culture conform to practices seen by eighteenth century Spaniards Only four in situ observations of Lipan Apache culture survive observations made by a Spanish priest a Spanish military officer a Swiss botanist and an Anglo captive Each source reveals fascinating insights into a hitherto unseen world of Lipan beliefs and practices The sources reported for example that the Lipans were able to predict both solar and lunar eclipses a practice which went far beyond the vision quest posited by Opler The Light Gray People seeks to complete a comparative analysis of traditional Lipan Apache culture as seen through the eyes of four eighteenth and nineteenth century observers and Morris Opler s theories

Early History of the Israelite People Thompson, 2024-07-15 Through a review of historical scholarship of the past century and an analysis of data drawn from archaeological excavations and surveys and from written and historical records from the late second and early first millennium the author reconstructs the historical basis of Israel s origins within the contexts of geography anthropology and sociology Thompson argues that none of the traditional models for the origin of biblical Israel in terms of conquest peaceful settlement or revolution are viable The indigenous nature of the Israelite people has roots that lead back to the late Neolithic period The Iron I period is not the period in which the origins of Israel are to be sought Rather the geographical and regional expansion of settlements in this period reflects an economic response to drought conditions that affected the entire East Mediterranean basin The ninth and eighth century states of Samaria and Jerusalem had separate and independent origins rooted in the development of a Mediterranean economy and an expansion of trade brought about by Assyrian interests The development of the ethnic concept of biblical Israel with its roots in the United Monarchy finds its context in history first at the time of the Persian renaissance guided by the theological concepts of exile and restoration Finally Thompson argues that biblical Israel is historically the creation of the tradition itself in the Persian period and attempts to outline both a historical context and an interpretative matrix for the Bible
