in Mamluk Syro-Egypt, 648-741 A.H./1250-1340 C.E. Islamic Modern Michael G. Peletz, 2018-06-05 How do Islamic courts work What sorts of cultural understandings inform judicial process and litigants strategies How do women s claims fare Do these courts promote social tolerance And how do states use them to consolidate power build nations and shape a modern citizenry These are among the questions addressed in this book which not only enhances our understanding of diversity among and within the world s Muslim communities but also provides ethnographic historical and transnational perspectives on contemporary Islam in the shifting landscape of a strategically important region of the world Focusing on Malaysia which has sustained more rapid development than probably any other Muslim nation Michael Peletz explores the culture political economy and history of Islamic courts He demonstrates that they are centrally involved in the creation and policing of new Malay Muslim identities such as middle class urban dwellers that the state sees as the basis for a national polity that will be highly competitive He also shows how and why Islamic courts are key sites in struggles involving ethnic and religious groups social classes political parties and others with a major stake in defining Islam s role with respect to the maintenance of sovereignty and the achievement of modernity and civil society in an age of globalization Peletz deepens our knowledge of Islamic political development in a country very much concerned with forging an Islamic modernity viewed by its leaders as a viable alternative to Western style modernization

**Communicative Action** Axel Honneth, Hans Joas, 1991 These critical essays on Jürgen Habermas's major contribution to sociological theory *The Theory of Communicative Action* provide an indispensable guide for anyone trying to grasp that large difficult and important work The editors introduction traces the history of the reception of the work and identifies the main themes on which discussion has focused a concept of communicative rationality a theory of action based on distinguishing communicative from instrumental reason a two level concept of society that integrates lifeworld and system paradigms and a critical theory of modernity meant to diagnose the sociopathologies of contemporary society Contributors Jeffrey Alexander Johann P. Arnason Johannes Berger Ginter Dux Jürgen Habermas Hans Joas Hans Peter Krüger Thomas McCarthy Herbert Schnedelbach Martin Seel Charles Taylor *Emile Durkheim on Crime and Punishment (An Exegesis)* Seamus Breathnach, 2002 In civilised society the rising crime rate is a thing of terror Clever governments manipulate it the public messianically fear it and the social scientists misunderstand it In the face of such confusion Emile Durkheim reminds us that without a crime rate society is utterly impossible it cannot constitute itself maintain its solidarity or develop morally In short we cannot live with or without a crime rate This dissertation is an exegetical work and attempts to unpack the Criminology of Emile Durkheim It is divided into six chapters five of which are expository the sixth critical It begins with a look in overview at Durkheim's philosophy and how it underpins his theories of crime and punishment chap 1 By their nature theories of crime and punishment chap 2 presuppose the more primary theoretical formulations both of evolution and society chap 3 the one answering the theoretical time requirement the other the spatial requirement and each symbiotically related to the other in an integral theory of social evolution Durkheim's treatment of the modern State and the Conscience Collective as an organ of social control chap 4 is of primary importance not least because it underpins his treatment of the broader issues such as the connection between civil and criminal law morality and authority chap 5 Since there is hardly a serious Durkheimian proposition that is reducible to a provable or an uncontentious fact chap 6 it can hardly surprise us that on the one hand he attracted such copious criticism and on the other has remained perhaps the most popular sociologist of the twentieth and twenty first centuries *Talcott Parsons* Peter Hamilton, 1992 Talcott Parsons 1904-79 is widely regarded as one of the most important sociologists of the twentieth century These four volumes provide an essential guide to the thought and work of this major sociologist *Fathoming the Holocaust* Ronald J. Berger, *Fathoming the Holocaust* represents the culmination of a singular effort to attempt to explain the Final Solution to the Jewish Problem in terms of a general theory of social problems construction The book is comprehensive in scope covering the origins and emergence of the Final Solution wartime reaction to it and the postwar memory of the genocide It does so within the framework of a social problems construction a perspective that treats social problems not as a condition but as an activity that identifies and defines problems persuades others that something must be done about them and generates practical programs of remedial action Berger holds that social problems have a natural history that is they evolve through a sequence of stages that entail the development and unfolding of claims

about problems and the formulation and implementation of solutions Fathoming the Holocaust is therefore a book that aims to advance sociological understanding of the Holocaust not simply to describe its history but to examine its social construction that is to understand it as a consequence of concerted human activity In doing so Berger hopes to encourage the teaching of the Holocaust in the social scientific curricula of higher education In contrast to the extensive historical literature on the Holocaust Berger offers a distinctly sociological approach that examines how the Holocaust was constructed first as a social policy designed by the Nazis implemented by functionaries and resisted by its victims and opponents later as several varying layers of historical memory The scope of this book extends from the prewar through the contemporary periods focusing on the societal issues governing the interpreting of these events in Israel the German Federal Republic and the United States Berger's is a text with both large general interest and essential material for courses in social problems European history and Jewish studies Ronald J Berger professor of sociology at the University of Wisconsin Whitewater has previously published six books and numerous articles and book chapters His earlier book on the Holocaust was a sociological account of his father and uncle's survival experiences

**Max Weber's Politics of Civil Society** Sung Ho Kim, 2004-06-07 This book is an in depth interpretation of Max Weber as a political theorist of civil society On the one hand it reads Weber's ideas from the perspective of modern political thought rather than the modern social sciences on the other it offers a liberal assessment of this complex political thinker without attempting to apologize for his shortcomings Through an alternative reading of Weber's religious epistemological and political writings the book shows Weber's concern with public citizenship in a modern mass democracy and civil society as its cultivating ground Kim argues Weber's political thought thus recast was deeply informed by Kant Hegel Nietzsche and other German political thinkers and also reveals an affinity to the liberal republican tradition best represented by Mill and Tocqueville Kim has effectively resuscitated Weber as a political thinker for our time in which civic virtues and civil society have once again become one of the dominant issues

**Durkheim's Philosophy Lectures** Emile Durkheim,2004-07-19 Moving back and forth between the history of philosophy and the contributions of philosophers in his own day Durkheim takes up topics as diverse as philosophical psychology logic ethics and metaphysics and seeks to articulate a unified philosophical position Remarkably in these lectures given more than a decade before the publication of his groundbreaking book The Division of Labour in Society 1893 the social realism that is so characteristic of his later work where he insists famously that social facts cannot be reduced to psychological or economic ones and that such facts constrain human action in important ways is totally absent in these early lectures For this reason they will be of special interest to students of the history of the social sciences for they shed important light on the course of Durkheim s intellectual development
