Corporate Criminality and Liability for Fraud Alison Cronin, 2018-03-14 Through a rational reconstruction of orthodox legal principles and reference to cutting edge neuro science this book reveals some startling truths about the criminal law its history and the fundamental doctrines that underpin the attribution of criminal fault While this has important implications for the criminal law generally the focus of this work is the development of a theory of corporate criminality that accords with modern theory of group agency itself informed by advancements in contemporary philosophy and social science The innovation it proposes is the theoretical and practical means by which criminal fault can be attributed directly to the corporate actor where liability cannot or should not be reduced to its individual members

Enforcing Pollution Control Regulation Carolyn Abbot, 2009-05-18 Monitoring and enforcement issues must be analysed when determining the effectiveness of pollution control regulation and clearly influence choices about how to regulate This book demonstrates how an economic analysis of law enforcement can generate important insights into how best to enforce pollution control regulation It seeks to provide a clear and accessible way into the law and economics literature on enforcement More specifically it uses Gary Becker s deterrence model which by differentiating between two enforcement variables namely the probability of apprehension and conviction and the severity of sanction facilitates a comparison of the effectiveness of different enforcement tools in inducing desirable behaviour As such it provides a valuable analytical tool in considering how best to pursue cost effective enforcement Major themes to be addressed include Becker s deterrence model and expansions thereof reasons for compliance environmental enforcement

strategies and the importance of a deterrence threat and formal pollution control law enforcement mechanisms such as prosecution and criminal sanctions administrative mechanisms and civil liability The book argues that in pursuing cost effective enforcement much can be learned from examining enforcement practices in different jurisdictions and to this end the author examines pollution control laws enforcement strategies and sanctions in Australia Canada and England and Wales The book makes an important contribution to existing literature on environmental law enforcement but its value extends beyond this The theoretical framework adopted and the range of issues discussed make it of interest to regulatory and public law scholars more generally Regulating Government Ethics Chonghao Wu, 2016-10-20 Adopting a comparative empirical research strategy this book examines the government ethics rules and their enforcement in China
