The History of Childhood Lloyd deMause,1995-06-01 from the Foreword Possibly the heartless treatment of children from the practice of infanticide and abandonment through to the neglect the rigors of swaddling the purposeful starving the beatings the solitary confinement and so on was and is only one aspect of the basic aggressiveness and cruelty of human nature of the inbred disregard of the rights and feelings of others Children being physically unable to resist aggression were the victims of forces over which they had no control and they were abused in many imaginable and some almost unimaginable ways by way of expressing conscious or more commonly unconscious motives of their elders The present volume abounds in evidence of all kinds from all periods and peoples The story is monotonously painful but it is high time that it should be told and that it should be taken into account

Festival of the Poor Jane C. Schneider,Peter T. Schneider,2022-08-16 The historical decline of fertility in Europe has occupied a central place in social history and demography over the past quarter century Most scholars credit Europeans with modulating sexual behavior through either abstinence or the practice of coitus interruptus as a rational choice made in the interest of personal economic comfort yet peasant and working classes have typically lagged behind in birth control and have given rise to the adage that sexual embrace is the festival of the poor Scholarly analyses of lag often reinforce this stigmatizing view Now this subject is given a fresh look through a case study in

Sicily one of the last outposts of Western Europe's demographic transition By examining population changes in a single community between 1860 and 1980 the authors offer an extended review and critique of existing models of fertility decline in Europe proposing a new interpretation that emphasizes historical context and class relations They show how the spread of capitalism in Sicily induced an unprecedented rate of population growth with boom and bust cycles creating the class experiences in which reputational networks came to redefine family life how Sicilians began to control their fertility in response to class mediated ideas about gender relations and respectable family size and how the town's gentry artisan and peasant classes adopted family planning methods at different times in response to different pressures Jane and Peter Schneider's anthropologically oriented political economy perspective challenges the position of Western Europe as a model for fertility decline on which every other case should converge looking instead at the diversity of cultural ideals and practices such as those found in Sicily that influence the spread and form of birth control Combining anthropological oral historical and archival methods in new and insightful ways the authors synthesis of a particular case study with a broad historical and theoretical discussion will play a major role in the ongoing debates over the history of European fertility decline and point the way toward integrating the analysis of demographic upheaval with the study of class formation and ideology
