NBS Special Publication ,1965 *Computer Literature Bibliography* W. W. Youden,1965 Roadmapping Future Tuğrul U. Daim,2021-03-16 This volume presents a portfolio of cases and applications on technology roadmapping TRM for products and services It provides a brief overview on criteria or metrics used for evaluating the success level of TRM and then offers six case examples from sectors such as transportation smart technologies and household electronics A new innovation in this book is a section of detailed technology roadmap samples that technology managers can apply to emerging technologies Education and Technological Unemployment Michael A. Peters,Petar Jandrić,Alexander J. Means,2019-04-29 This book examines the challenge of accelerating automation and argues that countering and adapting to this challenge requires new methodological philosophical scientific sociological economic ethical and political perspectives that fundamentally rethink the categories of work and education What is required is political will and social vision to respond to the question What is the role of education in a digital age characterized by potential mass technological unemployment Today's technologies are beginning to cost more jobs than they create and this trend will continue There have been many proposed

solutions to this problem and they invariably involve an educational vision Yet in a world that simply doesn't offer enough work for everyone education is clearly not a panacea for technological unemployment This collection presents responses to this question from a wide spectrum of disciplines including but not limited to education studies philosophy history politics sociology psychology and economics
