The Structure of Canadian History John L. Finlay, 2006 **Britain and the Origins of Canadian Confederation, 1837-67** Ged Martin, 2011-11-01 In explaining why the British North American provinces united in 1867 historians have tended to see Confederation as a logical response to the internal and external challenges of the 1860s With some ambiguity they have also attributed a major role to the British imperial factor in forcing the Maritime provinces to accept their predestined place in the Canadian nation In *Britain and the Origins of Canadian Confederation 1837 1867* Ged Martin offers a sceptical review of claims that Confederation answered all the problems facing the provinces and examines in detail British perceptions of Canada and ideas about its future The major British contribution to the coming of Confederation is to be found not in the aftermath of the Quebec conference where the imperial role was mainly one of bluff and exhortation but prior to 1864 in a vague consensus among opinion formers that the provinces would one day unite Faced with an inescapable need to secure legislation at Westminster for a new political structure British North American politicians found they could work within the context of a metropolitan preference for intercolonial union **Canadian Social Structure** John

Porter, 1967-01-01 As well as statistical tables the author has provided a fascinating introduction to the problem of working with statistics and a detailed commentary on the selection of the tables **Remaking North American Sovereignty** Jewel L. Spangler, Frank Towers, 2021-05-20 This essay collection presents a transnational history of mid nineteenth century North America a time of crisis that forged the continent's political dynamics North America took its political shape in the crisis of the 1860s marked by Canadian Confederation the US Civil War the restoration of the Mexican Republic and numerous wars and treaty regimes conducted between these states and indigenous peoples This crisis wove together the three nation states of modern North America from a patchwork of contested polities *Remaking North American Sovereignty* brings together distinguished experts on the histories of Canada indigenous peoples Mexico and the United States to re evaluate this era of political transformation in light of the global turn in nineteenth century historiography They uncover the continental dimensions of the 1860s crisis that have been obscured by historical traditions that confine these conflicts within a national framework **Media, Structures, and Power** Robert E. Babe, 2011-01-01 *Media Structures and Power* provides a sense of

Babe's trajectory of thought over several decades as well as his key role in the development of the communications field in Canada Kevin Dowler Department of Communication Studies York University

The New World and the New World Order K.R. Dark, A. Harris, 1996-11-04 This book re-examines the character of the USA and re-evaluates its relationship to the post Cold War international order The USA has often been seen as a model of democratic liberty a vehement opponent of colonialism and the lone superpower of the post Cold War world This book challenges all these views Unlike previous studies of the post Cold War role of the USA it connects US domestic affairs to systemic changes often characterized entirely in terms of the fall of Communism

Eating the Ocean Brian Payne, 2022-12-02 During the first half of the twentieth century Canadian fisheries regularly produced more fish than markets could absorb driving down profits and wages To address this both industry and government sought to stimulate domestic consumption via increased advertising In *Eating the Ocean* Brian Payne explores how government funded marketing called upon Canadian housewives to prepare more seafood meals to improve family health and aid an industry central to Canadian identity and heritage The goal was first to make seafood a central element of a wholesome diet as a solution to a perceived nutritional crisis and second to aid industry recovery and growth while decreasing Canadian fisheries dependency on foreign markets But fishery managers and policymakers fundamentally miscalculated consumer demand wrongly assuming that Canadians could and would eat more seafood Fisheries continued to extract more fish than the environment and the market could sustain and the collapse of the nation's fisheries that we are now seeing has as much to do with failed assessments of market demand as it does with faulty extraction practices Using internal communications between industry leaders and Ottawa bureaucrats as well as advertising and promotional material published in the nation's leading magazines national and local newspapers and radio programming *Eating the Ocean* traces the flawed understanding of not only supply but demand a

misguided gamble that caused fisheries to become the most mismanaged resource economy in early twentieth century Canada
