The Art Of God Incarnate Theology And Symbol From Genesis To The Twentieth Century:

The Art of the Sacred Graham Howes, 2006-11-24 The field of art and religion is fast becoming one of the most dynamic areas of religious studies Uniquely The Art of the Sacred explores the relationship between religion and the visual arts and vice versa within Christianity and other major religious traditions It identifies and describes the main historical theological sociological and aesthetic dimensions of religious art with particular attention to popular as well as high culture and within societies of the developing world It also attempts to locate and predict the forms and functions of such art in a changing contemporary context of obligation modernity secularism and fundamentalism The author concentrates on four chief dimensions where religious art and religious belief converge the iconographic the didactic the institutional and the aesthetic This clear well organised and imaginative treatment of the subject should prove especially attractive to students of religion and visual culture as well as to artists and art historians

The Grove Encyclopedia of Medieval Art and Architecture

Colum Hourihane, 2012 This volume offers unparalleled coverage of all aspects of art and architecture from medieval Western Europe from the 6th century to the early 16th century Drawing upon the expansive scholarship in the celebrated Grove Dictionary of Art and adding hundreds of new entries it offers students researchers and the general public a reliable up to date and convenient resource covering this field of major importance in the development of Western history and international art and architecture

A Theology of Artistic Sensibilities John Dillenberger, 2004-10-19 For most of history argues John Dillenberger the visual arts were for better or worse part of the very fabric of the life and thought of the church But with the Reformation and the Counter Reformation a major change took place Protestant rejection of the visual was matched in Roman Catholicism by the reduction of its formative power While the visual arts dropped out of the lives of Protestant churches they became a memory rather than a source of ennoblement or power in the Roman Catholic Church Thus in different but allied ways Protestants and Catholics lost the power of the visual Part art history part historical theology and part theological reflection this book is both an argument and a program for the recovery of the visual arts in the life of the church for reclaiming seeing as part of religious perception It offers a theological understanding of the visual and provides a basis upon which the visual arts may again be incorporated into Protestantism and reinvigorated in Roman Catholicism The first part is devoted to historical reconstruction exploring those moments in Western history in which the relation between religion and the arts was in ferment Part 2 is given to contemporary delineation and analysis of spiritual perceptions in modern American painting and sculpture of modern church art and architecture and of the changing views of contemporary theologians toward the visual arts Citing David Tracy Karl Rahner Langdon Gilkey and others as examples Dillenberger argues that contemporary theology is moving away from the modern rationalistic understanding of theological analogy to one far closer to the arts Part 3 is constructive developing a theological perspective that demands and includes the visual arts and suggesting ways in which this can be accomplished in pastoral and theological education The world of art

says Professor Dillenberger is more aware of the role of religion in the arts than the world of religion is of art Thus it is time for the church to resume its historic association with the visual arts albeit in analogous rather than repristinating ways

The World of the Imagination Eva T. H. Brann, 2016-11-28 In this book Eva Brann sets out no less a task than to assess the meaning of imagination in its multifarious expressions throughout western history The result is one of those rare achievements that will make **The World of the Imagination** a standard reference

The Art of God Incarnate Aidan Nichols, 2016-04-22 The Art of God Incarnate proposes that visual art is a good way to think of how the incarnation the central truth claim of Christianity can be said to reveal the divine In the book of Genesis the human being fresh from the hands of the Creator is the image of God in the temple of the world In an environment of distorted images the prophets sought to make visible by symbolic gestures the divine attitude toward Israel as well as looking forward to a new divine intervention to redeem history and transfigure human lives For the New Testament faith this transforming intervention has come about through the restoration of the divine image in man Jesus Christ is the true and living icon of the Father and the model from whose radiance human beings generally can be re fashioned Despite the anti iconic legislation of the Hebrew Bible it was inevitable therefore that under the New Covenant a visual art would make its appearance since God had now made himself visible in his humanized Son During the iconoclast crisis which shook the Eastern Roman Empire it was the achievement of the later Greek fathers to spell out this claim doctrinally Modern aesthetics can throw further light especially by way of phenomenology and semiotics on how an artwork can be a communicator of meaning and truth Finally there is the question of how human beings are to make their own this revelation of God in the visual realm In the Latin tradition especially among the monastic teachers of the twelfth century the biblical theme of man made in the divine image and likeness was used to speak of how people can be changed by the fresh resources that revelation provides Through growth in charity they themselves can become saints images of God

conjointe du texte et de l'image au sein d'une même construction visuelle. Sur cette toile de fond intellectuelle se met en place une mécanique du sens entre imago et littera qui dépasse les fonctions strictes d'identification, de commentaire ou de glose. L'émergence d'une signification augmentée de l'image voire d'une image nouvelle se produit dans la friction du texte et de l'image et l'écriture devient partie intégrante du processus de création du visuel. Partir d'exemples produits entre 800 et 1200, cette étude met en perspective les pratiques artistiques et graphiques avec la théologie de l'image. Elle étudie ces objets qui traduisent dans le matériel la réflexion médiévale sur les capacités respectives de l'écriture et de l'image, la tension de la création et l'histoire du monde.
