**Structuring Sense: Volume 2: The Normal Course of Events** Hagit Borer, 2005-01-21 Structuring Sense explores the difference between words however defined and structures however constructed It sets out to demonstrate over three volumes of which this is the second that the explanation of linguistic competence should be shifted from lexical entry to syntactic structure from memory of words to manipulation of rules Its reformulation of how grammar and lexicon interact has profound implications for linguistic philosophical and psychological theories about human mind and language Hagit Borer departs from both language specific constructional approaches and lexicalist approaches to argue that universal hierarchical structures determine interpretation and that language variation emerges from the morphological and phonological properties of inflectional material The Normal Course of Events applies this radical approach to event structure Integrating research results in syntax semantics and morphology the author shows that argument structure is based on the syntactic realization of semantic event units The topics she addresses include the structure of internal arguments and of telic and atelic interpretations accusative and partitive case perfective and imperfective marking the unaccusative unergative distinction existential interpretation and post verbal subjects and resultative constructions The languages discussed include English Catalan Finnish Hebrew Czech Polish Russian and Spanish

The Oxford Handbook of Event Structure Robert Truswell, 2019-03-26 This handbook deals with research into the nature of events and how we use language to describe events The study of event structure over the past 60 years has been one of the most successful areas of lexical semantics uniting insights from morphology and syntax lexical and

compositional semantics cognitive science and artificial intelligence to develop insightful theories of events and event descriptions This volume provides accessible introductions to major topics and ongoing debates in event structure research exploring what events are how we perceive them how we reason with them and the role they play in the organization of grammar and discourse The chapters are divided into four parts the first covers metaphysical issues related to events the second is concerned with the relationship between event structure and grammar the third is a series of crosslinguistic case studies and the fourth deals with links to cognitive science and artificial intelligence more broadly The book is strongly interdisciplinary in nature with insights from linguistics philosophy psychology cognitive science and computer science and will appeal to a wide range of researchers and students from advanced undergraduate level upwards **Argument**

**Structure in Flux** Elly van Gelderen,Jóhanna Barðdal,Michela Cennamo,2013-06-15 The present volume is centered around five linguistic themes argument structure and encoding strategies argument structure and verb classes unexpressed arguments split intransitivity and existential and presentational constructions The articles also cover a variety of typologically different languages and they offer new data from under researched languages on the issues of event and argument structure In some cases novel perspectives from widely discussed languages on highly debated topics are offered also addressing more theoretical aspects concerning the predictability and derivation of linking Several contributions apply current models of the lexicon syntax interface to synchronic data Other contributions focus on diachrony and are based on extensive use of corpora Yet others although empirically and theoretically grounded privilege a methodological discussion presenting analyses based on thorough and long standing fieldwork *Encoding Events* Xuhui Hu,2018-09-04 This volume presents theoretical and empirical research on the syntax of events within the broader framework of generative grammar focusing on the central question of how conceptual meaning interacts with narrow syntactic computation Xuhui Hu proposes a set of integration conditions that require the content of the predicate to be licensed by theta role information generated by narrow syntax The other principal theoretical component of the book concerns the functional structure of events which is related to issues such as the parallel between the event and nominal domains the mapping of a predicate onto an entity and the grammatical foundation of verb classification The framework is applied to three areas the syntax of resultatives in English and Chinese cross linguistic and diachronic variation in resultatives and applicative constructions The findings shed light on the thematic relationship between core arguments and predicates and on the syntax of non core arguments contribute to the theory of parametric variation in the generative tradition and provide insights into the verb framed vs satellite framed typology **Syntax - Theory and Analysis. Volume 2** Tibor Kiss,Artemis Alexiadou,2015-02-24 This Handbook represents the development of research and the current level of knowledge in the fields of syntactic theory and syntax analysis Syntax can look back to a long tradition Especially in the last 50 years however the interaction between syntactic theory and syntactic analysis has led to a rapid increase in analyses and theoretical suggestions This second edition

of the Handbook on Syntax adopts a unifying perspective and therefore does not place the division of syntactic theory into several schools to the fore but the increase in knowledge resulting from the fruitful argumentations between syntactic analysis and syntactic theory It uses selected phenomena of individual languages and their cross linguistic realizations to explain what syntactic analyses can do and at the same time to show in what respects syntactic theories differ from each other It investigates how syntax is related to neighbouring disciplines and investigate the role of the interfaces especially the relationship between syntax and phonology morphology compositional semantics pragmatics and the lexicon The phenomena chosen bring together renowned experts in syntax and represent the consensus reached as to what has to be considered as an important as well as illustrative syntactic phenomenon The phenomena discuss do not only serve to show syntactic analyses but also to compare theoretical approaches with each other

**Africa's Endangered Languages** Jason Kandybowicz, Harold Torrence, 2017 This book examines the endangered languages of Africa from both documentary and theoretical perspectives highlighting the threats of extinction many of them face and the challenges and implications each bring to bear on linguistic theory It focuses on the symbiosis between documentary and theoretical methodologies and its consequences for the preservation of endangered languages both in the African context and more broadly

*Stative Inquiries* Alfredo García-Pardo, 2020-11-15 This monograph studies stative predicates from a neo constructionist perspective and integrates them in a comprehensive theory of event and argument structure It focuses on two sets of stative verbs govern type verbs and object experiencer psychological verbs For govern verbs it shows how notions such as causativity and resultativity can also be ingredients of stative predicates and be derived syntactically The consequences of this proposal are further pursued in a crosslinguistic investigation of adjectival passives which are stative predicates of sorts For object experiencer psychological verbs it is shown that their Experiencer theta role can and should be derived as an aspectual entailment mediated by prepositional structure In defending this view this monograph reveals a syntactic parallelism between location verbs and object experiencer psychological verbs in many languages that has hitherto gone unnoticed This book will primarily appeal to researchers interested in lexical aspect and its connection to morphosyntax

The Morphosyntax of Transitions Víctor Acedo-Matellán, 2016 This book examines the cross linguistic expression of changes of location or state taking as a starting point Talmy's typological generalization that classifies languages as either satellite framed or verb framed In verb framed languages such as those of the Romance family the information about the predicate is encoded by the verb Satellite framed languages on the other hand can be further subdivided into weak satellite framed languages in which the information is expressed by a prefix on the verb and strong satellite framed languages in which it is expressed by a preposition In this volume Víctor Acedo Matellán explores the similarities between Latin and Slavic in their expression of events of transition neither allows the expression of complex

adjectival resultative constructions and both express the result state or location of a complex transition through prefixes. They are therefore analysed as weak satellite framed languages along with Ancient Greek and some varieties of Mandarin Chinese and stand in contrast to strong satellite framed languages such as English, the Germanic languages in general and Finno-Ugric. This variation is explained in terms of the morphological properties of the head expressing transition. Path, which is argued to be prefixal in weak but not in strong satellite framed languages. On the other hand, in verb framed languages like Romance, Path is strictly adjacent to the eventive head *v*. The analysis is couched in a neo-constructionist approach to argument structure which accounts for the verbal elasticity shown by Latin and a Distributed Morphology approach to the syntax-morphology interface.

*Pseudo-Noun Incorporation and Differential Object Marking* Imke Driemel, 2023-03-07. This book provides a detailed cross-linguistic study of pseudo noun incorporation, a phenomenon whereby an argument forms a closer than usual relation with the verb. Imke Driemel draws on data from Tamil, Mongolian, Korean, Turkish and German and applies diagnostic tests across eleven noun types in each of the languages under consideration. What emerges is a coherent effect of pseudo-incorporated arguments that maps loss of case marking to obligatory narrow scope, lack of binding and control relations and a potentially restricted movement pattern. The book provides a unifying theory that is able to capture all properties with a single assumption: pseudo-incorporation effects result from noun phrases that are made up of a nominal and a verbal category feature implemented in a derivational framework. The nominal feature is active early in the derivation, being responsible for *c*-selection and nominal modification, while the verbal feature is active late and crucially derives the effects we have come to recognize as pseudo noun incorporation. One important empirical contribution of this study stems from the observation that pseudo-incorporation does not have to be the only reason for optional case marking. Tamil and Korean provide evidence that only a subset of optionally case-marked noun types also show a correlation with scope, binding, control and movement constraints. This insight enforces the conclusion that the same language can make use of both pseudo noun incorporation and differential object marking.

Argument Structure Eric J. Reuland, Tanmoy Bhattacharya, Giorgos Spathas, 2007-11-28. Recent developments in the generative tradition have created new interest in matters of argument structure and argument projection, giving prominence to the discussion on the role of lexical entries. Particularly, the more traditional lexicalist view that encodes argument structure information on lexical entries is now challenged by a syntactic view under which all properties of argument structure are taken up by syntactic structure. In the light of these new developments, the contributions in this volume provide detailed empirical investigations of argument structure phenomena in a wide range of languages. The contributions vary in their response to the theoretical questions and address issues that range from the role of specific functional heads and the relation of argument projection with syntactic processes to the position of argument structure within a broader clausal architecture and the argument structure properties of less studied categories.

**Philosophy of Linguistics** Ruth M. Kempson, Tim Fernando, Nicholas Asher, 2012-04-20. Philosophy of linguistics

investigates the foundational concepts and methods of linguistics the scientific study of human language It brings together philosophers scientists and historians to map out both the basic assumptions set during the second half of the last century and the unfolding shifts in perspective in which more functionalist perspectives are explored Tense, Mood and Aspect Louis de Saussure, Jacques Moeschler, Genoveva Puskás, 2007 This book is a collection of articles dealing with theoretical issues in the study of tense mood and aspect as well as with specific semantic and syntactic problems raised by linguistic expressions dedicated to these domains across a variety of languages Through these papers strong variations are explored but also crosslinguistic convergences are investigated Numerous phenomena so far often left aside in linguistics are described and enlightened by different scientific standpoints which they serve to illustrate The languages investigated in this volume include Germanic languages Dutch English German Romance French Catalan Italian Slavic Serbo Croatian Czech Russian Greek and non indoeuropean languages such as Thai Digo and Kikuyu Related topics such as grammaticalization presuppositions questions in dialogue illocutionary acts and acquisition are incidentally called upon in order to shed light from the outside onto tense mood and modality and aspect This volume is of great interest for all scholars engaged in contemporary research on the linguistic expression of tense mood and aspect The papers gathered in this volume are a tight selection of the ones that were presented at the 6th Chronos colloquium The Oxford Handbook of Tense and Aspect Robert I. Binnick, 2012-06-14 This Handbook is a comprehensive authoritative and accessible guide to the topics and theories that current form the front line of research into tense aspect and related areas *Linguistic Pragmatism and Weather Reporting* John Collins, 2020-03-26 Linguistic pragmatism claims that what we literally say goes characteristically beyond what the linguistic properties themselves mandate In this book John Collins provides a novel defence of this doctrine arguing that linguistic meaning alone fails to fix truth conditions While this position is supported by a range of theorists Collins shows that it naturally follows from a syntactic thesis concerning the relative sparseness of what language alone can provide to semantic interpretation Language and by extension meaning provides constraints upon what a speaker can literally say but does not characteristically encode any definite thing to say Collins then defends this doctrine against a range of alternatives and objections focusing in particular on an analysis of weather reports it is raining snowing sunny Such reporting is mostly location sensitive in the sense that the utterance is true or not depending upon whether it is raining snowing sunny at the location of the utterance rather than some other location Collins offers a full analysis of the syntax semantics and pragmatics of weather reports including many novel data He shows that the constructions lack the linguistic resources to support the common literal locative readings Other related phenomena are discussed such as the Saxon genitive colour predication quantifier domain restriction and object deletion **Structures, Strategies and Beyond** Elisa Di Domenico, Cornelia Hamann, Simona Matteini, 2015-08-15 The volume contains 18 contributions from senior and junior scholars covering core issues within the theoretical investigation of the architecture and the mechanisms of the faculty of language with particular

emphasis on the computational component They all pursue a comparative approach investigating and comparing different languages and dialects or comparing different modes of acquisition as in Adriana Belletti's work to whom the volume is dedicated The papers in the first part by Chomsky Rizzi Bianchi Chesi Cinque Costa Calabrese deal with theoretical issues such as labeling the cartography of structures and the locality of derivations in a broad sense The papers in the second part by Haegeman Lohndal Delfitto Fiorin Cruschina Lahousse Di Domenico and Contemori Dal Pozzo Matteini concentrate on the realization of structure relative to discourse particularly on topic and focus positions in the vP periphery and on referential dependencies The third part collects papers by Cardinaletti Volpato Friedmann Yachini Szterman Snyder Hyams Hamann Tuller Cecchetto Donati Grewendorf Poletto that specifically target intervention effects in relative clauses as apparent in different structures different languages and different populations

*Boundaries, Phases and Interfaces* Olga Fernández-Soriano, Elena Castroviejo, Isabel Pérez-Jiménez, 2017-06-15 This book approaches the concept of boundary central in linguistic theory and the related notion of phase from the perspective of the interaction between syntax and its interfaces A primary notion is that phases are the appropriate domains to explain most interface linguistic phenomena and that the study of narrow interfaces helps to understand conditions on the internal structure of the Language Faculty The first part of this volume is dedicated to introducing the notion of boundary cycle and phase and also the current debates regarding internal interfaces in particular the syntax phonology syntax semantics syntax discourse syntax morphology and syntax lexicon interfaces in order to show how the notion of boundary phase is related to or even determines most of their characteristics The four sections of the second part deal with morpho phonology syntax and the role of boundaries phases the syntax discourse and syntax semantics interface and the lexicon syntax interface while the notion of boundary phase cross cuts the main topics addressed

**The Morphosyntax of Reiteration in Creole and Non-Creole Languages** Enoch O. Aboh, Norval Smith, Anne Zribi-Hertz, 2012-06-27 This is a new contribution to a theory of reiteration in natural languages with a special focus on creoles Reiteration is meant to denote any situation where the same form occurs at least twice within the boundaries of some linguistic domain By including two case studies bearing on Hebrew and Breton alongside five chapters on creole languages Surinam creole Haitian Mauritian S o Tom and Pichi this volume brings counter evidence to the claim that reiteration phenomena are particularly typical of creoles And by exploring the syntax of reiteration alongside its morphology the authors are led to challenge the iconic theory of reduplication proposed in several other studies of similar phenomena This volume will be relevant for creole studies but also for readers more generally interested in language universals and the architecture of grammars

## Unveiling the Energy of Verbal Artistry: An Emotional Sojourn through **Structuring Sense Vol 2 The Normal Course Of Events**

In a global inundated with displays and the cacophony of quick connection, the profound power and emotional resonance of verbal artistry usually fade into obscurity, eclipsed by the continuous assault of sound and distractions. However, situated within the lyrical pages of **Structuring Sense Vol 2 The Normal Course Of Events**, a charming work of fictional splendor that impulses with organic thoughts, lies an unforgettable trip waiting to be embarked upon. Composed with a virtuoso wordsmith, that exciting opus books visitors on a psychological odyssey, softly exposing the latent possible and profound influence embedded within the delicate web of language. Within the heart-wrenching expanse of the evocative analysis, we can embark upon an introspective exploration of the book is key styles, dissect their captivating writing model, and immerse ourselves in the indelible impact it leaves upon the depths of readers souls.
