Structure And Impact Of Population Redistribution In New England:

The Structure and Impact of Population Redistribution in New England Thomas E. Steahr, A. E. Luloff, 1985
Northeast Regional Center for Rural Development Publication, 1986 *The Tourism Area Life Cycle* Richard Butler, 2006 Examining the tourism area life cycle TALC system in depth this book is divided into four sections the foundations of the TALC the TALC in heritage settings local involvement and the TALC and rejuvenation It subsequently concludes with a discussion on the TALC model in relation to sustainability

The Tourism Area Life Cycle: Conceptual and theoretical issues Richard Butler, 2006 This book is divided into five sections the conceptual origins of the TALC spatial relationships and the TALC alternative conceptual approaches renewing or retiring with the TALC and predicting with the TALC It concludes with a review of the future potential of the model in the area of the destination development process

Community And Forestry Robert G Lee, 2019-05-20 The contributors consider how social science perspectives can contribute to our understanding of communities and their conflicting choices regarding the allocation and use of forest agriculture and other natural resources The topics discussed include community stability community adjustment to economic and technological change and the public's role

Persistence and Change in Rural Communities A. E. Luloff, Richard S. Krannich, 2002-11-08 In the 1930s and 1940s the US Department of Agriculture undertook detailed studies of six US rural communities representing various patterns of social and economic change that were affecting rural America These studies became classics in the literature on rural communities and for the past half century have helped to develop major theoretical perspectives in community sociology Fifty years later the same study areas were revisited by a team of rural sociologists with the goal of assessing what changes have occurred and what community characteristics have persisted This book assesses these changes in rural life This volume is an important addition to the sociological literature on rural communities Willis Goudy *The Agricultural History Review* 2003

New Dimensions in Rural Policy, 1986 Forgotten Places Thomas A. Lyson, William W. Falk, 1993 *American Rural Communities* A.E. Luloff, 2019-04-08 This book is dedicated to the people of rural America whose struggle to make community meaningful provides important lessons It includes the contributors' prescription for the 1990s that calls for a renewal of action development and leadership on the part of local citizens and civic leaders

People, Places and Landscapes Richard S. Krannich, A. E. Luloff, Donald R. Field, 2011-05-30 This volume is a cogent empirical analysis of the interplay between a region's natural amenities and its socioeconomic evolution It focuses on the rural sectors of America's Intermountain West region which lies between the Cascades and Sierra Nevada mountains to the west and the Rocky Mountains to the east Coherently structured and meticulously detailed it adds much to our understanding of the ways an area's forests lakes mountains parkland and historic attractions affect residents' sense of well-being as well as the sociodemographic and economic changes they experience The book examines patterns of growth and change linked to the emergence of New West conditions assessing their implications for the wider community as well as

discussing the impact these trends could have on the consumption of natural resources It also points to ways in which communities and their development can be managed sustainably The tight geographical focus of this valuable resource ensures a depth of analysis which can be applied to similar regions worldwide Based on a large scale random sample survey of both full time and seasonal residents it provides a much needed overview of the macro level economic demographic and social transformations affecting rural communities in America As such the book has relevance for all researchers concerned with rural development the changes impacting rural landscapes and natural resource management **New England**

Landscape ,1989 **Rural Development Perspectives** ,1984 Population and Community in Rural America Lorraine Garkovich,1989-10-24 The American experience has been one of constant and accelerating change Against this background American cities have exerted a magnetic pull attracting streams of migration from rural to urban areas transforming a predominantly rural society into one in which 75 percent of the people live in urban areas Population and Community in Rural America focuses on migration as the primary force for population change in rural America Within smaller more dispersed rural populations any changes in the number of births or deaths or movement in or out of the area impact community and family structures In the last half century migration studies have been the single largest area of rural population research because the consequences of migration on both community population and socioeconomic structure are usually much greater than shifts in mortality and fertility Garkovich argues that migration streams exert a cohesive force binding American communities together and that such in out migrations have contributed to a national character based on intermingled rural and urban perspectives She presents a thorough investigation of the nature of migration and its effect on other population processes and characteristics and explains why particular patterns of migration and population change have occurred at certain points in the historical development of rural America The first two chapters describe various theoretical and methodological issues review major social economic and political events of the three historical eras of rural population change and consider the social environment within which the changes occurred Chapters three through six detail rural population changes including major migration streams and the factors and outcomes associated with or attributable to these movements Chapter seven analyses institutional forces that have effected both the study and interpretation of rural population change and offers provocative suggestions A final chapter summarizes major changes in rural America explains how migration continues to shape current rural populations and identifies critical issues for future migration research An important tool for students and scholars this volume will also be of particular interest to those readers studying population migration and rural communities The American Archivist ,1987 Includes sections Reviews of books and Abstracts of archive publications Western and Eastern Europe *Bibliography of Agriculture* ,1990 *International Handbook on Internal Migration* Charles B. Nam,William J. Serow,David F. Sly,1990-03-20 These 21 national case studies of internal migration were written especially for this unusual and useful volume The resulting blend of the general and the particular

especially when viewed across the 21 countries will be useful to a wide range of basic and applied social scientists Choice Social and economic change within countries can often be traced through the movement of population at the national level The abandonment or return to inner cities the volume of movement within and between rural and urban areas the movement of the elderly all of these factors and others combine to give us an important picture of national change The International Handbook on Internal Migration is a compilation of 21 case studies each focusing on a different country each written specifically for this book by an expert in the field Extensively illustrated with tables and figures the book will serve as an invaluable reference text It will also be of great interest to students of the social sciences especially sociology economics and geography Bibliography of Agriculture ,1992-12 **Subject Guide to Books in Print** ,1993 **Population Structures and Models** Robert Woods,Philip Rees,2023-10-02 Originally published in 1986 this volume brings together geographical modelling of population change and demographic analysis of population structures and pattern These 2 strands are interwoven in 3 key review chapters that summarize the study of spatial and temporal patterns of population the modelling of spatial populations and the estimation of population processes Findings reported include An account of demographic transition an expos of the myth of no fertility rises in the developing world in the 20th Century a theory of population accounting predicting migration flows for a system of regions microsimulation methods to model population change and demographic and economic processes integrated in an urban region model **Review of Regional Economic Research and Planning on New England** New England Economic Research Foundation,United States.
