The Econometric Analysis Of Time Series

Eric Ghysels, Denise R. Osborn

The Econometric Analysis Of Time Series:

The Econometric Analysis of Time Series Andrew C. Harvey, 1990 The Econometric Analysis of Time Series focuses on the statistical aspects of model building with an emphasis on providing an understanding of the main ideas and concepts in econometrics rather than presenting a series of rigorous proofs

Applied Time Series Analysis Terence C. Mills, 2019-01-24 Written for those who need an introduction Applied Time Series Analysis reviews applications of the popular econometric analysis technique across disciplines Carefully balancing accessibility with rigor it spans economics finance economic history climatology meteorology and public health Terence Mills provides a practical step by step approach that emphasizes core theories and results without becoming bogged down by excessive technical details Including univariate and multivariate techniques Applied Time Series Analysis provides data sets and program files that support a broad range of multidisciplinary applications distinguishing this book from others

The Econometric Analysis of Seasonal Time Series Eric Ghysels, Denise R. Osborn, 2001-06-18 Eric Ghysels and Denise R Osborn provide a thorough and timely review of the recent developments in the econometric analysis of seasonal economic time series summarizing a decade of theoretical advances in the area The authors discuss the asymptotic distribution theory for linear nonstationary seasonal stochastic processes They also cover the latest contributions to the theory and practice of seasonal adjustment together with its implications for estimation and hypothesis testing Moreover a comprehensive analysis of periodic models is provided including stationary and nonstationary cases The book concludes with a discussion of some nonlinear seasonal and periodic models The treatment is designed for an audience of researchers and advanced graduate students

Time Series and Panel Data Econometrics M. Hashem Pesaran, 2015 This book is concerned with recent developments in time series and panel data techniques for the analysis of macroeconomic and financial data It provides a rigorous nevertheless user friendly account of the time series techniques dealing with univariate and multivariate time series models as well as panel data models It is distinct from other time series texts in the sense that it also covers panel data models and attempts at a more coherent integration of time series multivariate analysis and panel data models It builds on the author's extensive research in the areas of time series and panel data analysis and covers a wide variety of topics in one volume Different parts of the book can be used as teaching material for a variety of courses in econometrics It can also be used as reference manual It begins with an overview of basic econometric and statistical techniques and provides an account of stochastic processes univariate and multivariate time series tests for unit roots cointegration impulse response analysis autoregressive conditional heteroskedasticity models simultaneous equation models vector autoregressions causality forecasting multivariate volatility models panel data models aggregation and global vector autoregressive models GVAR The techniques are illustrated using Microfit 5 Pesaran and Pesaran 2009 OUP with applications to real output inflation interest rates exchange rates and stock prices

Time Series Models for Business and Economic Forecasting Philip Hans Franses, Dick van Dijk, Anne

Opschoor,2014-04-24 With a new author team contributing decades of practical experience this fully updated and thoroughly classroom tested second edition textbook prepares students and practitioners to create effective forecasting models and master the techniques of time series analysis Taking a practical and example driven approach this textbook summarises the most critical decisions techniques and steps involved in creating forecasting models for business and economics Students are led through the process with an entirely new set of carefully developed theoretical and practical exercises Chapters examine the key features of economic time series univariate time series analysis trends seasonality aberrant observations conditional heteroskedasticity and ARCH models non linearity and multivariate time series making this a complete practical guide Downloadable datasets are available online **The Econometric Analysis of Time Series** Andrew C. Harvey,1993

Applied Time Series Econometrics Helmut Lütkepohl,Markus Krätzig,2004-08-02 Time series econometrics is a rapidly evolving field Particularly the cointegration revolution has had a substantial impact on applied analysis Hence no textbook has managed to cover the full range of methods in current use and explain how to proceed in applied domains This gap in the literature motivates the present volume The methods are sketched out reminding the reader of the ideas underlying them and giving sufficient background for empirical work The treatment can also be used as a textbook for a course on applied time series econometrics Topics include unit root and cointegration analysis structural vector autoregressions conditional heteroskedasticity and nonlinear and nonparametric time series models Crucial to empirical work is the software that is available for analysis New methodology is typically only gradually incorporated into existing software packages Therefore a flexible Java interface has been created allowing readers to replicate the applications and conduct their own analyses

Macroeconometrics and Time Series Analysis Steven Durlauf,L. Blume,2016-04-30 Specially selected from The New Palgrave Dictionary of Economics 2nd edition each article within this compendium covers the fundamental themes within the discipline and is written by a leading practitioner in the field A handy reference tool **The Econometric Analysis of Time Series** Andrew C. Harvey,1990 Provides an integrated approach to the estimation testing and specification of econometric models Describes general principles of estimation and testing within a maximum likelihood framework Focuses on model specification and dynamic models **Applied Econometric Time Series** Walter Enders,2014-11-03 Applied Econometric Time Series 4th Edition demonstrates modern techniques for developing models capable of forecasting interpreting and testing hypotheses concerning economic data In this text Dr Walter Enders commits to using a learn by doing approach to help readers master time series analysis efficiently and effectively
