A white, rectangular object, possibly a piece of paper or a small sign, is attached to one of the branches on the left side. The background shows a body of water, likely a lake or a wide river, with a forested shoreline in the distance. The sky is overcast and grey.

A strong emphasis on pathophysiology and a body systems approach encourages understanding of the disease process and accurate assessment findings. The easy to follow full color design and comprehensive and logical format promote student learning of essential nursing concepts. Each body system section contains a separate assessment chapter that includes a review of anatomy and physiology, an explanation of relevant health history and physical assessment and a discussion of common diagnostic studies to give students a basis for understanding the discussions of disorders. Identifies and discusses all levels of nursing management including Health Promotion, Acute Intervention and Ambulatory and Home Care to prepare the nurse to effectively intervene at various stages of illness. Extensive gerontologic content identifies age related changes for each body system to alert the nurse to differences often encountered in older patients highlighted in Gerontologic Considerations and Effects of Aging headings and in Gerontologic Differences in Assessment and Effects of Aging tables. Critical Thinking Exercises at the end of each nursing management chapter include Case Studies with Critical Thinking Questions as well as Nursing Research Issues questions to highlight current topics for research.
