## **Structuring The Active And Reserve Army For The 21st Century:**

*Structuring the Active and Reserve Army for the 21st Century*, 1997 The U S Army s Cold War focus on the Soviet Union has shifted to fighting smaller conflicts against less formidable foes Today s Army is also 30 percent smaller than it was a decade ago In spite of those changes the composition of the Army has not shifted markedly the service remains almost equally divided between active duty and reserve soldiers A question under debate is whether that composition is well suited to the Army s current role The Army hopes to make its force structure better suited to its current mission by converting some of the combat forces in the National Guard to support forces That change would eliminate some of the excess combat forces but it would not enable the Army to get to regional conflicts more quickly than it can today nor would it improve the Army s ability to carry out peacekeeping operations Finally because the Army s plan would not reduce the overall size of the service it would not yield significant savings therefore the Army may have difficulty finding the funds to acquire the modern weapons it will need

**Structuring the Active and Reserve Army for the 21st Century** Frances M. Lussier, 1999-09 Addresses the question of whether the Army s current composition of almost equal numbers of active duty and reserve soldiers is well suited to the service s current role of fighting regional conflicts and taking part in peacekeeping operations Examines several alternative approaches for meeting the Army s force requirements comparing the advantages and disadvantages of each alternative with those of the current Army and the Army s plan to reorganize the National Guard Charts and tables

*Structuring the Active and Reserve Army for the 21st Century* Congressional budget office (u s congress) washington dc, 1997 He U S Army has changed dramatically in the past 10 years in both mission and size Its Cold War focus on deterring or defeating the Soviet Union has shifted to a more global mission of fighting smaller conflicts against less formidable foes anywhere in the world Today s Army is also 30 percent smaller than it was a decade ago In spite of those changes the composition of the Army has not shifted markedly The service remains almost equally divided between active duty and reserve soldiers those in the National Guard and Army Reserve although the reserve component now has a slight majority A question under debate in defense circles is whether that composition is well suited to the Army s current role of fighting regional conflicts and taking part in peacekeeping operations The Army hopes to make its force structure better suited to its current mission by converting some of the combat forces in the National Guard to support forces That change would eliminate some of the excess combat forces left over from the Cold War But it would not enable the Army to get to regional conflicts more quickly than it can today Nor would it improve the Army s ability to carry out the peacekeeping operations in which it is increasingly engaged Finally because the Army s plan would not reduce the overall size of the service it would not yield significant savings Without such savings the Army may have difficulty finding the funds to acquire the modern weapons it will need in the next two decades

*Landpower and Crises* Conrad C. Crane, 2001 The author analyzes the role of landpower in the 170 smaller scale contingencies conducted by the United States during the last decade He divides such

contingencies into engagement enhanced deterrence hostility and stabilization phases and discusses the military's role in each one. The author especially emphasizes the recurring problems in the planning execution and force structure for stabilization tasks including nation building. He concludes that despite the desire of American leaders to limit military involvement in such missions it is unavoidable because of the capability mismatch between military and civilian organizations combined with the requirements of peace operations and the character of American soldiers. Recommendations include acceptance of some degree of nation building as the Army's mission and adapting its force structure training and planning accordingly. **The Link Between Force Structure and Manpower Requirements** United States. Force Structure Carol R.
