Foundations of the Earth H.H. Shugart,2014-07-08 Where were you when I laid the foundation of the earth God asks Job in the Whirlwind Speech but Job cannot reply This passage which some environmentalists and religious scholars treat as a green creation myth drives renowned ecologist H H Shugart's extraordinary investigation in which he uses verses from God's speech to Job to explore the planetary system animal domestication sea level rise evolution biodiversity weather phenomena and climate change Shugart calls attention to the rich resonance between the Earth's natural history and the workings of religious feeling the wisdom of biblical scripture and the arguments of Bible ethicists The divine questions that frame his study are quintessentially religious and the global changes humans have wrought on the Earth operate not only in the physical chemical and biological spheres but also in the spiritual realm Shugart offers a universal framework for recognizing and confronting the global challenges humans now face the relationship between human technology and large scale environmental degradation the effect of invasive species on the integrity of ecosystems the role of humans in generating wide biotic extinctions and the future of our oceans and tides

Toward a Unified Ecology Timothy F. H. Allen,Thomas W. Hoekstra,2015-06-23 The first edition of Toward a Unified Ecology was ahead of its time For the second edition the authors present a new synthesis of their core ideas on evaluating communities organisms populations biomes models and management The book now places greater emphasis on post normal critiques cognizant of ever present observer values in the system The problem it addresses is how to work holistically on complex things that cannot be defined and this book continues to build an approach to the problem of scaling in ecosystems Provoked by complexity theory the authors add a whole new chapter on the central role of narrative in science and how models improve them The book takes data and modeling seriously with a sophisticated philosophy of science
