The Architecture Of Man Personal:

Modernism and the Architecture of Private Life Victoria Rosner, 2005 In the late 19th century the conventions of domesticity came under scrutiny by British writers others intent on bringing a modern spirit into the home Rosner reveals the connections between those who elegantly synthesized modernist literature with architectural plans room designs decorative art

The Architecture of Law Brian M. McCall, 2018-05-30 This book argues that classical natural law jurisprudence provides a superior answer to the questions What is law and How should law be made rather than those provided by legal positivism and new natural law theories What is law How should law be made Using St Thomas Aquinas s analogy of God as an architect Brian McCall argues that classical natural law jurisprudence provides an answer to these questions far superior to those provided by legal positivism or the new natural law theories The Architecture of Law explores the metaphor of law as an architectural building project with eternal law as the foundation natural law as the frame divine law as the guidance provided by the architect and human law as the provider of the defining details and ornamentation Classical jurisprudence is presented as a synthesis of the work of the greatest minds of antiquity and the medieval period including Cicero Aristotle Gratian Augustine and Aquinas the significant texts of each receive detailed exposition in these pages Along with McCall s development of the architectural image he raises a question that becomes a running theme throughout the book To what extent does one need to know God to accept and understand natural law jurisprudence given its foundational premise that all authority comes from God The separation of the study of law from knowledge of theology and morality McCall argues only results in the impoverishment of our understanding of law He concludes that they must be reunited in order for jurisprudence to flourish This book will appeal to academics students in law philosophy and theology and to all those interested in legal or political philosophy

Public Man, Private Woman Jean Bethke Elshtain, 2020-07-21 Focusing on the Western philosophical tradition and the work of contemporary feminists Jean Elshtain explores the general tendency to assert the primacy of the public world the political sphere dominated by men and to denigrate the private world the familial sphere dominated by women She offers her own positive reconstruction of the public and the private in a feminist theory that reaffirms the importance of the family and envisions an ethical polity

Architecture From the Outside In Robert Gutman, 2012-04-17 Architecture and sociology have been fickle friends over the past half century in the 1960s architects relied on sociological data for design solutions and sociologists were courted by the most prestigious design schools to lecture and teach Twenty years later at the height of postmodernism it was passe to be concerned with the sociological aspects of architecture Currently the rising importance of sustainability in building not to mention an economical crisis brought on in part by a real estate bubble have forced architects to consider themselves in a less autonomous way perhaps bringing the profession full circle back to a close relationship with sociology Through all these rises and dips Robert Gutman was a strong and steady voice for both architecture and sociology Gutman a sociologist by training infiltrated

architecture's ranks in the mid 1960s and never looked back. A teacher for over four decades at Princeton's School of Architecture, Gutman wrote about architecture and taught generations of future architects all while maintaining an outsider status that allowed him to see the architectural profession in an insightful unique way. *The Architecture Co-laboratory* Kas Oosterhuis, Lukas Feireiss, 2006. The Architecture of the City Aldo Rossi, 1984-09-13. Aldo Rossi was a practicing architect and leader of the Italian architectural movement La Tendenza and one of the most influential theorists of the twentieth century. *The Architecture of the City* is his major work of architectural and urban theory. In part a protest against functionalism and the Modern Movement, in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study, and in part an analysis of the rules and forms of the city's construction, the book has become immensely popular among architects and design students. *Architecture*, 1908. *The Architecture under King Ludwig II - Palaces and Factories* Andres Lepik, Katrin Bäuml, 2018-09-10. Ludwig II of Bavaria 1864-1886 is more internationally known for his royal palaces than hardly any other regent of the 19th century. They are the symbol of a personal architectural vision which to this day fascinates people from all over the world. However, the fame of his palaces has eclipsed other construction activities in the Kingdom of Bavaria: urban developments, hospitals and schools, theatres and museums, but also factories, railway stations, apartment blocks, churches and synagogues were created under his regency. This book, for the first time, sheds light on the broad architectural activities in this epoch. Essays and overview illustrations of the building projects of the time provide insights into the diversity of the then building culture and at the same time open up a new perspective on the royal palaces.

Digital Personality: A Man Forever Kuldeep Singh Kaswan, Jagjit Singh Dhatteerwal, Anand Nayyar, 2024-06-21. This book delves into the very core of our digital existence, unearthing the essence of a digital persona. It's a realm where authenticity meets multiplicity as we decipher the nuanced art of crafting and managing our online identities. We confront issues of privacy and ethics, exploring the profound impact of our digital footprints on our lives and society. The integration of AI paves the way for an intriguing future with predictions that challenge our understanding of self in the digital age. Welcome to a world where your digital personality is more than just data; it's a reflection of who you are and who you can be. The main goal of this book is to enable more seamless and natural human-computer interaction. This will provide better personalized experience. Further, this will influence the performance of the user wherein they will have the support of the machines to achieve their tasks in the most efficient way. This book is the first of its kind in introducing Digital Personality. It provides an overview of the character dimensions and how state-of-the-art technologies would accommodate such a research field. It includes novel representation of character from various perspectives. It also provides instances of applications of this emerging research field. *Princeton Alumni Weekly*, 1961. **Experiencing Architecture in the Nineteenth Century**

Edward Gillin, H. Horatio Joyce, 2018-10-18 Bringing together fourteen original essays this collection opens up new perspectives on the architectural history of the nineteenth century by examining the buildings of the period through the lens of experience With a focus on the experience of the ordinary building user rather than simply on the intentions of the designer the book shows that new and important insights can be brought to our understanding of Victorian architecture The chapters present a range of ideas and new research some examining individual building case studies from grand hotels and clubhouses in New York to the parliament buildings of Westminster and others exploring conceptual questions about the nature of architectural experience whether sensory or otherwise Yet they share the premise that the idea of the experience of architecture took on a new and particular significance with the rise of industrial modernity and they examine what contemporary people both architects and non architects understood by this idea The insights in this volume extend beyond the study of Victorian architecture Together they suggest how experience might be used as a framework to produce a more convincingly historical account of the artefacts of architectural history
