## **Struggle Against Rubia In The Romanian:**

**Romania's Abandoned Children** Charles A. Nelson, Nathan A. Fox, Charles H. Zeanah, 2014-01-06 This landmark study of child development examines the devastating effects of early childhood institutionalization Avshalom Caspi Duke University In 1989 the fall of Romania's Ceausescu regime left approximately 170 000 children in impoverished institutions across the country This crisis prompted the most comprehensive study to date on the effects of institutionalization on a child's brain development behavior and psychological functioning Romania's Abandoned Children documents this landmark study and the devastating toll paid by children who are deprived of responsive care social interaction stimulation and psychological comfort Launched in 2000 the Bucharest Early Intervention Project was a rigorously controlled investigation of foster care as an alternative to institutionalization Examining a total of 136 abandoned infants and toddlers researchers randomly assigned half of them to foster care while the other half stayed in Romanian institutions Over a twelve year span both groups were assessed for physical growth cognitive functioning brain development and social behavior Data from a third group of children raised by their birth families were collected for comparison The study found that the institutionalized children were severely impaired but that the sooner they were placed into foster care the better their recovery Combining scientific historical and personal narratives in a gripping often heartbreaking account Romania's Abandoned Children highlights the need to help the millions of parentless children living in institutions throughout the world *Affective Neuroscience in Psychotherapy*

Francis Stevens, 2021-09-27 Most psychological disorders involve distressful emotions yet emotions are often regarded as secondary in the etiology and treatment of psychopathology This book offers an alternative model of psychotherapy using the patient's emotions as the focal point of treatment This unique text approaches emotions as the primary source of intervention where emotions are appreciated experienced and learned from as opposed to being regulated solely Based on the latest developments in affective neuroscience Dr Stevens applies science based interventions with a sequential approach for helping patients with psychological disorders Chapters focus on how to use emotional awareness emotional validation self compassion and affect reconsolidation in therapeutic practice Interventions for specific emotions such as anger abandonment jealousy and desire are also addressed This book is essential reading for clinicians practicing psychotherapy social workers and licensed mental health counselors as well as anyone interested in the emotional science behind the brain **The**
