The Architecture Of The French Enlightenment:

The Architecture of the French Enlightenment Allan Braham, 1989-01-01 Allan Braham's comprehensive treatment of this brilliant and complex period introduces the reader to the major buildings, architects and architectural patrons of the day. At the same time it explores the broader determinants of architectural production: the rapid economic expansion of Paris and the main provincial centers and the increasing demand for improved public amenities: theaters, schools, markets and hospitals. This generously illustrated book provides a vivid commentary on society and manners in pre-Revolutionary France.

Symbolic Space Richard A. Etlin, 1996-12-15 Richard A. Etlin demonstrates how the conceptual basis of the modern house and the physical layout of the modern city emerged from debates among theoretically innovative French architects of the eighteenth century. Examining a broad range of topics from architecture and urbanism to gardening and funerary monuments, he reconsiders eighteenth-century French architecture with regard to the ways in which it was informed by symbolic space. This book provides an accessible introduction to a century of architecture that transformed the classical forms of the Renaissance and Baroque periods into building types still familiar today.

The Architecture of Paris Andrew Ayers, 2004 The author here presents an architectural history of Paris stretching from the 3rd century BC up until the end of the 20th century.

Architecture of the French Enlightenment, with 424 illustrations A. Braham, 1980 *French Architects and Engineers in the Age of Enlightenment* Antoine Picon, 2009-12-17 This book offers a unique insight to the teaching and practice of architects and engineers.

Architecture of France David A. Hanser, 2005-12-30 Covering all regions of France from Avignon's Palace of the Popes to Versailles, Petit Trianon and all periods of French architecture from the Roman theater at Orange to the Arc de Triomphe in Paris, this volume examines more than 60 of France's most important architectural landmarks. Writing in a clear and engaging style, David Hanser, professor of architecture at Oklahoma State University, describes the features, functions and historical importance of each structure. Besides identifying location, style, architects and periods of initial construction and major renovation, the cross-referenced and illustrated entries also highlight architectural and historical terms explained in the Glossary and conclude with a useful listing of further readings. The volume also offers ready reference lists of entries by location, architectural style and time period as well as a general bibliography, a subject index and a detailed introductory overview of French architecture. Entries cover major architectural structures as well as smaller sites including everything from the Cathedral of Notre Dame to Metro subway stations. Ideal for college and high school students alike, this comprehensive look at the architecture of France is an indispensable addition to any shelf.

Architecture and Justice Jonathan Simon, 2016-04-15 Bringing together leading scholars in the fields of criminology, international law, philosophy and architectural history and theory, this book examines the interrelationships between architecture and justice, highlighting the provocative and curiously ambiguous juncture between the two. Illustrated by a range of disparate and diverse case studies, it draws out the formal language of justice and extends the effects that

architecture has on both the place of and the individuals subject to justice With its multi disciplinary perspective the study serves as a platform on which to debate the relationships between the ceremonial legalistic administrative and penal aspects of justice and the spaces that constitute their settings The structure of the book develops from the particular to the universal from local situations to the larger city and thereby examines the role that architecture and urban space play in the deliberations of justice At the same time contributors to the volume remind us of the potential impact the built environment can have in undermining the proper juridical processes of a socio political system Hence the book provides both wise counsel and warnings of the role of public civic space in affirming our sense of a just or unjust society

Architectures of Life and Death Andrej Radman, Stavros Kousoulas, 2021-06-17 Driven by the Foucauldian attitude of subsuming architectural history into a genealogy of techne Architectures of Life and Death advances a transdisciplinary approach rethinking subjectivity and exploring the political ramifications of these processes for the discipline of architecture and beyond In contrast to mainstream approaches architecture will not be seen as representative of culture but as the mechanism of culture the collective equipment that rests on the reciprocal determination of social habits and technological habitats In this sense the idea that we shape our environments therefore they shape us is not to be taken as a metaphor The animate has always been utterly dependent on the inanimate A livable habitat is one which the inhabitant actively co evolves with and which does not constitute a ready made condition to which the inhabitant would simply have to passively adapt

Architectural Space in Eighteenth-Century Europe Meredith Martin, 2017-07-05 Architectural Space in Eighteenth Century Europe Constructing Identities and Interiors explores how a diverse pan European group of eighteenth century patrons among them bankers bishops bluestockings and courtesans used architectural space and decor to shape and express identity Eighteenth century European architects understood the client's instrumental role in giving form and meaning to architectural space In a treatise published in 1745 the French architect Germain Boffrand determined that a visitor could judge the character of the master for whom the house was built by the way in which it is planned decorated and distributed This interdisciplinary volume addresses two key interests of contemporary historians working in a range of disciplines one the broad question of identity formation most notably as it relates to ideas of gender class and ethnicity and two the role played by different spatial environments in the production not merely the reflection of identity at defining historical and cultural moments By combining contemporary critical analysis with a historically specific approach the book's contributors situate ideas of space and the self within the visual and material remains of interiors in eighteenth century Europe In doing so they offer compelling new insight not only into this historical period but also into our own

French Architecture Stephen Bayley, Belinda Thomson, 1980 **Classical Architecture for the Twenty-first Century** J. François Gabriel, 2004 A richly illustrated carefully explained introduction to classical architecture Highly recommended Choice Architecture and the Politics of Gender in Early Modern Europe Helen Hills, 2018-05-08 Written by

leading scholars in the field the essays in this book address the relationships between gender and the built environment specifically architecture in early modern Europe In recent years scholars have begun to investigate the ways in which architecture plays a part in the construction of gendered identities So far the debates have focused on the built environment of the nineteenth and twentieth centuries to the neglect of the early modern period This book focuses on early modern Europe a period decisive for our understanding of gender and sexuality Much excellent scholarship has enhanced our understanding of gender division in early modern Europe but often this scholarship considers gender in isolation from other vital factors especially social class Central to the concerns of this book therefore is a consideration of the intersections of gender with social rank Architecture and the Politics of Gender in Early Modern Europe makes a major contribution to the developing analysis of how architecture contributes to the shaping of social relations especially in relation to gender in early modern Europe

The Aesthetics of Architecture Roger Scruton, 2021-12-07 A landmark account of architectural theory and practice from acclaimed philosopher Roger Scruton Architecture is distinguished from other art forms by its sense of function its localized quality its technique its public and nonpersonal character and its continuity with the decorative arts In this important book Roger Scruton calls for a return to first principles in contemporary architectural theory contending that the aesthetic of architecture is in its very essence an aesthetic of everyday life Aesthetic understanding is inseparable from a sense of detail and style from which the appropriate the expressive the beautiful and the proportionate take their meaning Scruton provides incisive critiques of the romantic functionalist and rationalist theories of design and of the Freudian Marxist and semiological approaches to aesthetic value In a new introduction Scruton discusses how his ideas have developed since the book's original publication and he assesses the continuing relevance of his argument for the twenty first century

Précis of the Lectures on Architecture Jean-Nicolas-Louis Durand, 2000-01-01 Jean Nicolas Louis Durand 1760 1834 regarded the Précis of the Lectures on Architecture 1802 5 and its companion volume the Graphic Portion 1821 as both a basic course for future civil engineers and a treatise Focusing the practice of architecture on utilitarian and economic values he assailed the rationale behind classical architectural training beauty proportionality and symbolism His formal systematization of plans elevations and sections transformed architectural design into a selective modular typology in which symmetry and simple geometrical forms prevailed His emphasis on pragmatic values to the exclusion of metaphysical concerns represented architecture as a closed system that subjected its own formal language to logical processes Now published in English for the first time the Précis and the Graphic Portion are classics of architectural education

The Spiritual Rococo Gauvin Alexander Bailey, 2017-07-05 A groundbreaking approach to Rococo religious art and spirituality in Europe and South America The Spiritual Rococo addresses three basic conundrums that impede our understanding of eighteenth century aesthetics and culture Why did the Rococo ostensibly the least spiritual style in the pre Modern canon transform into one of the world's most important modes for adorning sacred spaces And why is Rococo still treated as a

decadent nemesis of the Enlightenment when the two had fundamental characteristics in common This book seeks to answer these questions by treating Rococo as a global phenomenon for the first time and by exploring its moral and spiritual dimensions through the lens of populist French religious literature of the day a body of work the author calls the Spiritual Rococo and which has never been applied directly to the arts The book traces Rococo s development from France through Central Europe Portugal Brazil and South America by following a chain of interlocking case studies whether artistic literary or ideological and it also considers the parallel diffusion of the literature of the Spiritual Rococo in these same regions placing particular emphasis on unpublished primary sources such as inventories One of the ultimate goals of this study is to move beyond the cliché of Rococo s frivolity and acknowledge its essential modernity Thoroughly interdisciplinary The Spiritual Rococo not only integrates different art historical fields in novel ways but also interacts with church and social history literary and post colonial studies and anthropology opening up new horizons in these fields
