Structuring Politics Sven Steinmo, Kathleen Thelen, Frank Longstreth, 1992-09-25 These essays demonstrate how the historical institutional approach to the study of politics reveals the nature of institutional change and its effect on policy making

Structuring Politics Sven Steinmo, Kathleen Thelen, Frank Longstreth, 1992-09-25 This volume brings together original essays by scholars working on a diverse range of empirical issues but whose work is in each case informed by a historical institutional approach to the study of politics By bringing these pieces together the volume highlights the methodological and theoretical foundations of this approach and illustrates the general contributions it has made to comparative politics The essays demonstrate the potential of the approach to illuminate a broad range of issues such as how and why institutions change how political ideas are filtered through institutional structures in the formation of specific policies and how institutional structure can have unintended effects on the shaping of policy Through these richly detailed pieces the reader is provided not only a thorough understanding of the method of analysis but also an overview of the theoretical underpinnings of the approach

Falleti, Adam Sheingate, 2016-03-17 The Oxford Handbook of Historical Institutionalism offers an authoritative and accessible state of the art analysis of the historical institutionalism research tradition in Political Science Devoted to the study of how temporal processes and events influence the origin and transformation of institutions that govern political and economic relations historical institutionalism has grown considerably in the last two decades With its attention to past present and potential future contributions to the research tradition the volume represents an essential reference point for those interested in historical institutionalism Written in accessible style by leading scholars thirty eight chapters detail the contributions of historical institutionalism to an expanding array of topics in the study of comparative American European and international politics

Democracy and Institutions Markus M. L. Crepaz, Thomas Albert Koelble, David Wilsford, 2010-06-08 Institutions are the channels of political power This volume explores Arend Lijphart's life work the design of political institutions All the contributors to this volume share the

fundamental insight that the design of political institutions matters in how democracies work The essays in this volume offer both theoretical insights into the context and implications of Lijphart's ideas and empirical exploration of the ideas Two chapters by Thomas Koelble and Andrew Reynolds examine and apply Lijphart's insights to South Africa while another study by Jack Nagel explores the fascinating institutional changes taking place in New Zealand Essays by Bernard Grofman and Rein Taagepera examine Lijphart's work from a theoretical perspective and place Lijphart's work in the wider neo-institutionalist school of thought Milton Esman applies the principle of power sharing to mobilized communities not only in democratic societies but also to those which are governed by authoritarian rule Bingham Powell offers an empirical approach to the crucial question of the connection between political institutions and responsiveness of policy makers Markus M L Crepaz and Vicki Birchfield argue that in this age of globalization countries with consensual political institutions will not only systematically refract the pressures of globalization but will be able to absorb the domestic consequences of globalization more successfully than majoritarian countries Finally Arend Lijphart responds to the arguments made in these essays extending and adding novel concepts and insights to his conceptual framework The book will be of interest to political scientists lawyers and sociologists who study institutions the impact of electoral systems and constitutional design In addition those who study globalization will be attracted by the relevance of domestic political institutions and their refractory effects as the tides of globalization wash against the domestic shores Markus M L Crepaz is Associate Professor of Political Science University of Georgia Thomas A Koelble is Associate Professor of Political Science University of Miami David Wilsford is President and Professor the Institute for American Universities

Ideas and International Political Change Jeffrey T. Checkel, 1997-01-01 The end of the Cold War dramatically and unexpectedly transformed international politics toward the end of the 20th century At the heart of this change was the struggle over new and old ideas

International Trade and Political Institutions Fiona McGillivray, 2001-01-01 In International Trade and Political Institutions four leading young scholars of comparative and international political economy come together to analyse aspects of trade policy from the late eighteenth to the early twentieth centuries Combining theoretical sophistication with empirical depth they provide cogent arguments about the interaction of interests institutions and ideas in a period of crucial importance to those who would like to understand the sources and implications of global economic integration This exciting volume will be of great interest for scholars concerned with international trade political economy and the history of the nineteenth century world economy Jeffrey A Frieden Harvard University US This fascinating volume should be read by political scientists economists and historians interested in the political formation of trade policy The papers consider a rich set of historical examples and never fail to be provocative and interesting Douglas Irwin Dartmouth College US It is a widely held view that politics plays an important role in determining international trade policy Defining precisely why and how politics matters is more difficult Despite the benefits of trade few nations have wholeheartedly adopted free trade policies and when they do so it is by managing trade

through international institutions and multi or bilateral trade treaties International Trade and Political Institutions broadens the public choice theory of trade politics to allow for the study of ideas and institutions within a longer time horizon The authors use theoretically rigorous historical analysis of international political economy and four important case studies to help untangle the role of ideology institutions and interests This illuminating book connects the fields of economics political economy and history to shed new light on trade theory **Administrative Traditions** B. Guy Peters,2021-02-02

Contemporary public administration reflects its historical roots as well as contemporary ideas about how the public bureaucracy should be organized and function This book argues that there are administrative traditions that have their roots centuries ago but continue to influence administrative behaviour Further within Western Europe North America and the Antipodes there are four distinctive administrative traditions Anglo American Napoleonic Germanic and Scandinavian These are not the only traditions however and the book also explores administrative traditions in Central and Eastern Europe Latin America Asia and the Islamic world In addition the book contains a discussion of how administrative traditions of the colonial powers influenced contemporary administration in Africa and how they continue to interact with traditional forms of governance These discussions of tradition and persistence are also discussed in light of the numerous attempts to reform and change public administration Some administrative traditions have been more capable than others of resisting attempts at reform especially those associated with the New Public Management **The Challenge of Cultural Pluralism** Stephen

Brooks,2002-10-30 Many believe that we are passing through a period during which due largely to globalization s challenge to the idea and sovereignty of nation states there is now the intellectual and political space for the construction of new models of citizenship involving new relations between individuals and their governments These new relations may be mediated through individuals membership in communities that are recognized within states In various ways the resurgence of ethnic nationalism the rise of multiculturalism the ideas associated with communitarianism and the apparent erosion of national sovereignty have all contributed to the creation of this interest in new ways of conceptualizing citizenship and carrying out the tasks of governance Brooks and his colleagues examine various aspects of the challenge of cultural pluralism Together they cover a wide range of national cases theoretical issues and empirical research The collection is intended for all scholars students and researchers who have an interest in cultural pluralism consociationalism and inter community relations in societies divided by language ethnicity and culture The Politics Of Education And The New Institutionalism William

Lowe Boyd,Robert L. Crowson,Hanne M. Mawhinney,2015-12-22 This is an assessment of the reluctance of American education institutions to undergo change and reform at a time when it is considered necessary The lack of public confidence in educational institutions is discussed along with the subsequent consequences **Legacies of Change** John Lorne Campbell,Ove Kaj Pedersen, The essays in this volume examine institutional change in five of the most important areas of economic life in central and eastern Europe after 1989 international and regional economic reintegration the restructuring of

the industrial base how economic interests are to be represented fiscal and budgetary reform and reform of the social welfare system The editors use these research findings to buttress a somewhat heterodox theory of institutional dynamics one pointing to discursive structures and governance structures as key dimensions that in combination affect institutional change in this part of the world so that an economic revolution becomes an evolutionary processes of gradual transition

Financing Healthcare in China Sabrina Ching Yuen Luk,2016-07-22 China s current social medical insurance system has nominally covered more than 95 per cent of 1 4 billion population in China and is moving towards the ambitious goal of universal health insurance coverage Challenges posed by a rapidly ageing population an inherently discriminatory design of the health insurance system the disorder of drug distribution system and an immature legal system constrain the Chinese government from realizing its goal of universal health insurance coverage in the long run This book uses a refined version of historical institutionalism to critically examine China s pathway to universal health insurance coverage since the mid 1980s It pays crucial attention to the processes of transforming China s healthcare financing system into the basic social medical insurance system alongside rapid socio economic changes Financing Healthcare in China will interest researchers and government and think tank officials interested in the state of healthcare reforms in China Healthcare specialists outside of East Asia may also be interested in its general study of healthcare in developing countries Scholars and students interested in the healthcare field will also find this useful

Labour's Immigration Policy Erica Consterdine,2017-10-15 This book explains how and why the New Labour governments transformed Britain s immigration system from a highly restrictive regime to one of the

most expansive in Europe otherwise known as the Managed Migration policy It offers the first in depth and candid account of this period of dramatic political development from the actors who made policy during the making of the migrant state Drawing on document analysis and over 50 elite interviews the book sets out to explain how and why this radical policy change transpired by examining how organized interests political parties and institutions shaped and changed policy This book offers valuable insights to anyone who wants to understand why immigration is dominating the political debate and will be essential reading for those wanting to know why governments pursue expansive immigration regimes

Comparing Apples and Mangoes S. N. Sangmpam, 2012-02-01 Two competing approaches currently dominate the debate about the state and institutions in developing countries The first projects a picture of transnational vertical uniformity descending from the West to developing countries and views liberal democracy as the only game in town In this view the state and institutions resemble or ought to resemble those in the West The second by contrast explains political outcomes by local idiosyncrasies and regional variations in institutions In his original approach to third world politics S N Sangmpam challenges both views by uncovering important similarities in the political features of developing countries He shows that they share political behaviors and features unaccounted for in either local idiosyncratic or liberal democratic theories These behaviors converge toward a common property overpoliticization that defies political compromise leading to an overpoliticized state Sangmpam provides a wealth of empirical historical and quantitative evidence from Latin America Asia Africa and the West and demonstrates the overpoliticized state constitutes the cornerstone of an integrated theory of politics in developing countries

Transforming Latin America Craig Arceneaux, David Pion-Berlin, 2005-07-14 This ambitious book offers a clear and unified framework for understanding political change across Latin America The impact of U S hegemony and the global economic system on the region is widely known and scholars and advocates alike point to Latin America's vulnerability in the face of external forces In spite of such foreign pressure however individual countries continue to chart their own courses displaying considerable variation in political and economic life Looking broadly across the Western Hemisphere with examples from Brazil the Southern Cone the Andes and Central America Arceneaux and Pion Berlin identify general rules that explain how international and domestic politics interact in specific contexts The detailed accessible case studies cast new light on such central problems as neoliberal economic reform democratization human rights regional security environmental degradation drug trafficking and immigration And they consider not only what actors institutions and ideas matter in particular political contexts but when where and how they matter By dividing issues into the domains of high and low politics and differentiating between short term problems and more permanent concerns they create an innovative typology for analyzing a wide variety of political events and trends

New Perspectives on Turkey-EU Relations Chris Rumford, 2014-10-29 This book makes the case for looking afresh at Turkey EU relations in order to appreciate the richness and complexity of a relationship which is now more than 50 years old and is still not close to reaching fulfilment The

contributors challenge conventional attempts to understand Turkey EU relations revealing that EU integration studies has been rather poor at understanding the global context within which Turkey EU developments take place More surprising perhaps EU integration studies has also struggled to give sufficient weight to the potential of Turkey s domestic politics to shape EU enlargement The volume attempts to correct these imbalances by offering both a global context and new perspectives on the drivers of domestic politics It represents a shift from a narrow EU integration enlargement agenda Turkey s position vis a vis the EU cannot be adequately captured by simplistic notions of conditionality harmonization and an uncritical interpretation of Europeanization A more rounded view of Turkey EU relations is advanced based upon a broader context of European and global transformations The contributions collected here offer an interpretation of Turkey EU relations from a novel perspective utilize a new framework of theory and draw upon insights and perspectives from disciplines underrepresented in mainstream study of Turkey EU relations This book was published as a special issue of the *Journal of Contemporary European Studies* *History and Foreign Policy in France and Germany* Ulrich Krotz, 2015-08-11

Why do states similar in size resources and capabilities significantly differ in their basic orientations and actions across major domains in foreign policy security and defense This book addresses this important question by analyzing the major differences between the foreign policies of France and Germany over extended periods of time
