The Emancipatory Promise Of Charter Schools Towards A Progressive Politics Of School Choice:

The Emancipatory Promise of Charter Schools Eric Rofes, Lisa M. Stulberg, 2004-10-14 Offers a broad multidisciplinary and progressive look at school choice *The Emancipatory Promise of Charter Schools* Eric Rofes, Lisa M. Stulberg, 2012-02-01 This book opens up a critical conversation among progressive educators of various generations, races, perspectives, and social locations concerning one specific school reform initiative: charter schools. Eric Rofes and Lisa M. Stulberg bring together scholars who both study and actively participate in school choice reform and charge them to be bold in their questioning and assertive in their own ambivalence about this complex, controversial public issue and to include issues that are underexamined in the school literature, such as the impact of school choice on race and class politics and inequalities. The editors argue that charter schools are playing a powerful role in reviving participation in public education, expanding opportunities for progressive methods in public school classrooms, and generating new energy for community-based, community-controlled school initiatives. The result is a groundbreaking volume that pushes boundaries, questions assumptions, and rocks foundations of progressive thought.

Diverse Families, Desirable Schools Mira Debs, 2021-03-09 In *Diverse Families, Desirable Schools*, Mira Debs offers a richly detailed study of public Montessori schools, which make up the largest group of progressive schools in the public sector. As public Montessori schools expand rapidly as alternatives to traditional public schools, the story of these schools, Debs points out, is a microcosm of the broader conflicts around public school choice. Drawing on historical research, interviews with public Montessori educators, and ethnographic case studies, Debs explores the forces that pull intentionally diverse progressive schools toward elitism. At the heart of Debs's book is a thoughtful analysis of the notion of fit between parents and schools, an idea that is central to school choice, which is often marketed as an opportunity for parents to find the perfect fit for their kids. By exploring parents' varied motivations in choosing these schools and observing how families experience or fail to experience a good fit after having chosen a particular school, Debs makes an original contribution to the literature on school choice and sheds light on the dilemmas entailed in maintaining diversity in progressive charter and magnet schools.

Schools of Our Own Worth Kamili Hayes, 2019-12-15 Winner 2020 American Educational Studies Association Critics Choice Award As battles over school desegregation helped define a generation of civil rights activism in the United States, a less heralded yet equally important movement emerged in Chicago. Following World War II, an unprecedented number of African Americans looked beyond the issue of racial integration by creating their own schools. This golden age of private education gave African Americans unparalleled autonomy to avoid discriminatory public schools and to teach their children in the best ways they saw fit. In *Schools of Our Own*, Worth Kamili Hayes recounts how a diverse contingent of educators, nuns, and political activists embraced institution building as the most effective means to attain quality education. *Schools of Our Own* makes a fascinating addition to scholarly debates about education, segregation, African American history, and Chicago, still relevant in contemporary discussions about the fate of

American public schooling *Privatization and the Education of Marginalized Children* Bekisizwe S. Ndimande, Christopher Lubinski, 2017-04-07 Privatization and the Education of Marginalized Children examines the issue of markets in education as they shape educational opportunities for disadvantaged children for better or worse in countries around the globe With chapters written by leading scholars in the field of international education this book analyzes the important questions of equity and markets privatization and opportunity and policies objectives and outcomes and it explores the potential promises and empirical evidence on the role of market mechanisms Offering insights from theoretical as well as international comparative perspectives this volume will appeal to researchers and students of education focused public policy sociology and international economics A timely contribution to the field Privatization and the Education of Marginalized Children aims to engage in public private debate by addressing the larger societal exclusions and segregation of communities in which these schools exist **Dark Money and the Politics of School Privatization** Maurice T. Cunningham, 2021-10-08 This book goes deep behind the scenes of school privatization campaigns to expose the complex networks of funding that sustain these efforts often hidden from the view of the public Using the example of a 2016 Massachusetts charter school referendum Cunningham shows how wealthy individuals support charter school expansion through so called social welfare organizations thereby obscuring the true sources of funding while influencing major public policy votes With vast wealth and a political agenda foundations have helped to reshape the reform landscape in urban education *School Choice* David R. Garcia, 2018-09-18 An accessible guide to the major issues and arguments surrounding school choice The issues and arguments surrounding school choice are sometimes hijacked to make political points about government control democratic ideals the public good and privatization In this volume in the MIT Press Essential Knowledge series David Garcia avoids partisan arguments to offer an accessible objective and comprehensive guide to school choice He first outlines the different types of school choice including home schooling private schools freedom of choice plans magnet schools charter schools vouchers and education savings accounts Two themes emerge as particularly resonant in the American school choice debate the long history of school desegregation and debates over the roles and responsibilities of government Is education a public good for the collective benefit of society or a private good to benefit the individual Garcia describes and evaluates the major arguments supporting school choice policies the elimination of government bureaucracies the introduction of competition into education through market forces the promotion of parental choice and the casting of school choice as a civil right He examines the research on the effects of school choice and summarizes general trends Finally he considers how school choice policies are likely to evolve He notes that the Trump administration s Secretary of Education Betsy DeVos is an advocate for school choice and that the administration s budget allocations signal a deliberate shift from long standing federal policies that provide supplemental funding for low income schools Instead new policies provide incentives for low income families to leave public schools altogether through choice This book will be an essential resource for participating in the debates that
