

How would our planet Earth feel like without the non-metals? The answer is obvious: life, not even rocks and sand! Non-metal compounds play a crucial role in our daily life, in the environment and in industry as shown by this modern textbook written by experts in the field. *Chemistry of the Non-Metals* is the updated English version of a well-established German textbook. It describes the preparation, properties, structures and applications of the 17 nonmetally elements and their most important and interesting compounds. In addition, the bonding in these molecules is discussed consistently using current theories to calculate the corresponding physical properties and chemical reactions.

- Thoroughly updated and revised edition
- Organized according to the Periodic Table of the Elements
- Extensive chapters on molecular structure and bonding
- Consistent IUPAC references in the current literature for further reading
