a wealth of detailed institutional policy and elite information Hahn presents a magisterial study that fills a significant void in our understanding of USSR s destruction While readers may at times feel overwhelmed readers are presented with a conceptual approach that can be useful for appreciating ongoing institutional changes and often subtle elite maneuverings in the post Soviet era John P Willerton University of Arizona This is a big book in all respects weighty both in size and scholarship The core is a meticulous analysis of the perestroika period of the Soviet Union 1985 91 Followed by a concluding general chapter that applies the earlier analysis to post Communist Russia 1992 2000 The work is based on years of painstaking analysis considerable archival research and numerous interviews The Russian Review This is an important book with a number of substantive

strengths Slavic Review The fall of the Soviet communist regime in 1991 offers a challenging contrast to other instances of democratic transition and change in the last decades of the twentieth century The 1991 revolution was neither a peaceful revolution from below as occurred in Czechoslovakia nor a negotiated transition to democracy like those in Poland Hungary or Latin America It was not primarily the result of social modernization the rise of a new middle class or of national liberation movements in the non Russian union republics Instead as Gordon Hahn argues the Russian transformation was a bureaucrat led state based revolution managed by a group of Communist Party functionaries who won control over the Russian Republic RSFSR in the mid 1990s Hahn describes how opportunistic Party and state officials led by Boris Yeltsin defected from the Gorbachev camp and proceeded in 1990 91 to dismantle the institutions that bound state and party These revolutionaries from above seized control of political economic natural and human resources and then separated the party apparatus from state institutions on Russian Republic territory With the failed August 1991 hard line coup Yeltsin banned the Communist Party and decreed that all Union state organs including the KGB and military were under RSFSR control In Hahn s account this mode of revolutionary change from above explains the troubled development of democracy in Russia and the former Soviet republics Hahn shows how limited mobilization of the masses stunted the development of civil societies and the formation of political parties and trade unions with real grass roots The result is a weak society unable to nudge the state to concentrate on institutional reforms society needs for the development of a free polity and economy Russia s Revolution from Above goes far in correcting the historical record and reconceptualizing the Soviet transformation It should be read by historians economists political scientists and Russia area scholars Gordon M Hahn is visiting scholar at the Hoover Institution Stanford University His articles on Soviet and Russian politics have appeared in Europe Asia Studies Problems of Post Communism Russian Review and Russian History Histoire Russe

Revolution and Rebellion in the Early Modern World Jack A. Goldstone,2016-12-19 What can the great crises of the past teach us about contemporary revolutions Jack Goldstone shows the important role of population changes youth bulges urbanization elite divisions and fiscal crises in creating major

political crises Goldstone shows how state breakdowns in both western monarchies and Asian empires followed the same patterns triggered when inflexible political economic and social institutions were overwhelmed by cumulative changes in population structure that collided with popular aspirations and state elite relations Examining the great revolutions of Europe the English and French Revolutions and the great rebellions of Asia which shattered dynasties in Ottoman Turkey China and Japan he shows how long cycles of revolutionary crises and stability similarly shaped politics in Europe and Asia but led to different outcomes In this 25th anniversary edition Goldstone reflects on the history of revolutions in the last twenty five years from the Philippines and other color revolutions to the Arab Uprisings and the rise of the Islamic State In a new introduction he re examines his pioneering look at the role of population changes such as rising youth cohorts urbanization shifting elite mobility as continuing causal factors of revolutions and rebellions The new concluding chapter updates his major theory and looks to the future of revolutions in the Middle East Asia and Africa

An Analysis of Theda Skocpol's States and Social Revolutions Riley Quinn, 2017-07-05 Many people want to understand what revolutions are and especially how they come about from the academics who study them to the states that wish to prevent or in some cases provoke them But it is arguably the US scholar Theda Skocpol who has done most to create a viable model of revolution and States and Social Revolutions is the work in which she sets out her intellectual stall Skocpol's magnum opus can be considered a classic product of the critical thinking skill of problem solving She assesses several different revolutions those of France Russia and China and asks new productive questions about their causes and outcomes The answers collectively allow her to move beyond existing theories such as the voluntarist school which suggests that revolutionaries have agency and the Marxist school which sees state institutions as nothing more than a front for class interests Skocpol's model assumes that states are autonomous bureaucratic institutions which act in their own interests a fundamental re imagining based on fresh interpretations of the evidence Her analysis extends beyond the causes of revolution to their consequences and her argument that the revolutionary state that survives is the one that successfully implements a far reaching program of reform helps to explain not only why the three revolutions she studied have proved enduringly influential but also why hundreds of others less successful are barely remembered today

Social Origins of the Iranian Revolution Misagh Parsa, 1989 Misagh Parsa develops a structural theory of the causes and outcomes of revolution applying the theory in particular to Iran He focuses on the ends and means of various groups of Iranians before during and after the revolution For Parsa revolution is not a direct result of ideologies which may be less important than structural factors such as the nature of the state and the economy as well as each group's interests capacity for mobilization autonomy and solidarity structures Existing theories of revolution explain earlier revolutions better than the Iranian revolution In Iran most of the protest was in urban areas the peasants never played a major role and power was transferred to the clergy not to an intelligentsia In the 1970s oil revenues increased the economy developed rapidly but unevenly and the state's expanded intervention undermined market forces and

politicized capital accumulation Systematic repression of workers aid to the upper class and attacks on secular and religious opposition showed that the state was serving the interests of particular groups When the state tried to check high inflation by imposing price controls on bazaaris merchants shopkeepers artisans their protests forced the state to introduce reforms providing an opportunity for industrial workers white collar workers intellectuals and the clergy to mobilize against the state Thus structural features rendered the state vulnerable to challenge and attack Parsa s thorough explanation of the collective actions of each major group in Iran in the three decades prior to the revolution shows how a coalition of classes and groups using mosques as safe gathering places and led by a segment of the clergy brought down the monarch of 1979 In the years since the revolution the conflicts that existed before the revolution seem to be reemerging in slightly altered form The clergy now has control and the state has become centrally and powerfully involved in the economy of the country

Revolutions as Organizational Change Baohui Zhan,2015-09-01 By comparing peasant revolutions in Hunan and Jiangxi between 1926 and 1934 *Revolutions as Organizational Change* offers a new organizational perspective on peasant revolutions Utilizing newly available historical materials in the People s Republic of China in the reform era it challenges the established view that the great Chinese revolution of the twentieth century was a revolution made by the Chinese Communist Party the CCP The book begins with a puzzle presented by the two peasant revolutions While outside mobilization by the CCP was largely absent in Hunan peasant revolutionary behaviors were spontaneous and radical In Jiangxi however despite intense mobilization by the CCP peasants remained passive and conservative This study seeks to resolve the puzzle by examining the roles of communal cooperative institutions in the making of peasant revolutions Historically peasant communities in many parts of the world were regulated by powerful cooperative institutions to confront environmental challenges This book argues that different communal organizational principles affect peasants perceptions of the legitimacy of their communal orders Agrarian rebellions can be caused by peasants attempts to restructure unjust and illegitimate communal organizational orders while legitimate communal organizational orders can powerfully constrain the mobilization by outside revolutionary agents such as the CCP In this thorough comparative account of the peasant risings in Hunan and Jiangxi and the role of the Communist Party Professor Zhang casts new light on both the risings themselves and what they can tell us about peasant risings in general This work is strong in both theory and detailed historical research Richard Rigby professor China Institute Australian National University Professor Zhang has beautifully crafted a comparative study of divergent peasant revolutions in two Chinese regions during Mao s long revolutionary war He brings to this task a broad and deep knowledge about revolutionary theory and also a razor like analytical sensibility which enables him to examine the pros and cons of existing perspectives Timothy P Wickham Crowley associate professor of sociology Georgetown University
