Introduction

Computers are a part of most people's day-to-day life. Did you know that new cars have more than 50 computers? According to wikipedia.org, a computer is a machine for manipulating data according to a list of instructions known as a program. Everybody needs to know something about computers. In this tutorial, we provide an overview of what makes computers tick. After reading this tutorial, you should be able to:

- Name the main components of a computer
- Understand what a bit and byte means
- Be able to convert a number in base-10 to a base-2 number (i.e., convert a number from decimal to binary)
- You should know how data is saved on disk drives
- You should know what it means to develop a program
- Understand what an operating system does on a computer
