Structure Sentiment:

Status, Network, and Structure Jacek Szmataka, John Skvoretz, Joseph Berger, 1997 This book challenges much that has been written about the decline of sociology as a vital essential area of inquiry into the human condition Against this Greek chorus of woe these papers show by example that sociology can make progress select significant problems and cumulate an integrated and coherent set of findings and theoretical understandings Although the twenty papers in the book engage a wide variety of issues they are united by their adherence to one of the most active and successful traditions in sociology the group process tradition Group process research programs can examine tractable problems posed by social psychological phenomena for which sociology has the best methods of study they have the potential for a hardware based technological research front that discovers new phenomena and they come closest of all approaches in sociological research to using cognitive criteria in the choice of problems and to studying immutable phenomena The overall aim of the book is to provide models for researchers struggling to develop construct and integrate coherent sociological theory and knowledge The papers are grouped around three themes 1 the problem of theory construction in sociology including what is meant by theory and the methods of testing it particularly empirical testing 2 the extension and elaboration of existing theories of group processes notably in the study of status sentiment and the comparison process and 3 the theoretical issues at the intersection of social structures the pattern of connection in social networks and the process of rational choice **The Structure of Sentiments**

Letting the People Decide Richard Johnston, 1992 Combining existing scholarly literature historical data theoretical breadth analytic innovation and most important their own rich and extensive survey data the authors come to three main conclusions The first is that the events of a campaign do have an impact on the final vote Journalists and candidates take this as a fundamental premise but until recently few political scientists concurred Campaigns it has long been argued at most reminded voters about fundamental issues such as the economy and voters long term predispositions Second the authors assert that history sets the stage for campaigns and constrains their possibilities Some constraints are shown to be more binding than others and some historical periods to impose more constraints than others This analysis leads to the construction of a general theory of campaigns one that can predict when campaigns will and will not be important Third the authors conclude that campaigns can do more than determine which party will hold power they can also be the occasion for a fundamental realignment The authors support this view by reference both to their research results and to basic theories of social choice
