Rubin,2020-08-25 Whenever socialism has been tried it has led to failure and often great human misery Nonetheless many young people prefer socialism to capitalism There are dozens of books and articles explaining the failures of socialism but these do not seem to have an impact on students One reason for this may be that the books are written in abstract terms

and do not relate to the lives of the readers This book takes a different approach It asks the question What will my life be like if I live under socialism Professor Paul Rubin a leading expert on socialism and capitalism shows that under socialism People will be poorer There will be less freedom Goods will be of lower quality but more expensive There will be less innovation The environment will be in worse shape He also shows that the U S is the most productive and richest country that has ever existed and that the current level of wealth in the U S is due to capitalism Lastly he demonstrates that many critiques of capitalism such as it leads to excessive inequality are mistaken or ill founded Professor Rubin points out an important paradox The young people who are the sharpest critics of capitalism are themselves highly dependent in their daily lives on the products of capitalism These include computers themselves mobile phones Amazon Facebook Instagram Uber Skype Spotify computer games and almost any other modern product Additionally the creators of these products are among the millionaires and billionaires despised by socialists *Successful Project Management* Jack Gido, James P.
