Stubborn Fact and Creative Advance Thomas E. Hosinski,1993 An introduction to the complex metaphysics of Alfred North Whitehead aimed at the philosophy student It explains Whitehead's central concerns ideas and terms in a linear and simple fashion Examples from daily life illustrate the implications of his thought for contemporary Christian theology

Whitehead's Metaphysics of Power Pierfrancesco Basile,2017-03-08 Shows how Whitehead's metaphysics developed from his reading of early modern philosophy At the beginning of his magnum opus Process and Reality 1929 Whitehead lists a series of beliefs which he thinks are widely held by contemporary philosophers They are all condemned as dangerously mistaken What are these myths Why are they rejected In the works of which modern thinker did they arise What precisely went wrong At what stage in the development of Western thought did this happen By tackling these questions Pierfrancesco Basile makes it possible to grasp the main concepts of Whitehead's process metaphysics especially the crucial notion that being and power are one and the same and appreciate the complex way this is rooted in the modern philosophical tradition **Key Features**Shows how Whitehead's metaphysics of power and events is deeply rooted in mainstream Western

philosophy Illustrates how our understanding of the great masters of the past Descartes Locke Hume Leibniz and Spinoza

benefit from viewing them from the standpoint of Whitehead's metaphysics Provides a critical assessment of Whitehead's metaphysics and his overall philosophy **The Mind of Whitehead**

Roland Faber,2024-05-30 For Alfred North Whitehead the fundamental basis of reality is connectivity the possibility interdependence and actualisation that defy our human desire for structure categorisation and division In this spirit Professor Roland Faber combines the disparate interests of Whitehead's study from Mathematics to Divinity Political Philosophy to Cosmology to trace the thematic similarities of this work and establish their unity in the mind of Whitehead Focussing on the experience of reading Whitehead's rich text Faber invites the reader not to search for fixed patterns but to explore the impermanence and diversity of Whitehead's ideas The Mind of Whitehead offers the curious reader a creative exploration of a crucial twentieth century philosopher speaking to global concerns from a position of possibility and complexity **Novel Theology**

Darren J. N. Middleton,2000 Literature and

theology constantly deconstruct each other Suggesting that this deconstructive assignment is one that cannot but be in process itself Middleton returns to it throughout his study

The Phenomenology of Traffic Glenn Wyatt, 2020-09-09 The book delves into the affective embodied and sensory dimensions of traffic and urban mobility It brings together key phenomenological and post phenomenological readings to challenge taken for granted assumptions of urban traffic Through the experiences of traffic users in Ho Chi Minh City Vietnam the book provides fascinating pathways into structures and processes that make up phenomenal traffic worlds It explores the nature of the traffic experience modalities of existence within it and the wide spectrum of awarenesses involved in making sense from non sense The book offers rich theoretical insights on how we feel our way through our affect laden worlds Through empirical examples from the urban traffic in Ho Chi Minh City the book explores this fluid constantly changing complex collective of ongoing negotiations we call traffic often emotional involving and producing all kinds of entities It develops a range of philosophical concepts in order to better understand the complex relationships between humans and non humans in everyday settings Offering innovative insights into the structures authorities materialities and forms of power that shape our experiences of traffic this book will be of interest to students scholars and practitioners interested in philosophy cultural geography mobilities transport studies cultural studies and urban studies

Whitehead's Pancreativism Michel Weber, 2013-05-02 There is one question that any potential reader who suspects that Alfred North Whitehead 1861 1947 might be important for past contemporary and future philosophy inevitably raises how should I read Whitehead How can I make sense of this incredibly dense tissue of imaginative systematizing spread over decades of work in disciplines so different and specialized as algebra geometry logic relativistic physics and philosophy of science Accordingly this monograph has two main complementary objectives The first one is to propose a set of efficient hermeneutical tools to get the reader started These straightforward tools provide answers that are highly coherent and probably the most applicable to Whitehead's entire corpus The second objective is to illustrate how the several parts of Process and Reality are interconnected something that all commentators have either failed to recognise or only incompletely acknowledged

The Becoming of God Roland Faber, 2017-04-06 How should we believe in God today If we look beyond our little lives to the vast cosmos we may even ask Why all that And even if we spiritually feel the universe Why believe any religion After all there are many and haven't they contributed to the predicament of humanity Process theology gives provocative answers to these questions how we are bound by the organic cycles of this world but how in this web of life God shines even in the least and forgotten event as the Eros of its becoming and as its mirror of greatness why anything exists because it is from beauty for harmony and intensity and through a consciousness of peace rising from our deepest intuitions of existence We can change not only in our thoughts and lives but even in the way we experience this world This book introduces such a new way of experiencing thinking and living Based on the fascinating work on cosmology religion and civilization of Alfred North Whitehead this book develops the main theses of process theology and elucidates it

as a theopoetics of mutual care for the unexpected the excluded the forgotten and a future society of peace Depths As Yet Unspoken Roland Faber, 2020-07-30 Whitehead's thought continues to attract attention in mathematics and metaphysics but few have recognized with Roland Faber the deeply mystical dimensions of his philosophy If you like to phrase it so Whitehead states philosophy is mystical For mysticism is direct insight into depths as yet unspoken Where however do these unspoken depths speak in Whitehead and what are their associated themes in his philosophy For the first time Depths As Yet Unspoken gathers together Faber's most compelling writings on Whitehead's mutually immanent themes of mysticism multiplicity and divinity In dialogue with a diversity of voices from process philosophers and theologians to mystical and poststructuralist thinkers Faber creatively articulates Whitehead's theopoetic process cosmogony in its relevance to metaphysics cosmology everyday experience religious pluralism and interreligious violence spirituality and longstanding concerns of the theological tradition including creation the Trinity revelation religious experience and divine mystery Although Whitehead's mystical inclinations may not be obvious at first they in fact constitute the apophatic backdrop to his entire philosophical corpus Through Faber's work Whitehead's philosophy is revealed to be nothing short of a remarkable endeavor to speak to the unfathomable depth of things The Metaphysics of Becoming Thomas Padiyath, 2014-01-31 This study attempts to

elucidate a possible meeting point of the traditions of Eastern and Western metaphysical thinking In discussing Whitehead's and Aurobindo's views on being and becoming it seeks the possibility of a better engagement between the East and the West in the light of the philosophical insights It is an initiation into the *Sitz im Leben* of Whitehead's philosophy and his general thought pattern It carries a perceptive analysis to show the clear primacy of Becoming or Process in Whitehead that extends even to the Divine It also highlights Aurobindo as a unique Indian Philosopher who articulated Indian thought in Western categories He was able to integrate the evolutionary theory of the West with the Indian understanding of becoming The relationship between God and Creativity and Sachchidananda and the Supermind is studied within the context of Enlightenment and Modernity and the way of doing philosophy in the West and in the East **Education from a**

Whiteheadian Point of View Vesselin Petrov, 2019-03-28 The basic aims of contemporary thinking in education are to cultivate a proper comprehension of the meaning and purpose of education and the role of the teacher and to develop adequate theoretical and methodological frameworks that combine some of the positive sides of the leading theories while avoiding their disadvantages Toward these ends one excellent candidate for consideration is Alfred North Whitehead's 1861 1947 process relational philosophy of education as set forth in *The Aims of Education* 1929 and elsewhere The contributors to this volume analyze Whitehead's philosophy of education in a detailed and critical fashion including inquiring into the development of cycle based approaches to education like Whitehead's in intellectual history as well as its potential objective bases They also demonstrate how this relates to and can be integrated with other leading theories of education and contemporary pedagogical thinking and identify avenues for its positive practical application in schooling across the globe as

well as in scientific research The book further critically evaluates current educational practices and the organization of educational institutions in this light and the effectiveness of teaching strategies that are founded upon some of its principles while also exploring the ramifications of its selection and application in education for society in general as well as for our common civilizational aspirations including humanity's addressing of global problems such as the ecological crisis In addition the volume also serves to lay some of the groundwork for its potential further development

The Collaborative Enterprise Antonio Tencati, László Zsolnai, 2010 Competitive economics produces an enormous abundance of goods and services but at an intolerable environmental and social cost Competition has become an end in itself which leads to detrimental effects on nature society and future generations A change of paradigm is needed Business should respect the ecological and social limits in which it operates and embed its activities in the natural and social systems This book promotes a collaborative attitude of doing business based on a positive view of the self and others Theoretical contributions reflections cases examples and initiatives collected in the book show that a collaborative enterprise is not only possible but also a feasible and desirable alternative to the current self-defeating managerial models Innovative firms seeking to build long-term mutually beneficial relationships with all of their stakeholders while producing values for their business ecosystems represent well-grounded hopes for a really sustainable future

Schleiermacher and Whitehead Christine Helmer, 2012-10-24 This collection of essays stages a dialogue between Friedrich Schleiermacher and Alfred North Whitehead on significant features of open system The volume offers new options for rehabilitating system for future theological and philosophical thinking by opening system to a flexible relation with changing reality Key ingredients for system are discussed in three areas of contact between Schleiermacher and Whitehead One such ingredient concerns historical precedents figuring crucially in Western systematic philosophy Another feature is the systematic categorization of experience that relates epistemology metaphysics and the empirical sciences System is also brought to bear on pressing contemporary issues such as ethics and religious pluralism

Heidegger, Neoplatonism, and the History of Being James Filler, 2023-05-04 This book argues that Western philosophy's traditional understanding of Being as substance is incorrect and demonstrates that Being is fundamentally Relationality To make that argument the book examines the history of Western philosophy's evolving conception of being and shows how this tradition has been dominated by an Aristotelian understanding of substance and his corresponding understanding of relation First the book establishes that the original concept of Being in ancient Western philosophy was relational and traces this relational understanding of Being through the Neoplatonists Then it follows the substantial understanding of Being through Aristotle and the Scholastics to reach its crisis in Descartes Finally the book demonstrates that Heidegger represents a recovery of the original relational understanding of Being

Process, Sensemaking, and Organizing Tor Hernes, Sally Maitlis, 2012-05-31 Process Sensemaking and Organizing is the first in a series of volumes which explore perspectives on process theories an emerging approach to the study of

organizations that focuses on understanding activities interactions and change as essential properties of organizations rather than structures and state an approach which prioritizes activity over product change over persistence novelty over continuity and expression over determination Process and sensemaking may be seen as mutually interlocking phenomena and as such are cornerstones in process thinking This volume brings together contributions from an international group of scholars energized by process organization studies The collection offers perspectives from different disciplines insights from diverse theoretical traditions and contexts and parallels made with a range of cultural forms including art poetry and cookery At the same time the chapters exhibit a clear emphasis on a process ontology process theorizing and narrative thinking Across this rich and varied collection recurrent themes emerge that distinguish process theorizing from the more logico scientific variance oriented research that dominates organization studies today This book will appeal to academics researchers and graduate students in management organization studies and sociology who wish to better understand the emergent changing and flow like character of organizational life and expand their understanding of the nature of sensemaking as a basis for organizing

Beyond Superlatives Roland Faber, J. R. Hustwit, Hollis Phelps, 2014-04-23 This collection of essays drawn from the latest generation of Whitehead scholars explores how in the deconstruction of certain concepts an unceasing invitation of possibility and change is released both in relation to ongoing philosophical conversations and as applied to lived experience The essays make a significant intervention in the field of Whiteheadian scholarship by creating new intersections and paths that extend Whitehead's thought in novel and often unexpected directions The philosophy of Alfred North Whitehead proposes a radical reconceptualization of experience one in which we and all other things are composed of mutually implicated series of events in an infinite universe of interaction generating and regenerating experience Far from indicating a new superlative of holistic integrity Whitehead prefers the always incomplete movement of all realities which is the source of vitality for every new generation This volume applies Whitehead's philosophy to superlatives those valued concepts that limit and define our categories amid the flux of experience The first half of this book probes the superlatives that have historically defined philosophical method in the West These essays trace the adventures of concepts like substance novelty system and truth Ossified oppositions that define these superlatives are fractured indicating new directions for growth The essays in the second half of the book reflect on the influx fragility and impossibility of superlatives like care tragedy love and loss in human experience generating new matters of philosophical discourse Superlatives abound But Whitehead cautions us to attend to their multiplicity The mutual immanence of events constantly generates new constellations of importance and so superlatives because they are contingent upon unstable modes of togetherness cannot be taken for granted Any of these concepts may have a particular significance today but as events coalesce into new constellations those ideals will continue to take on new meaning

Greening Philosophy of Religion Jea Sophia Oh, John Quiring, 2024-07-08 Greening Philosophy of Religion Process Ecology and Ethics develops fruitful avenues for the theory and practice of greening philosophy of religion

Collected with a pluralistic conception of both philosophy and religion the chapters in this volume address pressing and timely issues that involve imagining ecological democracy as an ideal horizon for facing climate catastrophe with a radical hope and sober vision for realizing a more sustainable planetary economy that places a high value on food sovereignty an ethic of trust and inter religious conversations Edited by Jea Sophia Oh and John Quiring this book offers a vital contribution to the fields of philosophy of religion environmental ethics religion and ecology comparative philosophy and ecotheology all tuned to the note of process thinking and a deep ecological sensibility *The Image of the Unseen God* Hosinski, Thomas E.,2017-08-17
