## Structure Of Justification:

**The Structure of Justification** Robert Audi,1993-10-29 This collection of papers transcends two of the most widely misunderstood positions in philosophy foundationalism and coherentism Constructing the World David J.

Chalmers,2012-10-04 David J Chalmers constructs a highly ambitious and original picture of the world from a few basic elements He returns to Rudolf Carnap s attempt to do the same and adopts the idea of scrutability according to which reasoning from a limited class of basic truths yields all truths about the world to address central themes in philosophy

**Personal Epistemology in the Classroom** Lisa D. Bendixen,Florian C. Feucht,2010-01-28 This book presents theoretical and empirical work pertaining to personal epistemology in the classroom and consider its broader educational implications **Interior, Environment, and Related Agencies Appropriations for 2015: Justification of the budget**

**estimates: National Park Service; U.S. Geological Survey** United States. Congress. House. Committee on Appropriations. Subcommittee on Interior, Environment, and Related Agencies,2014 **The Rationality of Perception**

Susanna Siegel,2016-12-22 On a traditional conception of the human mind reasoning can be rational or irrational but perception cannot Perception is simply a source of new information and cannot be assessed for rationality or justification Susanna Siegel argues that this conception is wrong Drawing on examples involving racism emotion self defense law and scientific theories The Rationality of Perception makes the case that perception itself can be rational or irrational The Rationality of Perception argues that reasoning and perception are often deeply intertwined When unjustified beliefs fears desires or prejudices influence what we perceive we face a philosophical problem is it reasonable to strengthen what one believes fears or suspects on the basis of an experience that was generated unbeknownst to the perceiver by those very same beliefs fears or suspicions Siegel argues that it is not reasonable even though it may seem that way to the perceiver In these cases a perceptual experience may itself be irrational because it is brought about by irrational influences Siegel systematically distinguishes a number of different kinds of influences on perception and builds a theory of how such influences on perception determine what it s rational or irrational to believe She uses the main conclusions to analyze perceptual manifestations of racism This book makes vivid the far reaching consequences of psychological and cultural influences on perception Its method shows how analytic philosophy social psychology history and politics can be mutually illuminating *Historic Structure Report* Louis Torres,Curtis Lester,1978 Justifying the Dependability of

Computer-based Systems Pierre-Jacques Courtois,2008-08-17 Safety is a paradoxical system property It remains immaterial intangible and invisible until a failure an accident or a catastrophe occurs and too late reveals its absence And yet a system cannot be relied upon unless its safety can be explained demonstrated and certified The practical and difficult questions which motivate this study concern the evidence and the arguments needed to justify the safety of a computer based system or more generally its dependability Dependability is a broad concept integrating properties such as safety reliability

availability maintainability and other related characteristics of the behaviour of a system in operation How can we give the users the assurance that the system enjoys the required dependability How should evidence be presented to certification bodies or regulatory authorities What best practices should be applied How should we decide whether there is enough evidence to justify the release of the system To help answer these daunting questions a method and a framework are proposed for the justification of the dependability of a computer based system The approach specifically aims at dealing with the difficulties raised by the validation of software Hence it should be of wide applicability despite being mainly based on the experience of assessing Nuclear Power Plant instrumentation and control systems important to safety To be viable a method must rest on a sound theoretical background

Hegelian Metaphysics Robert Stern, 2009-05-07 Hegel's Metaphysics is a series of essays analysing the metaphysical ideas and influence of the great German philosopher G W F Hegel 1770 1831 Robert Stern traces the way those ideas were taken up and criticised by the British Idealists and American Pragmatists and by more contemporary continental philosophers

**Case and Gender** Willem Andries Helden, 1993 The cybernetic dream which pervades Soviet bureaucracy after Stalin produced a relatively liberal and generous science policy In linguistics the new spirit gave rise to a variety of trends professing to practise structural mathematical or applied linguistics and promising practical applications in natural language processing The trends originating in the sixties comprise the so called Set theoretical School In 1957 the mathematician Kolmogorov confronted the participants of a seminar on mathematical linguistics with a few pilot questions such as what exactly do we mean when we say that two words are in the same case The rigorous answers which the Set theoretical School worked out for Kolmogorov's questions turned out to have far reaching implications for linguistic theory Case and Gender examines both the contextual and the internal development of the Set theoretical School The rise and decline of the School can be ascribed to Soviet humanities policy while the specifics of its linguistic development can be attributed to the non linguistic backgrounds and applied goals of its first exponents The two volumes contain a systematic account of the networks of definitions models proposed by the School and provide a metamodel which facilitates providing a consistent formalization of the models and uncovering their implicit assumptions on the properties of language The metamodel also enables an orderly comparison of the models with one another and with terminological systems developed elsewhere Moreover the models are evaluated amended and confronted with linguistic material from various languages The later chapters are concluded with more far reaching proposals Kolmogorov's questions must be taken seriously The turn toward a semantics orientated approach which is evident in the last stage of the development of the Set theoretical School must be pursued New definitions of case and gender are proposed in accordance with the new approach Case and Gender contains not only an analytical survey of the complete scientific output of the Set theoretical School on morphology and syntax but also a confrontation with contemporary western theories It shows the viability of a tradition which was abandoned as a result of political developments The long chapter on the history of the

relationship between linguistics and politics in the Soviet Union contains new material on the 1950 linguistic discussion in Pravda which was decided by Stalin's contribution and whose impact would last for decades to come     Evolution As Entropy Daniel R. Brooks, E. O. Wiley, 1988-10-15 This second edition in just two years offers a considerably revised second chapter in which information behavior replaces analogies to purely physical systems as well as practical applications of the authors theory Attention is also given to a hierarchical theory of ecosystem behavior taking note of constraints on local ecosystem members result     Energy and Water, and Related Agencies Appropriations for Fiscal Year 2007: Justifications: Dept. of the Army, Corps of Engineers United States. Congress. Senate. Committee on Appropriations. Subcommittee on Energy and Water, and Related Agencies, 2006     **Practical Contexts** Matjaž Potrc, Vojko Strahovnik, 2013-05-02 The thought and the findings of moral particularism are extended to contextualism Moral particularism asserts that reasons for moral actions are not governed by general principles but by a mixture of situation bound deliberation and values Particularism was established in the area of moral philosophy and its main results include delimitation with various forms of moral generalism Many insights were accumulated along the way The book claims that a serious contextualist approach needs to embrace particularist normativity Thesis is then applied to the traditional areas of philosophy such as semantics epistemology and ontology This makes it possible to ask questions about the positive and not just negative story and about the wider impact of particularism The book is an attempt of such a positive story Foundations are laid for an exciting new field of research in the main systematic branches of philosophy urging you to rethink the normative basis of semantics epistemology and metaphysics in their interweaving with moral thought The importance of narration and of phenomenology is stressed for these areas     **'Discovery' in Legal Decision-Making** B. Anderson, 2013-03-14 This book deals with a central problem throughout the legal profession a solution to the problem is sought and reached in some basic form At the centre of this problematic is the question indicated by the title What is the nature of discovery in legal decision making In the final chapter that problem and the solution reached will be seen to have ramifications throughout the entire field of legal practice and theory However the focus of the argument is maintained first to specify adequately the particular manifestation of the problem in a variety of legal fields and secondly to arrive at a precise basic solution to this range of problems The presentation of the solution is not dictated by the norms of clarity and coherence but by the dynamics of the struggle to reach the solution and by aspects of the problem available to various sub groups within the legal profession theorists judges arbitrators So I begin from a relatively familiar zone discussions of discovery in legal theory before moving to more unfamiliar territory This book is not a thorough survey of problems and writings on discovery Rather the strategic selection of problems and assessment of solutions across the first four chapters represents four aspects of the problem Those chapters invite the reader to rise to the sense of occurrence of a single problem in a variety of contexts     The Structure and Grounding of Epistemic Justification William A. Roche, 2006 Abstract I articulate and defend a new version of the coherence

theory of epistemic justification It is new in part because unlike traditional varieties of coherentism it is externalist viz it implies that justification supervenes in part on things that are neither mental nor supervenient on the mental The theory overall has three distinguishing components First there is an explanationist component which says that an inductive inferential relation is cogent only if it is explanatorily virtuous In this respect my account is in the spirit of both William Lycan's brand of coherentism and the brand oft attributed to Gilbert Harman and Wilfrid Sellars Second there is a meta-perspectivalist component saying for starters that S has good reason for thinking that p obtains only if from S's perspective it is likely that he is connected to p This when fully spelled out has the result that S's belief system is coherent only if S has a view as to how he is connected to the outside world and according to which the mechanisms involved e.g. vision are reliable And third there is a veridicality component which requires that S's reasons be true and that S's reasons for his reasons be true and so on This together with the meta-perspectivalist component requires that S be correct as to how he is reliably connected to the outside world This is what makes my position externalist I develop and argue positively for each of these three distinguishing components thereby refuting my theory's chief rivals in the coherentist camp I also argue against the three standard objections to coherentism the Alternative Systems Objection the Isolation Objection and the Experience Objection Take the Experience Objection for instance It charges that foundationalist theories are superior to coherentist theories because unlike coherentist theories they allow a role for experiences e.g. visual experiences in justification I argue that initial appearances notwithstanding experiences are unfit to serve as reasons either for or against beliefs The ultimate payoff is philosophical understanding of the structure and grounding of justification an understanding that is that justification is coherentist in structure and externalist in grounding

### **Legitimation and Delegitimation in Global Governance** Magdalena Bexell, Kristina Jönsson, Anders Uhlin, 2022-11-07

This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations The legitimacy of global governance institutions is both contested and defended in contemporary global politics Legitimation and Delegitimation in Global Governance explores processes of legitimation and delegitimation of such institutions How why and with what impact on audiences are global governance institutions legitimated and delegitimated The book develops a comprehensive theoretical framework for studying processes of de-legitimation in governance beyond the state It provides broad comparative analyses to uncover previously unexplored patterns of de-legitimation processes A diverse set of global

and regional governmental and nongovernmental institutions in different policy fields are included Variation across these institutions is explained with reference to institutional set up policy field characteristics and broader social structures as well as to the qualities of agents of de legitimization The approach builds on a mixed methods research design that uses quantitative and qualitative new empirical data Three main interlinked elements of processes of legitimation and delegitimation are at the center of the analysis the varied practices employed by different agents that may boost or challenge the legitimacy of institutions the normative justifications that these agents draw on when engaging in legitimation and delegitimation practices and the different audiences that may be impacted by legitimation and delegitimation This results in a dynamic interplay between legitimation and delegitimation in contestation over the legitimacy of GGIs

*Perspectives on Scientific Argumentation* Myint Swe Khine, 2011-09-30 Argumentation arriving at conclusions on a topic through a process of logical reasoning that includes debate and persuasion has in recent years emerged as a central topic of discussion among science educators and researchers There is now a firm and general belief that fostering argumentation in learning activities can develop students critical thinking and reasoning skills and that dialogic and collaborative inquiries are key precursors to an engagement in scientific argumentation It is also reckoned that argumentation helps students assimilate knowledge and generate complex meaning The consensus among educators is that involving students in scientific argumentation must play a critical role in the education process itself Recent analysis of research trends in science education indicates that argumentation is now the most prevalent research topic in the literature This book attempts to consolidate contemporary thinking and research on the role of scientific argumentation in education *Perspectives on Scientific Argumentation* brings together prominent scholars in the field to share the sum of their knowledge about the place of scientific argumentation in teaching and learning Chapters explore scientific argumentation as a means of addressing and solving problems in conceptual change reasoning knowledge building and the promotion of scientific literacy Others interrogate topics such as the importance of language discursive practice social interactions and culture in the classroom The material in this book which features intervention studies discourse analyses classroom based experiments anthropological observations and design based research will inform theoretical frameworks and changing pedagogical practices as well as encourage new avenues of research
