The Anatomical Works Of George Stubbs:

The Anatomical Works of George Stubbs George Stubbs,1975 **The Anatomical Works of George Stubbs** George Stubbs,Terence Doherty,1975 George Stubbs, Painter Judy Egerton,George Stubbs,2007-01-01 George Stubbs is one of the greatest of British eighteenth century painters with a deep and unaffected sympathy for country life and the English countryside This fully illustrated book outlines his career followed by a catalogue raisonne the first since Sir Walter Gilbey s short listing of 1898 of all his known works One of the stickiest labels in the history of British art attached itself to Stubbs as Mr Stubbs the horse painter Over half of his paintings were of horses each founded on the pioneering observations assembled in 1766 in his book *The Anatomy of the Horse* but Stubbs s wide ranging subjects included portraits conversation pieces and paintings of exotic animals from the Zebra to the Rhinoceros as well as an extraordinarily sympathetic series of portraits of dogs **Anatomical works of George Stubbs (the).** T. Doherty,1973 **The Anatomist Anatomist'd** Andrew Cunningham,2016-12-05 The eighteenth century practitioners of anatomy saw their own period as the perfection of anatomy This book looks at the investigation of anatomy in the long eighteenth century in disciplinary terms This means looking in a novel way not only at the practical aspects of anatomizing but also at questions of how one became an anatomist where and how the discipline was practised what the point was of its practice what counted as sub disciplines of anatomy and the nature of arguments over anatomical facts and priority of discovery In particular pathology generation and birth and comparative anatomy are shown to have been linked together as sub disciplines of anatomy At first sight anatomy seems the most long lived and stable of medical disciplines from Galen and Vesalius to the present But Cunningham argues that anatomy was like so many other areas of knowledge changed irrevocably around the end of the eighteenth century with the creation of new disciplines new forms of knowledge and new ways of investigation The long eighteenth century therefore was not only the highpoint of anatomy but also the endpoint of old anatomy *Life of George Stubbs, R.A.* ,1898 Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1971 Picturing Animals in Britain, 1750-1850 Diana Donald,2007-01-01 From fine art paintings by such artists as Stubbs and Landseer to zoological illustrations and popular prints a vast array of animal images was created in Britain during the century from 1750 to 1850 This highly original book investigates the rich meanings of these visual representations as well as the ways in which animals were actually used and abused What Diana Donald discovers in this fascinating study is a deep and unresolved ambivalence that lies at the heart of human attitudes toward animals The author brings to light dichotomies in human thinking about animals throughout this key period awestruck with the beauty and spirit of wild animals people nevertheless desired to capture and tame them the belief that other species are inferior was firmly held yet at the same time animals in stories and fables were given human attributes though laws against animal cruelty were introduced the overworking of horses and the allure of sport hunting persisted

Animals are central in cultural history Donald concludes and compelling questions about them then and now remain unanswered

Bibliography of the History of Medicine ,1979 Beasts of Burden Ron Broglio,2017-01-30 In *Beasts of Burden* Ron Broglio examines how lives human and animal were counted in rural England and Scotland during the Romantic period During this time Britain experienced unprecedented data collection from censuses ordinance surveys and measurements of resources all used to quantify the life and productivity of the nation It was the dawn of biopolitics the age in which biological life and its abilities became regulated by the state Borne primarily by workers and livestock nowhere was this regulation felt more powerfully than in the fields commons and enclosures Using literature art and cultural texts of the period Broglio explores the apparatus of biopolitics during the age of Adam Smith and Thomas Malthus He looks at how data collection turned everyday life into citizenship and nationalism and how labor class poets and artists recorded and resisted the burden of this new biopolitical life The author reveals how the frictions of material life work over and against designs by the state to form a unified biopolitical Britain At its most radical this book changes what constitutes the central concerns of the Romantic period and which texts are valuable for understanding the formation of a nation its agriculture and its rural landscapes

The Learned Draftsman Édouard Kopp,2017-01-10 The celebrated French artist Edme Bouchardon 1698 1762 is primarily known as a sculptor today but his contemporaries widely lauded him as a draftsman as well Talented highly innovative and deeply invested in the medium Bouchardon made an important contribution to the European art and culture of his time and in particular to the history of drawing Around two thousand of his drawings survive most of which bear no relation conceptual or practical to his sculpture yet remarkably little scholarly attention has been paid to this aspect of his oeuvre This is the first book length work devoted to the artist s draftsmanship since 1910 Ambitious in scope this volume offers a compelling narrative that effectively covers four decades of Bouchardon s activity as a draftsman from his departure for Rome in 1723 as an aspiring student to his death in Paris in 1762 by which time he was one of the most renowned artists in Europe His accomplished and dynamic style is analyzed and copiously illustrated in a series of five interrelated chapters that serve as case studies each of which focuses on a coherent group of drawings from a particular period of Bouchardon s career

The Feminism and Visual Culture Reader Amelia Jones,2003 Challenging the notion of feminism as a unified discourse this book assembles writings that address art film architecture popular culture new media and other visual fields from a feminist perspective The book combines classic texts with six newly commissioned pieces Articles are grouped into thematic sections each introduced by the editor Providing a framework within which to understand the shifts in feminist thinking in visual studies as well as an overview of major feminist theories of the visual this reader also explores how issues of race class nationality and sexuality enter into debates about feminism in the field of the visual book cover

Darwin and Theories of

Aesthetics and Cultural History Barbara Larson, Sabine Flach, 2013-01-01 Darwin and Theories of Aesthetics and Cultural History is a significant contribution to the fields of theory Darwin studies and cultural history This collection of eight essays is the first volume to address from the point of view of art and literary historians Darwin s intersections with aesthetic theories and cultural histories from the eighteenth century to the present day Among the philosophers of art influenced by Darwinian evolution and considered in this collection are Alois Riegl Ruskin and Aby Warburg This stimulating collection ranges in content from essays on the influence of eighteenth century aesthetic theory on Darwin and nineteenth century debates circulating around beauty to the study of evolutionary models in contemporary art *Blake, Lavater, and Physiognomy* Sibylle Erle, 2017-12-02 William Blake never travelled to the continent yet his creation myth is far more European than has ever been acknowledged The painter Henry Fuseli introduced Blake to traditional European thinking and Blake responded to late 18th century body theory in his *Urizen* books 1794 95 which emerged from his professional work as a copy engraver on Henry Hunter s translation of Johann Caspar Lavater s *Essays on Physiognomy* 1789 98 Lavater s work contains hundreds of portraits and their physiognomical readings Blake Fuseli Joshua Reynolds and their contemporaries took a keen interest in the ideas behind physiognomy in their search for the right balance between good likeness and type in portraits Blake Lavater and *Physiognomy* demonstrates how the problems occurring during the production of the Hunter translation resonate in Blake s treatment of the Genesis story Blake takes us back to the creation of the human body and interrogates the idea that God created man after his own likeness He introduces the Net of Religion a device which presses the human form into material shape giving it personality and identity As Erle shows Blake s startlingly original take on the creation myth is informed by Lavater s pursuit of physiognomy the search for divine likeness traced in the faces of their contemporary men

Fossil Horses Bruce J. MacFadden, 1994-06-24 The horse has frequently been used as a classic example of long term evolution because it possesses an extensive fossil record This book synthesizes the large body of data and research relevant to an understanding of fossil horses from perspectives such as biology geology paleontology *A Spirit of Dialogue* Christopher N. Okonkwo, 2008 A groundbreaking study *A Spirit of Dialogue* examines through extensive interdisciplinary research theory and close reading the intricate reconstructions extensions and resonances of the West African myth of spirit children the Born to Die in contemporary African American neo slave narratives Arguing that the myth called Ogbaje in Igbo language and b k in Yoruba has had over thirty years of uncharted presence in African American literature Okonkwo advances a compelling case absent in extant scholarship He traces Ogbaje the Born to Die s appearance in African American texts to a convergence of factors They include but are not limited to the impact of Chinua Achebe s *Things Fall Apart* the 1960s emergence of the contemporary neo slave narrative the 1960s and 1970s black consciousness Black Power movement and the cultural agenda gendered politics and centripetal philosophy of the Black Arts movement s nationalist aesthetic African American identity questions of the post civil rights and the multicultural eras and the thematic

shifts as well as the African diaspora orientation of African American fiction of the post nationalist aesthetic period A Spirit of Dialogue focuses on the sometimes neglected and understudied works of four canonical African American writers Octavia E Butler's Wild Seed and Mind of My Mind Tananarive Due's The Between John Edgar Wideman's The Cattle Killing and Toni Morrison's Sula and Beloved Okonkwo demonstrates persuasively how the mythic spirit child informs the content and form of these novels offering Butler Due Wideman and Morrison a non occidental code by which to engage collectively with the various issues integral to the history experience of African descended people The paradigm functions then as the nexus of a life affirmative dialogue among the six novels as well as between them and other works of African religious and literary imagination particularly Things Fall Apart and Ben Okri's The Famished Road
