Dominant Elites in Latin America Liisa L. North,Timothy D. Clark,2017-08-18 This volume examines the ways in which the socio economic elites of the region have transformed and expanded the material bases of their power from the inception of neo liberal policies in the 1970s through to the so called progressive pink tide governments of the past two decades The six case study chapters on Chile Brazil Ecuador Colombia El Salvador and Guatemala variously explore how state policies and even United Nations peace keeping missions have enhanced elite control of land and agricultural exports banks and insurance companies wholesale and import commerce industrial activities and alliances with foreign capital Chapters also pay attention to the ways in which violence has been deployed to maintain elite power and how international forces feed into sustaining historic and contemporary configurations

of power **Unseasonal Migrations** Jane Lou Collins, 2017-03-14 Jane Collins explores a phenomenon of growing importance in developing nations the labor scarcity that emerges as farmers in Latin America and elsewhere are forced by economic necessity to seek seasonal work away from their home communities Such labor scarcity often results in unseasonal ecological damage and the deterioration of social relations Professor Collins focuses on a particular instance in which migration has created labor scarcity the seasonal journeys of Aymara speaking highland peasants to east Andean valleys where they grow coffee Contrary to the conventional wisdom that labor is an abundant resource in developing countries the Aymara s situation illustrates a problem common throughout the Third World Although it was presumed in the 1940s and 1950s that the Aymara would permanently colonize the valley region they have not done so This book demonstrates that the unfavorable price for which they must sell their coffee forces them to maintain highland food crop production Their poor position in the coffee market thus blocks their permanent migration and their ability to make more intensive capital or labor investments in coffee growing The author argues convincingly that the rural labor scarcity produced by their migrations generates ecological decline in the lowlands and intracommunity conflicts and declining networks of production in the highlands In discussing the Aymara she confronts a Third World problem of broad theoretical significance Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Human Nature and Biocultural Evolution** Joseph

Lopreato, 2024-12-02 First published in 1984 Human Nature and Biocultural Evolution aims to delineate a theory of human nature viewed as an interrelated set of genetically programmed behavioral predispositions and a theory of biocultural evolution The author s approach is based on the hypothesis that innate predispositions and cultural environmental factors cooperate to determine human behavior and socio cultural forms Professor Lopreato begins by tracing the development of evolutionary biology up to sociobiology It is his argument that the social and biological disciplines have for over a century been moving towards a synthesis and that Homo sapiens is neither just another animal nor so unique a being that culture has become divorced from its genetic underpinnings The argument is supported with evidence from evolutionary biology and social science with a critical discussion of basic issues of behavioral science and with an analysis of certain famous theories in social science e g theories of suicide anomie capitalism which prove to be richer and more complete when viewed from a biocultural perspective The theory of human nature is arrived at through a rich analysis of ethnographic psychological and sociological arguments and data as well as facts and theories from comparative zoology In the process the author treats critically numerous theoretical problems associated with topics such as exploitation class consciousness structured inequality

reciprocal behavior territorial aggression religious ritual socialization ethnicity and prejudice The author concludes with an examination of behavioral predispositions that are hypothesized to be at the base of cultural variation **Whitaker's Cumulative Book List** ,1981 Land, Power, And Poverty Charles D. Brockett,2019-03-04 This book Land Power and Poverty explores the development of the rigid and unequal structures of rural Central American society and the role in the conflicts of five governments of the region Guatemala Costa Rica Honduras El Salvador and Nicaragua
