Treasury. Central Computer and Telecommunications Agency,Great Britain. Central Office of Information,1989 **User-Centred Requirements Engineering** Alistair Sutcliffe,2012-12-06 If you have picked up this book and are browsing the Preface you may well be asking yourselfWhat makes this book different from the large number I can find on amazon com Well the answer

is a blend of the academic and the practical and views of the subject you won't get from anybody else how psychology and linguistics influence the field of requirements engineering RE The title might seem to be a bit of a conundrum after all surely requirements come from people so all requirements should be user centred Sadly that is not always so many system disasters have been caused simply because requirements engineering was not user centred or worse still was not practised at all So this book is about putting the people back into computing although not simply from the HCI human computer interaction sense instead the focus is on how to understand what people want and then build appropriate computer systems
