The Endangered Self:

The Endangered Self S. Ramaswamy, Saumitra Chakravarty, 2003-01-01 This Collection Of Twenty Essays Dealing With A Wide Variety Of Authors And Texts Concentrates On The Concept Of Self *The Shattered Self* Richard B. Ulman, Doris Brothers, 2013-05-13 Ulman and Brothers utilize a unique clinical research population of rape and incest victims and Vietnam combat veterans to argue that trauma results from real occurrences that have as their unconscious meaning the shattering of central organizing fantasies of self in relation to selfobject Their innovative treatment approach revolves around the transformation of these shattered fantasies in the intersubjective context of the transference countertransference neurosis

The Endangered Self Richard K. Fenn, Donald Capps, 1992 *The Protean Self* Robert Jay Lifton, 1999-11 We are becoming fluid and many sided Without quite realizing it we have been evolving a sense of self appropriate to the restlessness and flux of our time This mode of being differs radically from that of the past and enables us to engage in continuous exploration and personal experiment I have named it the protean self after Proteus the Greek sea god of many forms from *The Protean Self* **Identity and the New Psychoanalytic Explorations of Self-organization** Mardi Horowitz, 2014-06-05 Advances in science and the humanities have demonstrated the complexity of psychological social and neurological factors influencing identity A contemporary discourse is needed to anchor the concepts required in speaking about identity in present day understanding In *Identity and the New Psychoanalytic Explorations of Self organization* Mardi Horowitz offers new ways of speaking about parts of self explaining what causes a range of experiences from solidity in grounding the self to disturbances in a sense of identity The book covers many aspects of both the formation and the deconstruction of identity Horowitz examines themes including The sense of identity Social learning Biological learning Identity and self esteem Levels of personality functioning and growth The book clarifies basic questions defines useful terms examines typical identity disturbances and presents a biopsychosocial theory which indicates how schemas operate in conscious and unconscious mental processing The answers to the basic questions lead to improvements in psychotherapy practices as well as teaching and research methods *Identity and the New Psychoanalytic Explorations of Self organization* will prove fascinating reading for those working in the fields of psychoanalysis psychology psychiatry neuroscience and the social disciplines *The Metaphysics of Self and World* Elie Maynard Adams, 1991 A great fissure occurred in Western civilization in the early modern period with the divorce between the humanities and the sciences and the rise of scientific naturalism *The Metaphysics of Self and World* is a philosophical exploration of the relationship between the individual the culture and the world It is in the author's words a philosophy of the humanities a philosophy of humanity and a philosophy of social reality It explores the implications of a world view that would integrate the perspective of the sciences with humanistic ways of thought E M Adams claims that we do violence to ourselves as human beings by trying to fit into the world as delineated in scientific categories Rejecting cultural subjectivism and scientific naturalism he argues for the irreducibility

and validity of the categories of the humanities and for a fully developed humanistic philosophy of self and world In generating this world view he utilizes the humanities as a source of culture therapy in order to close the fissure in Western civilization Author note E M Adams is Kenan Professor of Philosophy Emeritus at the University of North Carolina Chapel Hill He has written numerous books and articles and a festschrift celebrating his work *Mind Value and Culture Essays in Honor of E M Adams* edited by David Weissbord was published in 1989 *The Search for the Self* Heinz Kohut, 2022-04-01 The reissuing of the four volumes of the author's writings is a major publishing event for psychoanalysts who are interested in both the theoretical and the therapeutic aspects of psychoanalysis These volumes contain the author's pre self psychology essays as well as those he wrote in order to continue to expand on his groundbreaking ideas which he presented in *The Analysis of the Self* *The Restoration of the Self* and in *How Does Analysis Cure* These volumes of *The Search for the Self* permit the reader to understand not only the above three basic texts of psychoanalytic self psychology more profoundly but also to appreciate the author's sustained openness to further changes to dare to present his self psychology as in continued flux influenced by newly emerging empirical data of actual clinical practice The current re issue of the four volumes of *The Search for the Self* would assure that the younger generation of psychoanalysts would be exposed to a clinical theory that could contribute greatly to solving the therapeutic dilemmas facing psychoanalysis today This is Volume two **Reading from the Underside of Selfhood** Lisa E. Dahill, 2009-01-01 Dietrich Bonhoeffer's example of self sacrificing discipleship has for over fifty years inspired Christians around the world in both their resistance to evil and their devotion to Jesus Christ Yet for some readers particularly those who suffer trauma abuse and other forms of violence Bonhoeffer's insistence on self sacrifice on becoming a person for others may prove more harmful than liberating For those already socialized into self abnegation uncritical applications of Bonhoeffer's teachings may reinforce submission rather than resistance to evil This study explores Bonhoeffer's understandings of selfhood and spiritual formation both in his own experience and writings and in light of the role of gender in psycho spiritual development The central constructive chapter creates a mediated conversation between Bonhoeffer and these feminist psychologists on the spiritual formation of survivors of trauma and abuse including not only dimensions of his thinking to be critiqued from this perspective but also important resources he contributes toward a truly liberating Christian spirituality for those on the underside of selfhood The book concludes with suggestions regarding the broader relevance of this study and implications for ministry The insights for spiritual formation developed here provide powerful proof of Bonhoeffer's continuing and concretely contextualized relevance for readers across the full spectrum of human selfhood **Self-determinable Development of Small Islands** Masahide Ishihara, Eiichi Hoshino, Yoko Fujita, 2016-06-14 This book aims to clarify the present situation of the relations between small island countries and territories on the one hand and the great powers mainland areas and mega islands on the other and explores how small island countries and territories preserve and build their identity under globalization This book is divided into five parts The

first part presents papers on issues that are related to Okinawa the American military presence the formation of a global human network and the history of and language revitalization in Okinawa The second part includes papers on security in East Asia and the Pacific Region the history of and present issues in international relations within the South and East China Sea areas The third part presents papers on economic issues and social developments on small islands The fourth part deals with ocean policies and marine resource management in the Pacific Region by the United States Australia and Japan Finally the fifth part presents papers on the revitalization of three indigenous languages All the chapters of the book are based on the achievements of the research project Towards New Island Studies The Ryukyus as an academic node between East Asia and Oceania conducted by the International Institute for Okinawan Studies at the University of the Ryukyus This 5 year project was funded by the Japanese Ministry of Education Culture Sports Science and Technology and aimed to contribute academically to the creation of sustainable and self determinable societies in small island regions This work will be extremely useful and informative for readers in small island countries and territories and for researchers who are interested in small island issues to understand the current situation and who wish to consider effectual and feasible solutions

Storyworld Possible Selves María-Ángeles Martínez, 2018-03-05 This volume presents a multidisciplinary approach to narrative engagement within the paradigms of cognitive linguistics cognitive narratology and social psychology In their basic form storyworld possible selves or SPSs are blends resulting from the conceptual integration of an intra and an extra diegetic perspectivizer In written narratives SPS blends function as hybrid referents for a variety of inclusive and ambiguous linguistic expressions which are here explored from the standpoint of interactional cognitive linguistics as instances of SPS objectification and subjectification The model also draws on character construction and on the social psychology notions of self schemas and possible selves This allows an exploration of emotional responses to narratives not just in terms of empathy or sympathy towards fictional entities but also in terms of narrative ethics and of culturally determined and simultaneously idiosyncratic feelings of personal relevance and self transformation
