Philosophy of Chinese Architecture David Wang, 2016-12-08 A Philosophy of Chinese Architecture Past Present Future examines the impact of Chinese philosophy on China's historic structures as well as on modern Chinese urban aesthetics and architectural forms For architecture in China moving forward author David Wang posits a theory the New Virtualism which links current trends in computational design with long standing Chinese philosophical themes The book also assesses twentieth century Chinese architecture through the lenses of positivism consciousness phenomenology and linguistics structuralism and poststructuralism Illustrated with over 70 black and white images this book establishes philosophical baselines for assessing architectural developments in China past present and future Heidegger and French Philosophy

Tom Rockmore, 2002-09-11 Martin Heidegger's impact on contemporary thought is important and controversial However in France the influence of this German philosopher is such that contemporary French thought cannot be properly understood without reference to Heidegger and his extraordinary influence Tom Rockmore examines the reception of Heidegger's thought in France He argues that in the period after the Second World War due to the peculiar nature of the humanist French Philosophical tradition Heidegger became the master thinker of French philosophy Perhaps most importantly he contends that this reception first as philosophical anthropology and later as postmetaphysical humanism is systematically mistaken **The Derrida Reader** Jacques Derrida, 1998-01-01 In the English speaking world Jacques Derrida's writings have most influenced the discipline of literary studies Yet what has emerged since the initial phase of Derrida's influence on the study of English literature classed under the rubric of deconstruction has often been disowned by Derrida What then can Derrida teach us about literary language about the rhetoric of literature and about questions concerning style form and structure The Derrida Reader draws together a number of Derrida's most interesting and idiosyncratic essays that treat literary language the idea of the literary and questions of poetics and poetry The essays discuss single tropes or concepts a figure such as metaphor the ideas of titles and signatures proper names and Derrida's thinking on such subjects as undecidability or aporia The editor's introduction is a demonstration in practice of how Derrida reads and how he adapts the act of reading to the text or figure in question The introduction also outlines each essay's main points its usefulness for reading literary texts and its particular area of interest The Derrida Reader thus provides students of literature with a focused contextualized and readily understandable volume The Cambridge Companion to Sartre Christina Howells, 1992-08-28 Providing a balanced view of Sartre's philosophy in relation to contemporary trends in Continental philosophy this volume shows that many of the topics associated with Lacan Foucault Levi Strauss and Derrida are to be found in the work of Sartre in some cases as early as 1936 *The Subject(s) of Phenomenology* Iulian Apostolescu, 2019-12-19 Bringing together established researchers and emerging scholars alike to discuss new readings of Husserl and to reignite the much needed discussion of what phenomenology actually is and can possibly be about this volume

sets out to critically re evaluate and challenge the predominant interpretations of Husserl s philosophy and to adapt phenomenology to the specific philosophical challenges and context of the 21st century What is phenomenology Maurice Merleau Ponty asks at the beginning of his Phenomenology of Perception and he continues It may seem strange that this question still has to be asked half a century after the first works of Husserl It is however far from being resolved Even today more than half a century after Merleau Ponty s magnum opus the answer is in many ways still up for grasp While it may seem obvious that the main subject of phenomenological inquiry is in fact the subject it is anything but self evident what this precisely implies Considering the immense variety of different themes and methodological self revisions found in Husserl s philosophy from its Brentanian beginnings to its transcendental re interpretation and last but not least to its crypto deconstruction in the revisions of his early manuscripts and in his later work one cannot but acknowledge the fact that the subject of phenomenology marks an irreducible plurality of possible subjects Paying tribute to this irreducible plurality the volume sets out to develop interpretative takes on the phenomenological tradition which transcend both its naive celebration and its brute rejection to re articulate the positions of other philosophers within the framework of Husserl s thought and to engage in an investigative dialogue between traditionally opposed camps within phenomenology and beyond

Berit Olam: 1 Samuel

David Jobling,2023-07-14 1 Samuel is a national autobiography of the Hebrew people David Jobling reads 1 Samuel as a story that is complete in itself although it is part of a much larger narrative He examines it as a historical document in a double sense 1 as a document originating from ancient Israel and 2 as a telling of the past Organizing the text through the three interlocking themes of class race and gender Jobling asks how this historical and canonical story relates to a modern world in which these themes continue to be of crucial importance While drawing on the resources of biblical narratology Jobling deviates from mainstream methodology He adopts a critical narratology informed by such cultural practices as feminism and psychoanalysis He follows a structuralist tradition which finds meaning more in the text s large scale mythic patterns than in close reading of particular passages and seeks methods specific to 1 Samuel rather than ones applicable to biblical narrative in general
