Dipse,2024-06-24 The evidence is overwhelming that the protection and expansion of slavery was a primary reason for the secession of the Confederate states and the Civil War that followed While slavery undoubtedly was important a more fundamental cause was a belief system held in common among the ruling elite The antebellum South was not only a slave society but also an authoritarian society shaped by a view of the world as dangerous competitive an us vs them mentality a dominance obedience orientation and closed mindedness The authoritarianism of the founding elites in combination with the travails they experienced on the Southern frontiers led to oppression racism and corruptions in thinking emotion and behavior It also perpetuated the practice of slavery sparked the Civil War and left a difficult legacy In a unique application of contemporary social psychological theory and research to the interpretation of history this book traces the evolution of Southern authoritarianism from the founding of Virginia in 1606 to the secession of the Confederate states in 1861 In doing so it examines how belief systems become embedded in a society act as both consequences and causes of historical events and have effects that reverberate far into the future **Republican Party Politics and the American South, 1865-1968** Boris Heersink,Jeffery A. Jenkins,2020-03-19 In Republican Party Politics and the American South 1865 1968 Heersink and Jenkins examine how National Convention politics allowed the South to remain important to the Republican Party after Reconstruction and trace how Republican organizations in the South changed from biracial coalitions to mostly all white ones over time Little research exists on the GOP in the South after Reconstruction and before the 1960s Republican Party Politics and the American South 1865 1968 helps fill this knowledge gap Using data on the race of Republican convention delegates from 1868 to 1952 the authors explore how the whitening of the Republican Party affected its vote totals in the South Once states passed laws to disenfranchise blacks during the Jim Crow era the Republican Party in the South performed better electorally the whiter it became These results are important for understanding how the GOP emerged as a competitive and ultimately dominant electoral party in the late twentieth century South **Science, Race, and Religion in the American South** Lester D. Stephens,2003-07-11 In the decades before the

Civil War Charleston South Carolina enjoyed recognition as the center of scientific activity in the South By 1850 only three other cities in the United States Philadelphia Boston and New York exceeded Charleston in natural history studies and the city boasted an excellent museum of natural history Examining the scientific activities and contributions of John Bachman Edmund Ravenel John Edwards Holbrook Lewis R Gibbes Francis S Holmes and John McCrady Lester Stephens uncovers the important achievements of Charleston s circle of naturalists in a region that has conventionally been dismissed as largely devoid of scientific interests Stephens devotes particular attention to the special problems faced by the Charleston naturalists and to the ways in which their religious and racial beliefs interacted with and shaped their scientific pursuits In the end he shows cultural commitments proved stronger than scientific principles When the South seceded from the Union in 1861 the members of the Charleston circle placed regional patriotism above science and union and supported the Confederate cause The ensuing war had a devastating impact on the Charleston naturalists and on science in the South The Charleston circle never fully recovered from the blow and a century would elapse before the South took an equal role in the pursuit of mainstream scientific research
