The Architecture Of The Washington Dc Convention Center An Exercise In Urban Infrastructure:

The Architecture of the Washington Convention Center, Washington, D.C. Deborah Dietsch, 2006 [Advances in Human Factors in Architecture, Sustainable Urban Planning and Infrastructure](#) Jerzy Charytonowicz, Christianne Falcão, 2019-06-03

This book discusses human factors research directed towards realizing and assessing sustainability in the built environment and architecture. It reports on advanced engineering methods for sustainable infrastructure design, architecture as well as on assessments of the efficient methods and the social, environmental, and economic impact of various designs and projects. The book covers a range of topics including the use of recycled materials in architecture, ergonomics in buildings and public design, sustainable design for smart cities, design for the aging population, industrial design, human scale in architecture, and many more. Based on the AHFE 2019 International Conference on Human Factors in Architecture, Sustainable Urban Planning and Infrastructure held on July 24-28, 2019, in Washington D.C., USA, it offers various perspectives on sustainability and ergonomics. As such, it is a valuable reference resource for designers, urban engineers, architects, infrastructure professionals, public infrastructure owners, policy makers, government engineers and planners, as well as operations managers and academics active in urban and infrastructure research.

[Sustainable Urban and Regional Infrastructure Development: Technologies, Applications and Management](#) Yigitcanlar, Tan, 2010-05-31

This book aims to bridge the gap in the current literature by addressing the overall problems present in major infrastructure in society and the technologies that may be applied to overcome these problems. Provided by publisher.

Handbook on Urban Sustainability Nolberto Munier, 2006

Municipal authorities and agencies around the world are striving to place their cities on the road to sustainability. Cities as very complex entities offer a constant interaction between people, resources, and the environment. This makes strategic planning demanding and difficult. This book, written by worldwide specialists from Canada, India, Italy, Palestine, Peru, Spain, and the Netherlands, is a guide to establishing a city on a sustainable path. It addresses sustainable urban planning issues by breaking the city down to its main components. The authors analyze and discuss such topics as urban social and economic factors, including immigration and cultural integration, the gender component, the formation of slums, and social indicators, the interaction of the city with the environment, including the Environmental Impact Assessment (EIA), urban and regional economics, including specialization and dependency, asset management, and community facilities, the relationship of a city within its region, urban planning, including urban sprawl and core revitalization, housing and relocation, including such concepts as community participation, degradation, and measures to reverse this situation, energy needs, transportation management, basic infrastructural services, the generation and disposal of waste and water in the region, a city's preparedness, including risk analysis and contingency plans, urban reconstruction after disasters. The concluding chapters provide a what to do and how to do it practical roadmap for implementing a sustainability program. This volume belongs in the library of every serious city planner and policy maker committed to building a future that works for us all. Mathis

Emerging Urbanity Richard Marshall, 2013-09-05 Discussions on the global economy focus on the hyper mobility of capital the possibility of instantaneous transmission of information and money around the globe the centrality of information outputs to our economic systems and emphasise the neutralisation of geography and of places What is ignored however is that even the most advanced information industries need a material infrastructure of buildings and work processes and considerable agglomeration in order to operate in global markets Further the globalisation of economic activity has brought with it not only a vast dispersal of offices and factories but also a growing importance of central functions to manage and coordinate such worldwide networks of activities

The development of global urban projects is one manifestation of this move towards centrality in urban situations. These large scale urban projects are the result of governments seeking competitive advantage in the global economy. They are critical components of a nation's global infrastructure. In the booming economies of the Asia Pacific Rim prior to the Asian Economic Crisis these urban developments were seen as key components of national economic policies. In their making they require a conscious effort to arrange material infrastructure and reinforce that there is a role for urban design in this making.

Emerging Urbanity is an exploration of this role in nine global urban projects in the Asia Pacific Rim. *Social Issues in America* James Ciment, 2015-03-04. The factors that determine growth at the industry level are different for innovative versus mature industries. Growth industries rely on high quality workers access to capital technical change and numerous forms of collected economies. Mature industries concentrate on low input costs and minimizing costs for wages transportation taxes material etc. This approach is adopted here to consider the growth and development of metropolitan economies. In twelve chapters eminent scholars provide a complete review of what works and what doesn't in generating economic development. What are the potential and the reality of producer services suburban business centers enterprise zones technology based ventures and industrial incubators. How can economic development policy improve the incubator effect. Is there a nationwide venture capital network. What are the locational requirements of firms in high growth industries. Finally what are the consequences of failed growth. Energy Research Abstracts, 1980-06. [Urban Land](#), 1994. [Street-Level Architecture](#) Conrad Kickert, Hans Karssenber, 2022-08-04. This book provides the tools to maintain and rebuild the interaction between architecture and public space. Despite the best intentions of designers and planners interactive frontages have dwindled over the past century in

Europe and North America This book demonstrates why even our best intentions for interactive frontages are currently unable to turn a swelling tide of economic and technological evolution land consolidation introversion stratification and contagious decline It uses these lessons to offer concrete locational programming design and management strategies to maximize street level interaction and trust between street level architecture its inhabitants and the city This book demonstrates that designers developers planners and managers ultimately have to create the right preconditions for inhabitants and passersby to bring frontages to life These preconditions connect architecture to its urban social economical and technological context Only the right frontage in the right context with the right design the right inhabitation and the right attitude to the city will become part of the ecosystem of trust and interaction that supports public life This book empowers the many participants in this ecosystem to build inhabit and enjoy truly urbane architecture *Progressive Architecture* ,1978
