Structure And Function In Criminal Law:

Understanding Criminal Law Christopher M. V. Clarkson, 2005 This study seeks to present the key principles of criminal law in a comprehensive and readable style Concentrating on the more theoretical issues the main focus is on the general principles of criminal liability

Reconstructing Criminal Law Nicola Lacey, Celia Wells, Oliver Quick, 2003-09 The authors analyse central aspects of criminal law in the context of the assumptions surrounding it and employ a number of critical approaches including a feminist perspective to give insights into the current state of the law

Crimes That Changed Our World Paul H. Robinson, Sarah M. Robinson, 2018-06-15 Can crime make our world safer Crimes are the worst of humanity's wrongs but oddly they sometimes trigger improvement in our lives Crimes That Changed Our World explores some of the most important trigger cases of the past century revealing much about how change comes to our modern world The exact nature of the crime outrage reform dynamic can take many forms and Paul and Sarah Robinson explore those differences in the cases they present Each case is in some ways unique but there are repeating patterns that can offer important insights about what produces change and how in the future we might best manage it Sometimes reform comes as a society wrestles with a new and intolerable problem Sometimes it comes because an old problem from which we have long suffered suddenly has an apparent solution provided by technology or some other social or economic advance Or sometimes the engine of reform kicks into gear simply because we decide as a society that we are no longer willing to tolerate a long standing problem and are now willing to do something about it As the amazing and often touching stories that the Robinsons present make clear the path of progress is not just a long series of course corrections sometimes it is a quick turn or an unexpected lurch In a flash we can suddenly feel different about present circumstances seeing a need for change and can often just as suddenly do something about it Every trigger crime that appears in Crimes That Changed Our World highlights a societal problem that America has chosen to deal with each in a unique way But what these extraordinary and sometime unexpected cases have in common is that all of them describe crimes that changed our world

Structure and Function in Criminal Law Paul H. Robinson, 1997 Professor Robinson provides a new critique of the often neglected problem of classification within the criminal law He presents a discussion of the present conceptual framework of the law and offers explanations of how and why formal structures do not match the operation of law in practice In this scholarly exposition of applied criminal theory Robinson argues that the current operational structure of the criminal law fails to take account of its different functions He goes on to suggest new sample codes of criminal conduct and criminal adjudication which mark a real departure from the pragmatic approach which presently dominates code making

This rounded exploration of the structure of systems of criminal law is an important work for law teachers and policy makers world wide **The Routledge Handbook of Technology, Crime and Justice** M. R. McGuire, Thomas Holt, 2017-02-24

Technology has become increasingly important to both the function and our understanding of the justice process Many forms of criminal behaviour are highly dependent upon technology and crime control has become a predominantly technologically driven process one where traditional technological aids such as fingerprinting or blood sample analysis are supplemented by a dizzying array of tools and techniques including surveillance devices and DNA profiling This book offers the first comprehensive and holistic overview of global research on technology crime and justice It is divided into five parts each corresponding with the key stages of the offending and justice process Part I addresses the current conceptual understanding of technology within academia and the criminal justice system Part II gives a comprehensive overview of the current relations between technology and criminal behaviour Part III explores the current technologies within crime control and the ways in which technology underpins contemporary formal and informal social control Part IV sets out some of the fundamental impacts technology is now having upon the judicial process Part V reveals the emerging technologies for crime control and justice and considers the extent to which new technology can be effectively regulated This landmark collection will be essential reading for academics students and theorists within criminology sociology law engineering and technology and computer science as well as practitioners and professionals working within and around the criminal justice system

Encyclopedia of Criminology J. Mitchell Miller, Richard A. Wright, 2013-12-17 This three volume work offers a comprehensive review of the pivotal concepts measures theories and practices that comprise criminology and criminal justice No longer just a subtopic of sociology criminology has become an independent academic field of study that incorporates scholarship from numerous disciplines including psychology political science behavioral science law economics public health family studies social work and many others The three volume Encyclopedia of Criminology presents the latest research as well as the traditional topics which reflect the field s multidisciplinary nature in a single authoritative reference work More than 525 alphabetically arranged entries by the leading authorities in the discipline comprise this definitive international resource The pivotal concepts measures theories and practices of the field are addressed with an emphasis on comparative criminology and criminal justice While the primary focus of the work is on American criminology and contemporary criminal justice in the United States extensive global coverage of other nations justice systems is included and the increasing international nature of crime is explored thoroughly Providing the most up to date scholarship in addition to the traditional theories on criminology the Encyclopedia of Criminology is the essential one stop reference for students and scholars alike to explore the broad expanse of this multidisciplinary field *The Logic of Legal Requirements* Jordi Ferrer Beltrán, Giovanni Battista Ratti, 2012-09-13 When a legal rule requires us to drive on the right notarize our wills or refrain from selling bootleg liquor how are we to describe and understand that requirement In particular how does the logical form of such a requirement

relate to the logical form of other requirements such as moral requirements or the requirements of logic itself When a general legal rule is applied or distinguished in a particular case how can we describe that process in logical form Such questions have come to preoccupy modern legal philosophy as its methodology drawing on the philosophy of logic becomes ever more sophisticated This collection gathers together some of the most prominent legal philosophers in the Anglo American and civil law traditions to analyse the logical structure of legal norms They focus on the issue of defeasibility which has become a central concern for both logicians and legal philosophers in recent years The book is divided into four parts The first section is devoted to unravelling the basic concepts related to legal defeasibility and the logical structure of legal norms focusing on the idea that law or its components are liable to implicit exceptions which cannot be specified before the law s application to particular cases Part two aims to disentangle the main relations between the issue of legal defeasibility and the issue of legal interpretation exploring the topic of defeasibility as a product of certain argumentative techniques in the law Section 3 of the volume is dedicated to one of the most problematic issues in the history of jurisprudence the connections between law and morality Finally section 4 of the volume is devoted to analysing the relationships between defeasibility and legal adjudication
