**Structuring Uncertainties in Long-range Power Planning** Cyrus K. Motlagh, 1976      *Transforming Power* Aynsley Kellow, 1996 Originally published in 1996 this book is an exploration and analysis of the electricity industry in the context of uncertainty following the energy crisis of the 1970s and concern over the greenhouse effect Few industries demand a similar level of foresight and planning or such vast amounts of capital The book examines five well known Australian Canadian and New Zealand cases and closely analyses the ways in which various agencies have sought ends to serve the means at their disposal Electricity has long been regarded as a natural monopoly but questions of privatisation regulation and government control are increasingly prevalent The book explores these issues and also notes the experiences of other countries in its analysis of institutional reform Aynsley Kellow argues for different approaches to electricity planning which offer much by way of economic savings and minimisation of environmental problems      **pt. Snow, 2003-03-26 Books and articles come and go endlessly But a few do stick and this book is such a one Organizational Strategy Structure and Process broke fresh ground in the understanding of strategy at a time when thinking about strategy was still in its early days and it has not been displaced since David J Hickson Emeritus Professor of International Management Organization University of Bradford School of Management Originally published in 1978 Organizational Strategy Structure and Process became an instant classic as it bridged the formerly separate fields of strategic management and organizational behavior In this Stanford Business Classics reissue noted strategy scholar Donald Hambrick provides a new introduction that describes the book s contribution to the field of organization studies Miles and Snow also contribute new introductory material to update the book s central concepts and themes Organizational Strategy Structure and Process focuses on how organizations adapt to their environments The book introduced a theoretical framework composed of a dynamic adaptive cycle and an empirically based strategy typology showing four different types of adaptation This framework helped to define subsequent research by other scholars on important topics such as configurational analysis organizational fit strategic human resource management and multi firm network organizations      Catalog of Copyright Entries. The Management of Uncertainty: Approaches, Methods and Applications Luc Wilkin,A. Sutton,2012-12-06 For thirty years the literature on decision making and planning has been divided into two camps work premised on rational models of choice and work designed to discredit such models The sustained critic of fully rational decision making theories has already a long history and a constant message to deliver in practice consequential decision making hardly fulfills the canons of perfect rationality There is also evidence that decision making and planning are not unitary processes Although the concept of decision making connotes the idea of a single process making a single choice involves a complex of processing tasks structuring the problem finding alternatives worth considering deciding what information is relevant assessing various consequences and a variety of others The aim of this volume is to bring together and try to inter relate some of the concepts and relevant knowledge from various disciplines concerned with one important aspect of this complex process the management of uncertainty It is hardly necessary to reiterate the case made by numerous authors about our changing and increasingly uncertain world Suffice it to say here that it is uncertainty about the future and in many cases about the past and the present also which makes decision making and planning so difficult The management of uncertainty may be defined as the way in which uncertainty is treated and processed in decision making      Electric Utility Pricing and Investment Decisions Under Uncertainty Randall P. Ellis,1990      **1980 IEEE International Symposium on Circuits and Systems** ,1980
