Abinales, Donna J. Amoroso, 2017-07-06 This clear and nuanced introduction explores the Philippines ongoing and deeply charged dilemma of state society relations through a historical treatment of state formation and the corresponding conflicts and collaboration between government leaders and social forces Patricio N Abinales and Donna J Amoroso examine the long history of institutional weakness in the Philippines and the varied strategies the state has employed to overcome its structural fragility and strengthen its bond with society The authors argue that this process reflects the country s recurring dilemma on the one hand is the state s persistent inability to provide essential services guarantee peace and order and foster economic development on the other is the Filipinos equally enduring suspicions of a strong state To many citizens this powerfully evokes the repression of the 1970s and the 1980s that polarized society and cost thousands of lives in repression and resistance and billions of dollars in corruption setting the nation back years in economic development and profoundly undermining trust in government The book s historical sweep starts with the politics of the pre colonial era and continues through the first year of Rodrigo Duterte s controversial presidency **Gendered Lives** Nadine T. Fernandez, Katie Nelson, 2022-01-01 Gendered Lives takes a regional approach to examine gender issues from an anthropological perspective with a focus on globalization and intersectionality Chapters present contributors ethnographic research contextualizing their findings within four geographic regions Latin America the Caribbean South Asia and the Global North Each regional section begins with an overview of the broader historical social and gendered contexts which situate the regions within larger global linkages These introductions also feature short project people profiles that highlight the work of community leaders or non governmental organizations active in gender related issues Each research based chapter begins with a chapter overview and learning objectives and closes with discussion questions and resources for further exploration This modular regional approach allows instructors to select the regions and cases they want to use in their courses While they can be used

separately the chapters are connected through the book's central themes of globalization and intersectionality. **Poverty and the Critical Security Agenda** Pauline Eadie, 2017-11-30 Poverty and the Critical Security Agenda argues that poverty should be a central concern of security studies and critiques existing methodological approaches to poverty and well-being. Using the Philippines as a case study, this book is critical of approaches to poverty that portray the poor as passive objects as opposed to dynamic actors. With this in mind, the relationship between poverty and democracy as a means to facilitating human security is central. Poverty acts as a major behavioural force in international relations, not least for the state, and therefore merits increased visibility within the research agenda. This text is highly relevant for courses on international relations, methodology, and critical theory, development studies, security studies, and international political economy.

**Continuity and Change in Cultural Adaptation to Mountain Environments** Ludomir R. Lozny, 2013-03-12 Up until now mountain ecosystems have not been closely studied by social scientists as they do not offer a readily defined set of problems for human exploitation as do for instance tropical forests or arctic habitats But the archaeological evidence had shown that humans have been living in this type of habitat for thousands of years From this evidence we can also see that mountainous regions are often frontier zones of competing polities and form refuge areas for dissident communities as they often are inherently difficult to control by centralized authorities As a consequence they fuel or contribute disproportionately to political violence But we are now witnessing changes and increasing vulnerability of mountain ecosystems caused by human activities Human adaptability to mountain ecosystems This volume presents an international and interdisciplinary account of the exploitation of and human adaptation to mountainous regions over time The

contributions discuss human cultural responses to key physical and cultural stressors associated with mountain ecosystems such as aridity quality of soils steep slopes low productivity as well as transient phenomena such as changing weather patterns deforestation and erosion and the possible effects of climate change This volume will be of interest to anthropologists ecologists and geologists as mountainous landscapes change fast and cultures disappear and they need to be recorded and mountain regions are of interest for studies on environmental change and cultural responses of mountain populations provide clues for us all Critical to understanding mountain adaptations is our comprehension of human decision making and how people view short and long term outcomes *Values and Valuables* Cynthia Ann Werner, Duran Bell, 2004 This volume brings together anthropologists and economists to discuss the complex ways in which different cultures imbue material objects with symbolic qualities whose value cannot be reduced to material or monetary equivalents Mapping Feminist Anthropology in the Twenty-First Century Ellen Lewin, Leni M. Silverstein, 2016-07-07 Feminist anthropology emerged in the 1970s as a much needed corrective to the discipline's androcentric biases Far from being a marginalized subfield it has been at the forefront of developments that have revolutionized not only anthropology but also a host of other disciplines This landmark collection of essays provides a contemporary overview of feminist anthropology's historical and theoretical origins the transformations it has undergone and the vital contributions it continues to make to cutting edge scholarship Mapping Feminist Anthropology in the Twenty First Century brings together a variety of contributors giving a voice to both younger researchers and pioneering scholars who offer insider perspectives on the field's foundational moments Some chapters reveal how the rise of feminist anthropology shaped and was shaped by the emergence of fields like women's studies black and Latina studies and LGBTQ studies Others consider how feminist anthropologists are helping to frame the direction of developing disciplines like masculinity studies affect theory and science and technology studies Spanning the globe from India to Canada from Vietnam to Peru Mapping Feminist Anthropology in the Twenty First Century reveals the important role that feminist anthropologists have played in worldwide campaigns against human rights abuses domestic violence and environmental degradation It also celebrates the work they have done closer to home helping to explode the developed world's preconceptions about sex gender and sexuality
