*Non-Life Insurance-Linked Securities: Risk and Pricing Analysis* Thomas Nowak, 2014-09-25 Unter Insurance Linked Securities ILS versteht man innovative Finanzprodukte welche Versicherungsrisiken aus den eng abgegrenzten Märkten der Erst- und Rückversicherungswirtschaft herauslösen und mittels Verbriefung auf Kapitalmärkten handelbar machen Durch ILS erhalten Investoren die Möglichkeit für die Bereitstellung von Deckungskapital in Versicherungsrisiken zu investieren und im Gegenzug eine Versicherungsprämie zu erhalten Hierbei verfolgt das Werk zwei Ziele Zum Einen die Durchführung einer genauen Analyse der zugrunde liegenden Zahlungsstruktur der beworbenen Eigenschaften und jener Risiken welche mit einer Investition in ILS verbunden sind Zum Anderen die Überprüfung der Anwendbarkeit und Passgenauigkeit vorgeschlagener versicherungsmathematischer und

marktorientierter Bewertungsverfahren für ILS sowie die Unterbreitung möglicher Vorschläge für Bewertungsverfahren. Da ILS regelmäßig dazu verwendet werden, Extremrisiken zu verbriefen, werden beide Untersuchungen unter expliziter Berücksichtigung der statistischen Eigenschaften von Extremrisiken durchgeführt. Im Ergebnis lässt sich festhalten, dass ILS Investitionen mit eigenen Spezifika darstellen. Investoren sollten diese kennen und berücksichtigen. Dies gilt gerade vor dem Hintergrund der stetig steigenden Zahl von ILS, welche insbesondere in den Zeiten der Niedrigzinsphase als attraktives Investment gesehen werden. Das Buch richtet sich an Investoren und Interessierte, die sich über ILS als Investitionen und deren Bewertung informieren möchten.

Introduction To Derivative Securities, Financial Markets, And Risk Management, An (Third Edition) Robert A Jarrow, Arkadev Chatterjea, 2024-05-03. The third edition updates the text in two significant ways. First, it updates the presentation to reflect changes that have occurred in financial markets since the publication of the 2nd edition. One such change is with respect to the over-the-counter interest rate derivatives markets and the abolishment of LIBOR as a reference rate. Second, it updates the theory to reflect new research related to asset price bubbles and the valuation of options. Asset price bubbles are a reality in financial markets, and their impact on derivative pricing is essential to understand. This is the only introductory textbook that contains these insights on asset price bubbles and options.

Reinsurance Hansjörg Albrecher, Jan Beirlant, Jozef L. Teugels, 2017-11-06. Reinsurance: Actuarial and Statistical Aspects provides a survey of both the academic literature in the field as well as challenges appearing in reinsurance practice and puts the two in perspective. The book is written for researchers with an interest in reinsurance problems for graduate students with a basic knowledge of probability and statistics as well as for reinsurance practitioners. The focus of the book is on modelling together with the statistical challenges that go along with it. The discussed statistical approaches are illustrated alongside six case studies of insurance loss data sets ranging from MTPL over fire to storm and flood loss data. Some of the presented material also contains new results that have not yet been published in the research literature. An extensive bibliography provides readers with links for further study.

Life Settlements and Longevity Structures Geoff Chaplin, Jim Aspinwall, Mark Venn, 2009-08-03. Recent turbulence in the financial markets has highlighted the need for diversified portfolios with lower correlations between the different investments. Life settlements meet this need, offering investors the prospect of high, stable returns uncorrelated with the broader financial markets. This book provides readers of all levels of experience with essential information on the process surrounding the acquisition and management of a portfolio of life settlements, the assessment, modelling, and mitigation of the associated longevity, interest rate, and credit risks, and practical approaches to financing and risk management structures. It begins with the history of life insurance and looks at how the need for new financing sources has led to the growth of the life settlements market in the United States. The authors provide a detailed exploration of the mathematical formulae surrounding the generation of mortality curves, drawing a parallel between the tools deployed in the credit derivatives market and those available to model longevity risk. Structured products

and securitisation techniques are introduced and explained starting with simple vanilla products and models before illustrating some of the investment structures associated with life settlements Capital market mechanisms available to assist the investor in limiting the risks associated with life settlement portfolios are outlined as are opportunities to use life settlement portfolios to mitigate the risks of traditional capital markets The last section of the book covers derivative products either available now or under consideration that will reduce or potentially eliminate longevity risks within life settlement portfolios It then reviews hedging and risk management strategies and considers how to measure the effectiveness of risk mitigation

**The Ethics of Banking** Peter Koslowski, 2011-04-20 The Ethics of Banking analyzes the systemic and the ethical mistakes that led to the crisis It keeps the middle ground between excusing all failures by the argument of a systemic crisis not to be taken responsibility for by the financial managers

and the moralistic reproach that only moral failure is at the origin of the crisis It investigates the role of speculation in the formation of the crisis and distinguishes between productive speculation for hedging and for securing market liquidity on the one hand and unproductive and even detrimental hyper speculation going far beyond of the degree of speculation that is necessary in a developed economy for the liquidity of financial markets on the other hand Hyper speculation has increased the risks of the financial system and is still doing so
